MESSAGE

OF

Joshua Vansant, Mayor,

TO THE

First and Second Branches of the City Council,

OF BALTIMORE.

DALIIMORE : PRINTED BY JOHN COX. 1872.

MAYOR'S MESSAGE.

.....

MAYOR'S OFFICE-CITY HALL, Baltimore, Jan. 15, 1872.

To the Honorable the Members of the

First and Second Branches of the City Council : GENTLEMEN :

Preliminary to an exposition of the operations of the respective departments of the City Government for the past fiscal year, and to the suggestion of such measures as, in my judgment, may promote the interest of the city, the occasion renders it proper that I should acknowledge that our thankfulness should be renewed to Almighty God for the many blessings he has bestowed upon us since you last assembled in Annual Session.

While some of our sister cities have been scourged by malignant epidemics, and others desolated by fires, we have been singularly exempt from these and other calamities that wait upon humanity. The records of the City demonstrate that at no period in its history have our people realized to a greater extent the blessings that flow from a healthy condition. Such a result cannot properly be embraced in the chapter or roll of accidents, but it must be attributable to the climate of our latitude, the over-ground drainage of the City, the supply of excellent water, and the effective operations of the sanitary department of the City, in averting the incursion of diseases fatal in their character.

The City has steadily increased in population and wealth; commerce and the arts have flourished; success has marked the labors of the manufacturer and the merchant, and their financial credit has not been impaired by improvidence in their professional pursuits, or by disasters that are incident to human industry; and the elastic energies of our people are carving out for our City a still further improved condition and a brighter destiny.

Her geographical position has enabled her to maintain important advantages over rival cities by her proximity to the flourishing and expanding West; and the enterprise of her citizens has constructed lines of important internal improvements in her various expanded and expanding Railroads, which have placed her in easy communication with sections of country the great staple productions of which have been poured into her lap, and enabled her to transport to distant points the productions of her home industry, and the commodities which her foreign and domestic commerce have gathered.

FINANCES.

The Funded Debt of the City on the 31st of December, 1870,
was\$24,399,125 47
The Guaranteed Debt was2,365,000 00
Total Funded and Guaranteed Debt\$26,764,125 47
From said period to 31st Octo-
ber, inclusive, 1871, the
Funded Debt has been in-

MAYOR'S MESSAGE.

From the aggregate Funded and Endorsed Debt there should be deducted the following as parts of these debts on which the interest is regularly paid to the City, viz: Funded Debt:

Baltimore & Ohio Railroad Company	\$5,000,000 00
Water Loan	5,000,000 00
Public Park	555,566 25
Total Funded	\$10,555,566,25
Endorsed or Guaranteed Debt, viz:	
York and Cumberland Rail Road	
Company\$500,000 00	
Union Rail Road Company 117,000 00	•
N. W. Virginia Rail Road Com-	
pany 724,500 00	
Total Guaranteed	\$ 1,341,500 00

Aggregate on which interest is paid to City .. \$11,897,066 25

License, Wharfage, Rent of City Property,	
Markets, Theatrical Entertainments and	
Foreign Passengers, there are derived an-	
nually a revenue of \$127,400 which is the	
interest upon a capital of 2,123,333	33
The City has also the following assets upon	
which interest is not now paid :	
Pittsburg & Connellsville Rail Road Company	
Stock\$1,000,000	00
Accrued interest on said stock 1,166,468	22
Western Maryland Rail Road Stock 200,000	00
Endorsement on Bonds of Western Maryland	
Rail Road Company which is classed in a fore-	
going table as a Guaranteed Debt, on which	
interest is now paid by City 1,650,000	00
The receipts and disbursements from the 31st of Dece	em-
ber, 1870, to the 31st of October, inclusive, 1871, were as	be-
low respectively stated :	
Receipts, viz: Cash Balance, 31st December,	•
1870\$ 398,356	70
Received on Account of Tax Levy of 1871 1,837,094	27
Received from Taxes in arrears 747,325	82
Received from all other sources 2,526,823	73
Total\$5,509,600	52
Disbursements viz :	
Paid for interest on account of Temporary	
Loans	33
Paid for all other purposes 5,527,292	70
Total\$5,549,482	03

MAYOR'S MESSAGE.

Excess of payments over the receipts	39,881 51
On the 31st October, 1871, the floating debt	•
was\$	749,585 29
on the following accounts :	
Temporary Loans from Banks, &c	\$417,200 00

Due to Water Board	155,380 73
Due to Park Board	58,749 07
Due to City Hall Commission	48,554 72
Total	\$749,585 29
Although the City Council of 1870 so changed	l the fiscal
year as to make it expire on 31st of October, yet th	ne Tax Levy
for 1871 was made for the calendar year ending a	B1st Decem-
ber. The following estimate, believed to be near	arly correct,
will show that the financial condition of the city	at the close

of the calendar year, will not at all be improved	1.	
Floating Debt as above	\$749,585	29
Amount due on account of appropriations	589,834	33
Bills Payable, (notes of City, under resolution		
of November, 1871)	42,797	02

....

Total......\$1,382,216 64

Credit by estimated collections on	
account of Levy of 1871\$407,240	00
Estimated Collections, Taxes in ar-	
rears	00
Estimated collections from other	
sources 178,148	00
	- 622,589 00

Estimated Floating Debt, 1st January, 1872....\$759,627 64

This condition of the financial affairs of the City, as above exhibited, is certainly not very encouraging. It cannot. however, be considered as startling in view of the rising greatness of our city and its resources, and especially is it not so when compared with the condition of the populous cities of the East and West. Nevertheless, there is not in my judgment, a sufficient justification for its condition. No contingency has arisen within the fiscal year which called for large unexpected expenditures of money, or that rendered the same necessary. The condition has been caused partly by inadvertence in overlooking existing claims, in part by miscalculation in reference to revenue, and from making large appropriations after the annual levy had been made, and when, of course, there were no means provided for the payment of such appropriations. After the levy for 1871 had been made, which covered only appropriations made anterio: thereto, further appropriations were made amounting to......\$326,948 97 No provision was made for the payment of a

'Total.......\$785,578 97

These items are in amount greater than the floating debt. In the matter of revenue the most prudent and experienced may be deceived in their estimates, but the able financier, conscious of the impossibility of making revenue subordinate to the rules of mathematical science, never fails to set up a margin for contingencies that human sagacity and foresight cannot call up. All experience in the management of public affairs, as connected with revenue and disbursement, has demonstrated the wisdom, prudence, and safety of the marginal theory, both in reference to revenue and appropriations.

There is one principle in legislative finance, involving public faith and credit, in reference to which there can be no division of sentiment, and that is, that no public debt should be incurred or the authority given to incur the same unless provision shall be made at the same time for the payment thereof. A disregard of the injunctions of this theory is frequently not so much the result of inadvertence, or ignorance of the policy of government, as it is of a disposition to escape the responsibility of levying the necessary tax to meet the liabilities carved out in making appropriations. The levy of an inadequate per centum tax upon property to meet extravagant appropriations, is a mask to cover up improvident legislation, the tendency of which is to throw upon a future legislative body the responsibility, or odium it may be, of providing for the payment of that which it had no agency in creating, nor the power to avert. Such an expedient or practice exhibits neither fairness nor moral courage. It is a postponed debt which often increases with the progress of time. A precedent in that connection is apt to furnish an apology for its repetition, and has seldom failed to prove disastrous in its consequences in the impairing of public credit, and occasionally in weakening the great moral obligation of public faith.

The management of the revenue of the City is a trust alike important and responsible. The observance of a strict and faithful economy in that respect will give vitality to enterprise, promote the general prosperity, establish or continue public confidence in those who may from time to time be charged with the administration of the City Government, and will challenge and command at the hands of a true people, a cheerful submission to the burthens which are inseparable from organized society.

CITY COLLECTOR.

Up to and including the year 1870, the fiscal year closed with the 31st of December. Under the resolution adopted by the Mayor and City Council at the late session of said Council, the fiscal year was made to terminate on the 31st of October, and hence the report of the Tax Department for the year 1871 embraces a period of but ten months.

The levy for 1871 was upon a taxable basis of \$210,310,975 00

Upon that levy there has been collected\$1	,834,857	27
From taxes in arrears	747,325	82
From opening and closing streets	204,981	74
Total \$2	.787.164	83

The change in the fiscal year renders it impossible to make a mathematical comparison in the matter of collections. The collections upon an annual levy generally commence in the month of April, which, when the fiscal year closed on 31st of December, made nine months for collections in the year that the levy was made; such was the case in 1870. As the fiscal year of 1871 closed on the last day of October, there were but seven months in that year in which collections were made.

The taxable basis of 1870 was \$201,750,882. The amount collected in that year on said levy was \$2,194,529 62. The taxable basis of 1871 was \$210,310,975. The amount collected in that year to 31st October, 1871, on said basis was \$1,834,857 27.

The Collector suggests the necessity for adopting "some action in regard to the division of large tracts of land, as-

sessed in many instances by the acre, and which are now being leased for building lots," and that "it should be made incumbent on the original holders to furnish this department with accurate plats of the property thus divided, as otherwise it will be impracticable hereafter to determine on what portion of such ground the taxes are paid or may remain unpaid." This recommendation is, in my judgment, necessary to prevent embarrassment to the Tax Department, and commends itself as a measure of justice to the citizens of Baltimore who have to contribute their proportion, based upon their possessions of property, to the support of the City Government. The end can doubtless be accomplished by City ordinance.

The entire report of the Department demonstrates that its principal officer has maintained the efficiency that characterized his labors hitherto, and that the citizens of Baltimore have not been tardy in the payment of their taxes.

APPEAL TAX COURT.

In addition to the duties of this Department to direct the assessment of property and to hear and adjust grievances in matters of appeal from the action of the Assessors, it issues permits for the erection of new buildings and for the improvement of old ones. The report which they present in the matter of construction and reconstruction evidences the rapid growth of the City and the consequent demand for dwelling and store houses.

In	the	year	1868	the	permits	for	construction	and re-
const	ructi	on we	re				••••••	2,879
In th	e yea	r 186	9					3,012
66	66	187	0					3,630
From	Jan	uary	1st to	Oct.	31st, 18	71, 1	en months	3,185

Total......12,706

The number of permits issued in the 10 months of 1871 exceeded those of the corresponding period of 1870 in the number of 60. Of the 3,185 permits issued in 1871, two thousand two hundred and eighty-seven were for new buildings, and three hundred and fifty-six were for reconstructed ones. The assessed valuation of these improvements was \$5,258,550, and hence the taxable basis for 1872 on that account will be correspondingly increased.

To the City of Baltimore this is a most important Department, not only as a court of arbitrament, but because it is the only department that operates as a "check" upon the office of City Collector.

WATER DEPARTMENT.

The Water Board, in their last annual communication to the Mayor and City Council, estimated that the revenue in the future would pay the interest on the "Five Million Water Loan" and the expenses of conducting the operations of the Department under their charge. In their report for the fiscal year ending with the 31st of October, 1871, covering a period of ten months, they say "that interest on the entire Water Debt and all expenses of the Department, including the expense for new mains, are now paid out of the revenues of the office." This intelligence, in view of the efficiency of the Department, is certainly gratifying to the tax-papers of Baltimore.

The Receipts, after deducting discount on the Water bills, for the ten months were......\$381,505 50 The Expenditures for the same period were308,430 18

Balance in favor of receipts......\$73,075 32

There were laid during the same period 7 miles and 3,445 feet of "Mains," and 4 miles and 1,765 feet of service pipe.

According to the report of the Committee of the City Council of 1854, which recommended the ordinance that subsequently passed that body, to purchase out the water rights, pipes and certain other properties of the Baltimore Water Company for the sum of one million three hundred and fifty thousand dollars, the whole length of water pipes then laid was about fifty miles, and the revenue about ninety thousand dollars per year.

The supply of water was then less than three million gallons for every twenty-four hours. The length of water mains of the present Department is now 206 miles and 4,690 feet; the revenue for the ten months included in the report of the Water Board was \$381,505 50, and the water supply averaged about twelve million gallons for every twenty-four hours, and frequently during the warm season exceeded fourteen million gallons, being about fifty gallons to each inhabitant. Lake Rowland, however, was for several months drawn on to its utmost capacity, no water having passed over the dam during that time.

In view of this fact, and the rapid increase in the population of the city and the consequent necessity for augmenting the supply from some other source, the Board have suggested that preparations, at least, should be made for adding thereto the waters of the Gunpowder. They do not recommend that the work should now be commenced, but that it should be deferred at least until they shall have completed the measure, now progressing, for supplying the north-western and western sections of the city, a portion of which is but very indifferently supplied, and some parts not supplied at all. The original purpose of the Board was to furnish that elevated section by pumping into a "Stand Pipe" that would distribute at an elevation of two hundred and ninety feet above tide. Considerations of the disadvantages likely to reult from a plan that would require the lifting steam power

to be kept in motion without cessation, and the knowledge they obtained from the experience of other cities that in order to obtain a supply of water, were compelled to adopt that means because they had no ground elevations upon which reservoirs could be constructed, induced them to abandon their first theory. They have determined to construct a high service reservoir in Druid Hill Park, to be located about five hundred yards north-west of the Park Mansion House, the elevation of which will be three hundred and fifty feet above tide, being higher than any earth elevation within the city boundary and one hundred and thirty-three feet higher than Druid Lake. Its capacity will be 26,241,161 gallons. The water is to be pumped into it from Druid Lake by steam machinery of the power of lifting 2,500,000 gallons in twenty-four This it is believed will be more than an ample suphours. ply for years in the future. The work for the accomplishment of this great necessity is now under contract, and will be pushed to its completion by all the means the Board may be able to command.

The beautiful lake at Druid Hill is now entirely completed at a cost of \$1,167,404. The sum expended in the construction of it within the fiscal year, recently closed, was \$45,-811 40. The Tower and Observatory has been finished at an expenditure of \$4,519 10. An iron railing of 7,656 lineal feet has been constructed, inclosing the Lake, at the cost of \$13,145 77. This improvement was, for various considerations, deemed necessary. It certainly contributes to the beauty of the Lake and the Park.

This matter of water supply cannot be over-estimated in its importance, and when the water of the Gunpowder shall have been conducted into the city, as it must of necessity be in the lapse of a few years, no city on this continent or in Europe will be able to boast of so great a bounty.

MAYOR'S MESSAGE.

FIRE DEPARTMENT.

The experience of the year has demonstrated the efficiency of this branch of the public service, and our citizens have much reason for rejoicing that the city has been in a very great measure exempt from the calamities of conflagration. The public can only be secured in their property from the ravages by fire by the appointment of the best men for the Fire Department in the positions of principals and subordinates, that can be secured for the important service. They are the watchmen upon the tower; the sentinels at the gates. Method, discipline, faithfulness, courage and thorough subordination, are indispensible to the efficiency of this depart-Thus far it has been a success, but to continue that ment. success requires the most watchful supervision on the part of those who are charged with the direction of its operations, as it does the consideration of those whose duty it is to shape legislation to the accomplishment of the ends of the Department.

The Fire Commissioners recommend that an appropriation be made to purchase out so much of the building of No. 6 Engine House as is now occupied for stabling the horses, for the reason that said portion of the house is offered for sale to close up an estate. It may now be had for the sum of six thousand five hundred dollars. If the city should not avail of the offer the property might be sold to one disposed to improve it for business purposes. In the latter contingency the balance of the building would be but poorly adapted for its present purpose, and might render it necessary to abandon it and to erect a building elsewhere.

The present locality of the company is the best that can be obtained in that section of the city, and I respectfully recommend that authority be given to the proper officers of the city to make a purchase of the premises referred to. The amount expended by the Department for the ten months ending Oct. 31st, 1871, was \$125,107 39.

In the matter of the new companies authorized by the City ordinances, the Commission reports that No. 8 Engine Company has been organized and placed in service. That Company No. 9 will be put in a similar condition in January, 1872, and Company No. 10 will be organized and the apparatus to be connected therewith will be in readiness to enter the service as early in the year 1872 as may be practicable.

In consideration of the rapid increase of the building property, and its extension towards the city boundary in every section of the city, the Department recommends the organization of new companies, and that one of them should be a "Floating Company" for harbor service. The plan suggested is to construct a propeller boat, about the size of the smallest city tug boat, with machinery of sufficient power for propelling the boat, and when necessary, to apply the same power for lifting and discharging water. This, the Department says, would, in view of the vast amount of valuable property in vessels and of warehouses on the margin of the Basin, including the southern part of the Basin to Locust Point, be of great utility in the extinguishing of fires along the line referred to, inasmuch as it will enable such a company to operate at points where the existing companies cannot work effectively, and by being at all times in readiness for service can be brought into action with more promptitude. Not having witnessed the workings of a Floating Fire Apparatus, I am not prepared to pass in judgment upon the utility of the proposition. The matter is however of sufficient importance to challenge an investigation of the merits of the suggestion.

The great disasters that have recently taken place, in the matter of destruction of property by fire, the loss of human life consequent upon it, and the want and misery it has entailed upon large bodies of citizens, are suggestive, and awaken serious apprehensions of danger from a devastating element when there is not a sufficient counteracting power to hold it in check.

While I am in favor of administering the City Government upon the theory of economy, I do not deem it either wise or economical to close the door against any measure that looks to the protection of the property of our fellow citizens. Every good citizen is materially interested in the keeping up of an effective Fire Department. In the expense of its maintenance it may increase the tax levy upon property, but to the property holder, the landlord, and the tenant, much more than the tax levy is saved by the reduction in the tariff of fire risks.

It may not be expedient, in view of our present financial condition, to increase the number of Fire Companies to the extent suggested by the Commissioners, within the next twelve months, but the increase should keep pace with the increase of building improvements and the extension of the same over a greater area.

FIRE INSPECTOR.

The Fire Inspector reports 156 actual fires as having taken place within the city limits in the ten months of 1871, that 172 buildings were damaged thereby, and that the loss of property on that account was \$475,394 87.

In the year 1870 the loss by fire was \$432,717 07 being \$42,677 80 less than the loss in 1871.

The paper contains much information touching the causes of fires and many valuable suggestions in connection with the subject. His remarks in reference to explosive liquids, frame structures, the manner of constructing warehouses and dwellings, evidence a thorough knowledge of the matter of which he speaks. Thus believing, I invite your consideration of the report.

FIRE ALARM TELEGRAPH.

The expenses of this Department for the ten months of 1871 were \$15,249 84.

The Superintendent of the Department reports the work to have been performed by its officers as follows: Messages sent 2,668, messages received 1,742. Lost children recovered 293. Horses and vehicles recovered 48. Cattle 8. Alarms of fire telegraphed 151. Calls for extra engines 9. For general alarms 4.

The alarm stations now number seventy-five, and it has been suggested that in consideration of the extension of the building lines within the boundaries of the city, there should be an increase of alarm boxes.

PORT WARDEN.

The sum appropriated for this department	
for the year was\$182,750	00
Amount received for private dredging 6,661	14
do. from sale of old material 694	70

\$190,105 84

Amount expended during same period...... 133,024 96

Balance in favor of the department......\$ 57,080 88

During the past season there have been removed from the harbor and back Basin, two hundred and forty thousand and twelve cubic yards of sediment, which was deposited in the rear of the "Sea Wall" at the Marine Hospital. The machines have removed a large quantity of sediment from the Fort Bar, and by this labor one hundred feet have been added to the width of the entrance to the harbor, and a depth of twenty-four feet attained. Vessels drawing from twentytwo to twenty-four feet can now reach the wharves at Canton and Fell's Point. The principal officer of this Department, in his report, says he "has been cutting a channel two hundred feet wide at the entrance, gradually diminishing to one hundred feet, from the Lazaretto to Henderson's wharf, with a depth of twenty-four feet; thence in a westerly direction to Abraham's wharf twenty feet; thence to the Boston Steamship wharf seventeen feet, and thence to Bowly's wharf fourteen feet."

In the interior harbor or basin west of the mouth of Jones' Falls, there have been very great accumulations of filthy sediment from the washings of mud into the Basin from rain falling on the streets; the discharge from sewers and privies; and from vegetable matter cast from vessels at the wharves.

The average depth of this matter was not much less than hree feet in all parts of the Basin west of Bowly's wharf, as well as at some other parts, and from the contents, during the late summer, the most offensive and unhealthy smell was emitted.

The condition thereof awakened fears as to its effects upon the health of the city, and the wonder has been that it did not create an infectious and contagious epidemic. To avert the recurrence of the evil referred to, as well as to give a proper depth for navigation, it is my purpose to employ all the dredging machines that can be availed of and worked effectively, to the lifting of the sediment from the harbor, and the public and private docks. I cannot believe that the owners of private docks will offer any obstacle to the removal of the foul sediment lying in their docks by a refusal to pay such portion at least of the expense thereof as the Port Warden may consider equitable. The Health Officer of the city is authorized to define what constitutes a nuisance, or that which may engender it, but inasmuch as every citizen of Baltimore is materially interested in keeping the harbor and docks in a condition as free as possible from nuisance, and those engaged in their industrial pursuits on the lines of the docks especially so, I prefer to rely upon the co-operation of the latter in particular, in the work of clearing the water courses of filthy sediment, rather than to resort to the arbitrament of the Health Officer to impel me to direct the execution of the necessary dredging.

The report of the Port Warden contains much that is interesting, and hence I commend it to your notice.

THE PATAPSCO RIVER AND HARBOR COMMISSION.

The amount expended by the Port Warden in deepening and widening the lower channels was \$40,778 81. The appropriation by the City for that service was \$24,600, but inasmuch as the State appropriates, under the act of 1868, chapter 13, the proceeds of the auction duties for the purpose of deepening and improving a channel in the Chesapeake Bay and Patapsco River, the amount to be paid by the Treasurer of the State, applicable to the work of the Port Warden in the connection above, will very nearly cover the deficiency. At the date of writing this communication the work in the lower channel is suspended, and the Steamer Robert Kirkland, known as the State Boat, has been "hauled up" on the south side of the Basin, and is being coppered in order that it may be in a condition to be availed of, if necessary to keep the channel open, and for towing out the large steamers and other vessels that may depart from the harbor during the winter. The Port Warden commenced his operations with the State Machines in June, at the Brewerton Channel, abreast of North Point, where the sediment extended across the channel and run parallel with it about two miles. This obstruction to the navigation was removed and the channel deepened to twenty-four feet, and widened to one hundred and fifty feet. He made three parallel cuts from Sparrow to Hawkins, Point, making a depth of twenty-four feet and a width of one hundred feet. The latter is regarded as the part of the channel the most difficult to navigate.

In advance of the improvements in the channel, made recently, vessels could only load in the harbor from nineteen to nineteen and a half feet, and were consequently compelled to finish taking in cargo at Annapolis Roads. During the present season, when there is less depth of water than in the warmer season, the large steamers are able to load at Locust Point to a depth of twenty and a half to twenty one feet. The Brewerton channel, says the Port Warden, requires widening.

Much improvement has been made in the Craighill Channel. This channel is the principal entrance from the Bay to Baltimore, and shortens the distance to sea about six miles. The appropriation by Congress for the improvement of this channel has been expended, and I respectfully suggest that the aid of Congress be invoked to make such further appropriation as will render the Bay and River navigation suitable for the largest class of vessels at the season of the lowest tides.

The matter of our sea navigation is too important to all the great producing and commercial interests of Baltimore to be allowed to depend upon the contingency of National aid. Of this, I am sure, the Councils of the City are fully aware, and I respectfully suggest that liberal appropriations be made for the promotion of the object.

DEPARTMENT OF CITY COMMISSIONER.

The great amount of labor which devolved upon the Department of the City Commissioner induced the Mayor and City Council, with the view of lessening the labors of the Commissioner; to create the office of Inspector of Buildings, the duties of which are to supervise the construction and repairs of Public Buildings, the issuing of permits for the crection within the city of Steam Engines, Frame Sheds, Swinging Signs, &c. That department went into operation on the 7th of June, 1871.

The Commissioner reports that up to the 31st of October he graded and paved, in the ten months preceding that date, new streets measuring 385,041 square feet, and that by the 1st of January, 1872, the total in the year will be 481,741 feet, being 175,301 feet more than were laid down in the year 1870. The whole area of paved streets in the City is now 30,657,532 supérficial feet. In the last four years 1,774,469 feet have been laid, being nearly equal to one-seventeenth part of the whole area.

Than the above statement of facts nothing more indubitably indicates the rapid growth and expansion of the City. There is also under paving contract about 350,000 square feet of streets.

In pursuance of an Ordinance of the City the Asphalt Company is putting down its patent pavement on South street between Baltimore and Lombard streets. The Commissioner says that "like improvements of this character it will take a little time to develope the merits or demerits of the pavement, and enable us judiciously to compare its cost for repairs, &c., with the cost of those in use."

In reference to grading he says, that it is unfortunate for the comfort and health of the citizens residing on West street, between Hanover and Leadenhall streets, and on Cross street, about the same locality, that the grading, which was raised three and one half feet, had not been further raised. That during heavy rains and high tides the flooding renders the streets impassable.

The New Iron Bridge crossing Jones' Falls on the line of Decker street, will be completed by the close of the calendar year. The completion of the Bridge of the Northern Central Rail Road Company over their road, on the line of the same street, opens up another important highway greatly to the relief of Charles Street Avenue. The old Belvidere Bridge has been repaired, and supported as far as practicable. This bridge as a highway, was to have been superseded by the construction of one over the Falls on the line of John street, but that street, between Green Mount Avenue and Belvidere Road not having been condemned, the work, for which an appropriation three years since had been made, has been necessarily postponed. The Commissioner expresses the opinion that from considerations of safety the old bridge will either have to be closed to travel altogether, or undergo thorough reconstruction, inasmuch as he is doubtful as to the speedy condemnation of John street.

In reference to grants to Passenger Railway Companies to lay down tracks on the streets, he suggests that the Ordinance granting such franchise should attach a penalty for an omission to comply with its conditions. The report abounds with useful information in reference to City Improvements.

INSPECTOR OF BUILDINGS.

This office was created in June, 1871, and its incumbent entered upon the duties of his position soon after his appointment.

His communication refers to the supervision of the erection of market houses, &c., and the repairing of school houses in every section of the city. He reports as the result of his observation, that the ordinance for removing dangerous walls, to be found on page 858 of the city code, does not subserve the end for which it was designed. It does not clothe the Inspector of Buildings with the authority to enforce the observance of the ordinance. He suggests the enactment of an ordinance, in lieu of the existing one, regulating the erection and repairs of buildings under compulsory restrictions, in order to the better protection of human life.

The Department has, upon the compliance with certain prescribed forms, the right, with the assent of the Mayor, to issue permits for the erection of frame sheds and stables. A few years since it required a special resolution of the City Council to authorize the putting up of any kind of a frame structure within the limits of direct taxation.

To avoid the trouble incident to this special legislation the Council vested the power to grant such permits in the City Commissioner. The labor thus transferred was found to be very embarrassing to that officer, in view of his other onerous duties, and hence by an ordinance, adopted in June, 1871, the authority was transferred to the Inspector of Buildings. The process by which these grants are obtained, is by making application for the permit at the office of the Inspector, who thereupon advertises the fact of the application, which but very few people observe, and if no one appears and objects to the grant, the permit is generally issued. By this easy process of obtaining permission to erect open and closed frame sheds, permits have been obtained in the ten months of 1871 to erect 1237 wooden sheds and stables. If this practice shall continue for many years one half of the buildings within direct taxation will have sheds or stables in the rear thereof, to the imminent danger of having one half of the city consumed by fire in consequence of the connection, the one with the other, of these frame structures. In my judgment it will conduce to the protection of the city, to divest the Superintendent and the Mayor of the authority referred to, and for the City Council to re-assume the authority with which

it seemingly parted in that connection. The tedious process by which the special grants from the Council can be obtained, deters very many from applying therefor. The general ordinance which regulates the putting up of signs, &c., is ignored by a process precisely similar to that employed in reference to wooden sheds. The footways of the city are, when unobstructed, too narrow for busy thoroughfares, and the extension of swinging signs and sign boxes between the curbstones and the houses, frequently renders the side pavements impassable. Besides, they operate to the injury of contiguous stores, as places of sale, by masking the windows of the latter.

In my judgment the Mayor and the Inspector of Buildings should be divested of the authority to issue permits for box, swinging, and awning flap signs, as expressed in the existing ordinance upon the subject.

PUBLIC SCHOOLS.

The amount disbursed for education at the Public Schools for the ten months of 1871, ending with Oct. 31, 1871, independent of the construction and the repairing of school houses, was as follows:

Salaries of Teachers, &c\$284	1,570	80		
	,060			
	,930	23		
	,325	82		
Fuel 9	,839	90		
Cleaning and Repairs 12	,489	91		
Printing Supplies and Incidentals 8	,850	54		
	3,960			
			\$386,027	81
Receipts from the following sources :				
From White Pupils\$32				
From Colored Pupils 1				
On Acct. of Rent	118	75		
			\$33,570	79

Showing the net amount paid to have been \$352,457 02

The sum disbursed in the 12 months of 1870 was \$462,-167 71. The total number of schools is 119—consisting of 101 day schools and 5 evening schools for white children, and 10 day and 3 evening schools for colored children.

In the schools there are 536 white and 42 colored teachers' Pupils on the roll, 25,355, classified as follows:

White Pupi	ls in the Day Schools	22,660
do.	in the Evening Schools	: 649
Colored Pup	ils in the Day Schools	1,819
do.	in Evening Schools	227
	Total	25.355

Of the foregoing number 13,750 are free, and 11,625 are pay pupils. White free pupils, 12,497, colored free pupils, 1,233. White pay pupils, 10,812, colored pay pupils, 813.

One of the highest duties that is enjoined upon organized society is to provide for the education of youth. No measure in that connection can be so generally effective to the end as public education.

The system has met the approval of civilized humanity every where, but in no place has it been more favorably accepted and cherished than in Baltimore city. It underlies our structure of government as well as the morals and manners of our people. The intelligence which it disseminates has an influence upon every condition of society, making man and woman wiser, better, and happier.

It is questionable if the system of public education now in practice in the city can be much improved. It has commanded the admiration of those who are capable of investigating it, and its fruits are manifest. It has made its mark in the workshop and the counting house; at the bar, in the pulpit, and wherever science and intelligence have had their triumphs. To insure a continuance of the success of the institution, I think it important that the changes in the appointment of School Commissioners should be less frequent than they have been within the last few years. Time and experience only can make men familiar with and effective in the performance of the duties of a School Commissioner. Any one whose character and intelligence qualify him for the service will not care to accept an office unremunerative, and from which he may be ejected at any time upon the change of a representative in the City Council.

The knave, who in accepting the appointment, has some ulterior or mercenary object in view, may be willing to accept the situation at any risk, or upon any terms, but if annual removals should be the precedent and become the rule, the services of good and competent men may not be readily secured, and hence the *continued success* of a great and revered institution may become problematical.

A few years of experience as a member of the Public School Board has produced upon my mind the impression that there is much more of labor required of the Superintendent of the Schools than is consistent with their success, and as the schools and the pupils have greatly increased since my connection with the School Board has been dissolved, there must be an increased necessity for reform in that particular. The duties of that officer are of a general supervisory character. The annual and semi-annual class examinations, and the necessity for visiting the schools in order that the discipline which the system imposes, and the rules which the Board adopts may be properly enforced, involves a greater amount of labor than any one person can effectively perform. There are departments in which expenses might be abridged without injury to the institution, but it is not economy to defeat great ends by the non-employment of service where it may be required.

The matter of the erection of a suitable building for the accommodation of the Male High School, or Baltimore City College as it is termed, has been from time to time presented to the consideration of the City Council, and while the measure appeared at each session of that body to be favorably entertained, the difficulty in fixing upon a proper site for the erection of the building has as frequently defeated the object. The necessity for a proper structure has not diminished with the lapse of time, and the Board of School Commissioners will, doubtless, press the matter upon your consideration.

MCDONOGH EDUCATIONAL FUND AND INSTITUTE.

The Trustees of the McDonogh Educational Fund and Institute, appointed under the Ordinance of July 10th, 1868, report that since the 1st of January, 1871, the additions to said fund have been, from interest accrued on investments in the Stocks of Baltimore City \$33,975 00 State Stock-Defence Loan..... 4,509 00 Interest on Mortgage..... 1,200 00 Total.....\$39,684 00 Cash Balance, Jan. 1st, 1871...... 3,715 95 Aggregate...... \$43,399 95 The Disbursements have been as follows, viz : For \$44,000 of Baltimore City Stocks, \$43,045 00 " Interest on loan.... 72 77 224 16 " Incidental expenses..... Total.....\$43,341 93 Cash Balance, 31st October, 1871.... 58 02--- \$43,399 95 The investments now held by the Trustees are as follows: City of Baltimore Stocks......\$589,000 00 State of Maryland Defence Loan..... 75,150 00 Mortgages on Real Estate, due 1st May, 1879 40,000 00 Aggregate..... The Trustees are required to hold a well secured permanent fund of five hundred thousand dollars, the interest that may accrue from which they are authorized to apply to the purchase of a farm, and the erection thereon of such improvements as may be suitable for a School Farm, and to other expenses necessary and incidental to the maintenance of such an Institution.

There is, therefore, a fund at the disposal of the Trustees, that they are authorized to apply to the object for which they were appointed, of \$204,150 00, in addition to a small cash balance. In connection with this branch of the subject the Trustees say that "the question of the purchase of a farm suitable for the School in every respect has been the source of great anxiety to the Board, involving, as it may to a considerable extent, the success of the Institute. The delay in the purchase of the farm has in no wise been attributable to a disposition on the part of the Board, or even any member of it, for postponement; but has been caused by circumstances beyond their control. During the past year there have been several changes in the members of the Board, and their successors required necessarily some time to inform themselves of the duties imposed upon them. By reference to the report of the Agent you will perceive that Moses Fox, of New Orleans, has again revived his pretended claim against the cities of Baltimore and New Orleans, under a codicil attached to the will of Mr. McDonogh."

During this delay in the matter of the purchase of a Farm, the construction of appropriate buildings, the procuring all the necessary appointments for the farm, and the making of proper arrangements for the field and the School House, the fund applicable to the benevolent object of the endowment is augmenting by accruing interest—simple and compound.

The uncertainty of the result of the suit at law now pend-

ing at New Orleans, to which the Trustees have referred, is of itself a reason sufficient for the postponement of the purchase of a farm. A decision against the Cities of Baltimore and New Orleans, although not probable, is yet possible. An adverse verdict would materially embarrass the Trustees and render procrastination indispensible.

Preliminary to the inauguration of this Institution of physical labor and intellectual culture, considerations of the character of the soil of the farm, and its locality regarding health and accessibility; the plentiful supply of good water at available points; the large amount that will be required for the construction of suitable buildings, and for putting the entire machinery or features of the Institution into effective operation, suggests that it is better to "make haste slow," than to hurry into any measure that may prove either hazardous or embarrassing.

For information in reference to the property of the Trust at New Orleans, &c., I refer you to the report of the Commission.

CITY JAIL.

The report of the Visitors of the Jail shows that 8,367 persons were committed to prison during the eleven months ending with the 31st of October, 1871, being 153 more than were committed for the twelve months preceding. The daily average of prisoners was 385_{TI} being 37 and a fraction greater than that of the preceding year.

Of the aggregate number committed during the period for which the report is made up, 6,640 were committed on charges of drunkenness, vagrancy, and breaking the peace.

The imprisonment for these minor infractions of the law is only for a short period, and the same parties are frequently committed nine or ten times in each year. These frequent

commitments of the same parties, the Visitors of the Institution attribute to the sin or vice of idleness, and entertaining that theory they suggest that if measures were adopted that would enable them to put the prisoners at some laborious employment, it would be reformatory in its influence upon many, while others, finding that they would be compelled to work within a prison, and not be allowed to eat the bread of idleness, would be induced to abandon their habits of inebriation and idlences, and would work outside of the prison. There is much force in the reasoning of the Visitors of the Jail, upon this subject, as embodied in their report, and the observation of all who have been charged with the management of prison houses has most clearly demonstrated that prison dleness engenders every species or grade of crime because its teaching is to make men loathe employment, and hence to resort to any means other than to labor to procure the necessaries of life. The humanitarians all over the civilized world, that have from the most benevolent considerations made prison reform a study, and almost a vocation, bear testimony to the soundness of the foregoing theory.

The amount expended in supporting the Institution for the l even months ending 31st Oct., and for improvements, was \$47,383–68. Warrants were drawn on the City Register for \$44,287–62 of said sum, and the balance was made up by receipts from other sources.

The ventilation and drainage of the Building have been very materially improved, and therefore disease is less likely to be propagated within its walls. Under the improved ventilation the unhealthy exhalations of large bodies of prisoners are in a great measure neutralized in their effects by a constant supply of pure atmosphere from without.

The Hygcian of the prison, under the rule of its excellent Physician, has been very good. No epidemic fatal in its results has prevailed at any time since the last annual report of the Visitors, and notwithstanding the broken down constitutions of the major part of those who are committed—the result of drunkenness and exposure to the effects of the season—but fourteen have died during the period embraced in the report.

The Visitors express the belief that forty thousand dollars will be sufficient to cover all the expenses of the Institution for the year ending 31st October, 1872.

HEALTH DEPARTMENT.

The gross expenditures of this Department from the 31st of December, 1870 to the 31st of October, 1871, were \$193,-685 52, and were applied as follows:

Street and Garbage account\$	133,209	31		
General Health account	7,091	80		
Nuisance and Sewer account	5,588	20		
Lime and Incidental account	1,168	17		
Baltimore City Fertilizer Co. remov-				
ing night soil	15,000	00		
Marine Hospital expenses	16,352	22		
Salary account	15,275	82		
			\$193,685	
Credit by this sum received for man	ure	• • • •	5,528	11
Net expenses	•••••	••••	\$188,157	41

The Health Officer reports that the City has been exempt from contagious and infectious diseases, and submits his suggestions for preserving the health of the City. His remarks in connection with the inception of Yellow Fever apply to the engendering of almost every malignant epidemic, and merit your deliberate consideration of the means necessary

to the preservation of the health of the City. The causes, he says, are in the "decomposition of animal and vegetable matter in localities where large numbers of people are congregated," and that hence "it is clear that the preventive lies in precluding such decomposition in such localities. To prevent the accumulation is to prevent the decomposition, and therefore, it is necessary to ascertain the material source, manner and places of the accumulation. These consist of meat liquor, dish water, &c., in the slops drained and pumped into the gutters from private and public houses; in the excrement of animals; in the blood and fecal matter from slaughter houses; in the discharge from soap factories, tanneries and other factories; in the drainage from sinks through sewers constructed for the purpose and otherwise; and the excrements passed directly into the harbor through the water closets of vessels entering and lying in the harbor." His recommendations in connection with this important subject of infectious diseases, embraced in his annual report, I commend to your consideration.

To prevent hydrophobia the Board of Health suggests the enactment of an ordinance prohibiting dogs from going at large throughout the entire year.

It has cost the corporation large sums of money every year to avert the evil consequences resulting from the keeping of dogs in the city, and all the money spent and all the ordinances that have been enacted in relation thereto have been of little avail. No one supposes that his or her dog will either run mad, or bite any one but a midnight robber, yet very many adults and children are daily bitten by dogs not rabid, and many have suffered the most excruciating torments, and met the most horrid death from the bite of the animal in its rabid state.

The City paid in the ten months of 1871 the sum of four

thousand one hundred and sixty-eight dollars, for the killing of five thousand five hundred and eighteen dogs, and the removing of seven thousand and sixty-five others that died, and yet, after this apparently incredible number has thus been disposed of, their numbers, from appearances, have not been diminished.

I would recommend the enactment of an ordinance preventing dogs from running at large within the City boundaries at any time under penalties more severe than any that have been heretofore adopted.

MARINE HOSPITAL.

The principal officer of this Department reports that for the ten months ending with 31st of October he boarded 125 steamers, 23 ships, 134 barks, 228 brigs and 527 schooners making in all 1,037 vessels.

The receipts of the Department were for the period \$3,-741 39.

There were received into the hospital481	Patients.
Discharged from hospital163	66
Died at the hospital 54	
Remaining in hospital269	<i></i>

The accommodations in the Hospital are represented to be inadequate to the purposes for which institutions of this character are established, and particularly so in reference to the "Pest" departments.

The Physician recommends that there should be a building for the accommodation of the convalescent Small Pox patients, inasmuch as the confining of them to a room in which the sick cases are treated retards their restoration to a healthy condition, while it would be unsafe to place them in contact with others who may be in any of the rooms of the hospital, and much more unsafe to the community to discharge them from the institution until a sufficient time has elapsed after having been cured.

The Pest hospital is not only dilapidated, but from its construction altogether unsuitable for its purpose, and he recommends that in lieu of said structure, the four rooms in which are under one roof, that four buildings be erected, one of them for white males and another for colored males, and one for white females and the other for colored females.

In view of the importance of this Department in the protecting of the health of the city, and from considerations of human sympathy for those, who from the force of circumstances must be placed in the Marine Hospital, I carnestly commend the suggestions of the Physician to your consideration.

BAY VIEW ASYLUM.

The report of the Trustees of this Institution evidences the faithful and effective management of it by the gentlemen -charged with superintending and directing its affairs.

And the net expenses are shown to be.\$43,953 25 The total number that enjoyed the benefits of the Institution during the period above named was 2,631.

The average number of inmates was $630\frac{4}{5}$. The average in the House in the year 1867 was $689\frac{7}{12}$ —In 1868— $730\frac{1}{12}$ — In 1869— $704\frac{5}{12}$.—In 1870— $657\frac{2}{12}$. This diminution of

36

numbers, while the population has increased in the City, certainly demonstrates that poverty extreme, and destitution have not increased in our midst. It is very questionable if any city in the United States can present a better record of economical management of a great public charity, or one showing less of destitution among its inhabitants.

It is gratifying to humanity to learn from the report of the Visiting Physicians that no malignant epidemic has prevailed in the Asylum during the last ten months, and that the deaths from disease and accidents have been less than usual.

Notwithstanding much of the water supplied by the City Water Works is lifted by the stationary engine at the Institution into two water tanks of large dimensions located on the upper floor of the building, the Trustees complain of its scarcity. An Alms House requires a great quantity of water for its purposes, for reasons that are obvious to any one at all familiar with the management of public institutions of that character.

An increase of water tanks will not give much relief, for the reason that the pressure upon the pipe by which the building is supplied is insufficient to produce the necessary quantity of water at some periods of the year, even if it should all be discharged at the basement of the building. The "Main" pipe to which the one from Bay View is connected, is but six inches in diameter, and the number of taps upon said "main," all of which are for a lower service than Bay View, or in other words for dwellings, breweries, distilleries, &c., that eccupy grounds less elevated than it, so diminishes the pressure upon the pipe leading to the institution that it discharges less water than would one of one-third of its diameter under the proper pressure.

The Hampden Reservoir from which the Asylum is supplied is at least twenty-seven feet greater in its elevation than the upper occupied floor of the building, and if the "mains" that are for the eastern service were of the proper dimensions the water would rise to the altitude of the reservoir. The "main" connecting with the reservoir is thirty inches in diameter, and the pipes along the line are of the diameter of twenty, eighteen, sixteen, twelve, ten and six inches.

There can be no permanent relief to the Institution in the supply until the twelve, ten and six-inch mains shall be displaced by those of sixteen or eighteen inches. Such a change would give an ample supply for Bay View and the balance of the eastern service, and would not very greatly exceed the cost of an independent pipe of six inches diameter from Hampden Reservoir to Bay View. The Water Commission has not been inconsiderate of the necessity of laying much larger pipes for the eastern service, for at points between the ten and the six inch mains 438 feet of 20 inch, 1587 feet of 18 inch, 2075 of 16 inch, and 2283 feet of 12 inch have been put down. The substituting of pipes of 12 inches for those of 6 inches would, doubtless, be of much service in the matter of supply, but an ample quantity can only be secured by displacing all the mains that are less than sixteen inches.

The Trustees have repeatedly called the attention of the Mayor and Council to the wants of the Institution in the foregoing connection, and recently suggested that it should be supplied by a pipe without any openings between the reservoir and the Institution. That would, to be sure, accomplish the desired end, but it would be, of course, no benefit whatever to the eastern section of the City that is rapidly increasing in population, and whose residents are even now complaining of a scarcity of water. In my judgment, it would be a measure of economy to adopt that plan that will relieve the wants of Bay View and the citizens of East Baltimore at one and the same time. I am fully aware of the importance and necessity of supplying this great public charity Iustitution with a plentiful supply of wholesome water, and hence it is, that I invoke your attention to the consideration of the subject.

The Trustees ask for an appropriation of Seventy-five thousand dollars in order to enable them, as they have hitherto done, to purchase the supplies for cash, and to provide for the prompt payment of other expenses, as well as for contingencies that may occur in the administration of the affairs of the Institution.

NEW CITY HALL.

The progress made in the erection of the new City Hall has been as great as the circumstances connected therewith rendered possible.

The r	net sum paid for construction, &c., for the	
last ten	months was\$263,218 0)1

The net sum paid on account of construction, &c., since the commencement of the building is...\$977,427 40

The amount ascertained to be due to con-	
tractors on account of the retention of 10 per	
cent. on their contracts as required by the or-	
dinance of the city is	76,583 16

The above named total is all that has been expended in the construction by all of the Building Committees.

There are however items charged to the building of the City Hall, over which the committee have not had, nor have they now, any control whatever; such as the purchase of the site on which the building is being erected; depreciation on the stock issues for the building of the Hall; and expenses for taking the sense of the citizens on the adoption of the ordinances to create a debt for building purposes, all of which it is supposed will be about two hundred and twentyseven thousand dollars. Add these last named charges to the sum of \$1,054,010 56 and the gross sum charged to New City Hall account will appear as \$1,281,000 56. This will leave of the \$2,000,000 00 appropriated by the city a balance to be applied to construction of \$718,999 44.

The Building Committee of the City Hall, knowing the fallacy of estimates in the cost of buildings of the magnitude of the one under their charge, had not in their former reports the temerity to venture upon the field of calculation in that connection. Very many assumed, from their knowledge of the cost of similar structures in other cities, that its cost would not be much less than four millions of dollars. The Committee in their report to the Council, of the date of March 4, 1870, said that "what the ultimate cost of constructing the building will be, the undersigned cannot now, with any measure of accuracy, determine. While they are quite sure it will not reach the figures which many have conjectured, it will doubtless exceed two millions of dollars." The same caution in reference to the cost of the building, was exhibited in their report the following year. As the construction has progressed much since their last report, the architect has ventured to make an estimate for the entire cost of the same, which he places at \$2,347,000 00. This estimate embraces the cost of the site, the depreciation of the stock issues out of the sales of which it must be built. &c.

The committee have at their command more money than will be expended in the year 1872, yet not enough, it is supposed, for the year 1873, at the close of which it is confidently believed the Hall will be completed.

Inasmuch therefore as the State Legislature after its adjournment in 1872, will not convene again, in regular session at least, until January, 1874, it will be necessary, if it be the purpose of the City to complete the building according to the drawings and specifications of the architect, to secure the passage of an enabling act that will authorize the City to use its credit for such amount as it may require for the purpose indicated.

The City appropriated \$2,000,000 in city bonds for the erection of the building. The architect estimates that a further appropriation of \$347,000 will complete the building, pay for the site, pay the depreciation on the city stock issued and to be issued, and all other expenses. The Building Committee believe it will be advisable to make an appropripriation of not less than five hundred thousand dollars.

PARKS.

The gross expenses of Druid Hill Park from 1st
January, 1871, to the close of the fiscal year, in-
cluding interest on stock issue were\$101,269 46
Expenses of Patterson Park, including purchase
of additional land 17,589 26
Aggregate expenditures
The receipts were as follows :
From City Passenger R. Way Company\$130,306 52

Aggregate
Deduct expenditures
And a balance is shown to the credit of
Park fund for 1871 of 21,582 08
Balance to the credit of Park fund for 1870 21,045 34
Gross amount to credit of fund\$ 42,627 42
Visitors to Druid Hill Park for ten months, viz:
Pedestrians
Carriages
Horsemen 15,575

Many improvements have, during the year, been made in Druid Hill and Patterson Parks.

A resolution was adopted at the last session of the City Council authorizing the Commission to enlarge Battery Square within certain bounds indicated in the plat referred to, and extending southerly to the Patapsco River, upon the condition that the proposed addition was not to exceed the cost of one hundred thousand dollars. The purchase however could not be made, as the proprietors of the land demanded three hundred and twenty-five thousand dollars for it, exclusive of an avenue of one hundred feet in width by which the Park must be surrounded. The subject matter is referred to in the Appendix to the report of the Park Commissioners.

The very able report of the Park Commission furnishes information which materially interests all that appreciate the great benefits that result from providing suitable grounds of sufficient size to which the citizens may resort for healthful exercise and recreation. It is to be regretted that when large quantities of land could have been obtained within the boundaries of the city at low rates, the city did not avail itself of such opportunities to acquire the same for Park purposes. Such places as "The Commons" at Boston, and the numerous beautiful squares of Philadelphia, all located in the densely populated parts of those cities, evidence the sagacity and wisdom of the men that many years since conducted their municipal affairs.

The men of Baltimore turned their attention to the erection of monuments commemorative of inspired patriotism, and adorning fountains, little dreaming that the march of improvement would, in years so few, obliterate almost every trace of Howard Park with its thousand trees, and upon its once beautifully shaded domain, erect costly structures.

Baltimore is destined to be a large and thriving mart.

Her geographical bounds will, in her expanding greatness, be enlarged. Druid Hill, which but a few years since was regarded as quite distant from city population, is even now flanked with dwellings, and in the lapse of time will be in the midst of population. Let the past in its lessons teach the living of to-day, and ere it be too late let them avail themselves of opportunities for increasing land possessions for the enlargement of the Parks. These "palaces of nature" are the country seats and the "watering places" of the poor, where they can rest in the evening for the toil of the morrow, and where their children can become invigorated by physical exercises and the inhalations of a pure atmosphere.

INTERNAL IMPROVEMENTS.

The annual report of the Baltimore & Ohio Rail Road Company for the fiscal year ending with the 30th of September, 1871, presents the favorable condition of that great line of improvement.

The revenue of the road, including its branches, was for the year \$12,557,529 42, being an increase of revenue over the preceding year of \$1,717,158 94.

The gross earnings of the main stem, including the Winchester & Potomac, Winchester & Strasburg, and Washington County Branches, were \$9,913,390 49, while the working expenses were but \$5,906,887 68, showing that the former exceeded the latter \$4,006,502 81.

The increase in the transportation of merchandise is equally marked, is alike demonstrative of the capacity and energy of its President and Directors, and indicates the agency of that great line of improvement in promoting the commercial and manufacturing prosperity of Baltimore.

There were brought over the road to Baltimore during the year 1,007,649 barrels of flour, being 137,259 more than in the year 1870. 1,591,602 tons of coal, independent of that used by the Company, were transported over the road as against 1,219,638 tons in the fiscal year ending the 30th of September, 1870. The transportation of other merchandise, east and west, has been correspondingly increased.

The superior quality of the semi-bituminous coals of the Alleghany region has largely increased the demand for the article in the eastern cities, and the Company has been adding to its road equipments to meet the demands for transportation.

When this road, by its existing junction with the Pittsburg and Connellsville road, shall have made its connection with Chicago and the North-west, independent of the Pittsburg, Fort Wayne and Chicago Rail Road, it will still more largely contribute to increase the trade of our city with the flourishing and extensive country that it will penetrate.

PITTSBURG AND CONNELLSVILLE RAIL ROAD.

So many years have elapsed since the city of Baltimore became interested as a creditor in the Pittsburg & Connellsville Rail Road, and so little has been known by our people in relation to it until it has recently assumed an importance, and awakened public interest in the success of the enterprise, that it may not be considered out of place to refer briefly to its history.

The route of this road westward from Cumberland was that originally preferred for the extension of the Baltimore & Ohio Road to the Ohio River, but the right of way through Pennsylvania expiring in 1843, that Company was thereafter restricted to a route through Virginia. The people of Pittsburg, however, being anxious for a direct connection with Baltimore, succeeded, after a long contest with the Philadelphia influence in their own Legislature in opening the

44

way again through their own State under the charter of the Connellsville Company.

Upon their appealing to Baltimore to assist in the construction of the road (of about one hundred and fifty miles from Pittsburg to Cumberland) the City Council of Baltimore in 1853 agreed to guarantee a million of their bonds, and subsequently, in 1856, to give her own bonds of the same amount in exchange for those she had guaranteed, her endorsement of which had been coupled with conditions which made it unavailable for realizing the money. With the funds derived from this source, and from the stock subscriptions of the city of Pittsburg and the county of Alleghany, Pennsylvania, and from towns and individuals along the line, the road was opened between Connellsville and a point on the Pennsylvania Rail Road near Pittsburg, in 1857, and the great tunnel towards the Cumberland end of the line was carried forward until the financial crisis of that year and the exhaustion of the means of the Company compelled it to suspend the work. But for this disastrous event, the bonds of the Company might have enabled it to complete the road; in fact, they were so far used as to extend the line to Pittsburg in 1861, Baltimore having for the purpose of assisting in this object made a partial release of her prior mortgage.

The road having thus a continuous and independent line between Connellsville and Pittsburg (a branch to Uniontown having also been built) began to develope a business, and earn an income which promised well for the future—although unable to meet its interest upon its funded debt. In 1864 the monetary affairs of the Company had so far improved that a fresh start was decided upon, and the necessary financial steps were being taken when the Pennsylvania Rail Road Company induced the Pennsylvania Legislature to attempt a partial repeal of the charter, which it required four years of litigation to defeat, and it was not until 1868 that freedom for a further forward movement was obtained, and resulted in the opening of the whole road between Pittsburg and Cumberland in April, 1871.

During the eighteen years since Baltimore first held out the helping hand to this enterprise, she has pursued a liberal policy towards it, patiently waiting for the development of its results, and the enjoyment of its fruits. In doing this, however, she has been obliged to bear a burthen from which there is now a fair prospect of relief not far distant. The debt of the Company to her has gone on increasing annually in the shape of interest until it now amounts to \$2,166,468 22, the interest having, in virtue of the ordinances of the city been funded with the principal until the 1st of January, 1872. After said date the capitalization of the accumulated interest due to Baltimore will cease, and on the 1st of July, 1872, the Company will be required to pay, unlsss further indulged by the city, six months interest upon the whole debt of \$2,-166,468 22.

The total stock, funded and floating debt of	
the Company is about\$1	0,800,000 00
Its gross earnings for the year ending with	~
the 31st of October, 1871, were	964,989 13
Its working expenses were	747,632 72
Excess of receipts	\$217,356 41

This work of improvement, from its beginning, has struggled against antagonism and untoward circumstances, but it may now be hoped, that from the character of the road and the position of its termini, the best results may be attained. The country through which it passes abounds in coal, iron ore, timber and agricultural productions, to bring which to the main line, no less than six branch roads have been already built or are under construction.

46

A judicious management of its affairs may yield the most satisfactory results to all interested in it.

THE UNION RAIL ROAD COMPANY.

The Union Rail Road Company was chartered in 1866. In 1867 the city ordinance No. 41, authorized the indorsement of the bonds of the Company to the extent of five hundred thousand dollars, and the Company availed itself of the Act to the amount of one hundred and seventeen thousand dollars prior to the suspension of its work in 1869. In 1870 its charter was amended, and the line of its projected road was divided between the Western Maryland Road from the north-western boundary of the city to Owings' Mills, and the Corporators of the Union Rail Road of 1870 from the north-western boundary of the city to tide water at Canton.

The Company then under its amended charter attempted to federate the several rail road companies, but failing in that measure the Canton Company subscribed for the whole stock not taken or held on to by the subscribers of 1866. Since November, 1870, the work has been actively in progress, and now presents a condition of commendable forwardness that leaves no doubt of its completion from Charles street bridge to tide water within the period undertaken by the contractors to finish it, that is the 1st of January, 1873.

The present Company has not availed itself of the ordinance of the city of 1870, known as the substitute ordinance, in so far as to require the endorsement of its bonds by the city, but awaits the finishing of the communication from Charles street bridge to tide water to demonstrate the necessity of proceeding westward.

The endorsement by the city of \$117,000 of the bonds of the Union Company of 1866 remains a first mortgage on the Company of 1870, the interest upon which is now regularly paid by it.

MAYOR'S MESSAGE.

The road will doubtless prove a work that will materially contribute to the prosperity of the city.

THE VALLEY RAIL ROAD IN VIRGINIA.

The ordinance of the city, of September 14th, 1869, authorized a subscription of one million dollars to the capital stock of said Company upon certain conditions named in the ordinance, and the Commissioners of Finance, acting for the city of Baltimore, being satisfied that the Company had complied with said conditions, the subscription was formally made on the 31st of October, 1871, as shown by their report.

The charter authorizes the construction of a rail road from Harrisburg, in the County of Rockingham, to a point at or near Salem, in the County of Roanoke, a distance of one hundred and thirteen miles, through the Counties of Augusta, Rockbridge and Bottetourt. The road from Harper's Ferry to Harrisburg being already completed, the construction of the Valley Road to a point on the Virginia & Tennessee Rail Road will connect Baltimore, by the most direct and favorable route, with the cotton and sugar growing States, and will it is believed, materially aid in securing an important share of the traffic of those sections, in addition to that to be obtained by a connection with the most fertile regions of Virginia, North Carolina and Tennessee, via Staunton and Salem, as well as via Lynchburg. It has also other important connections.

The total of stock subscriptions amounts to \$3,200,000, including the subscriptions of the city of Baltimore and of the Baltimore & Ohio Rail Road Company for one million dollars each. Twenty-six sections of the line from Harrisonburg to Staunton have, I have been informed, been advertised for contract, with the purpose of completing as soon as possible that section of the road. The large interest which the Baltimore & Ohio Rail Road Company has taken in this projected improvement, is calculated to inspire confidence in the completion of the work and in its importance to the trade of the city.

WESTERN MARYLAND RAIL ROAD.

My recent communication to your honorable body in reference to the condition of this work of improvement and that of the President and Directors of the Company in relation thereto, render it, in my judgment, unnecessary on my part to say anything further, at this time, in that connection.

JONES' FALLS.

The subject of the improvement of this water course has occupied so much of public attention since the disastrous flood of 1868, and so much has been spread upon paper in that connection by distinguished engineers, that it is with much reluctance that I venture upon a very brief examination of some of the material points in the matter, and which I do only because the public seem to expect that I should say something in reference thereto.

In the agitation of the matter, no member of a former Council since the occurrence of 1868, or no private citizen, to my knowledge, has publicly advocated any theory for the improvement of the Falls that would probably avert disasters likely to occur from ordinary flools, by removing the sediment which materially contributes to diminish the capacity of the bed of the Falls; by raising and strengthening the present walls; and by constructing at the crossings of the stream, bridges that will not obstruct the free flow of water at times of flood. Hence I conclude that no measure will receive the public sanction that does not provide against a rise of water equal to, if not greater, than that of 1868. From the latter standpoint, therefore, do I speak.

Plans have been suggested which all agree will, if carried out, avert disasters by flood, but they have all, according to appearances, been condemned by public sentiment, because of the cost, and as some think, the extravagance involved in the carrying of them out.

After reviewing the several reports of the eminent engineers to which the matter of improvement has from time to time been referred, I have come to the conclusion that so far as the alignment of the stream is concerned, that it should conform as closely to the present bed of the Falls as is consistent with a proper regard for curvature and removal of other obstructions to a free flow of water. This alignment I regard as a most important feature, because its adoption is very material in the matter of economy.

In that view of the matter I am supported by Messrs. Chesborough & Hughes and Messrs. Craighill & Kneas, in their very able reports to the Council on the subject.

The former in their fourth proposition—page 124 of their report—say "that the least possible departure from the present channel, consistent with probable future improvements of the city, that will answer the required condition, and at the least cost, should be adopted," and the latter have said—" we see no sufficient reason for moving the stream so far from its present position as required by the proposed straight line channel, or for moving it at all, except to diminish the curvature in some places where it is so considerable as to offer obstructions to the free flow of the water." Messrs. Latrobe, Trimble and Tegmyer, in connection with this curved line theory, as laid down on their maps, and which is almost identical with the line laid down by Messrs. Craighill & Kneas, in comparing it with the straight line, say that one "is more curved than the other, but the curves are so moderate as but slightly to increase the resistance to the free passage of the water, and the locations will be alike as to width and depth of water way, space and elevation of bridges, facilities of drainage of adjacent low grounds, and in all other respects, while much less property will have to be taken on this line," and they might have added that the property to be taken is much less valuable than that lying on the proposed straight line.

All of these gentlemen agree upon one very material point connected with the subject—viz: the course the new channel should take to prevent the overflow of the Falls to the detriment of the lives and the property of our citizens at the *least possible cost*, without regard to embellishment.

The curved line- so called—seems to fit the ground and to conform more nearly to the channel nature designed than the straight one, and can with slight adjustment be made to follow the west line of Holliday street some distance below Centre street, and the north line of Harrison street from Gay to Fayette. These points could then be connected—viz : from Gay to Holliday street by following the west line of the Falls a distance of about sixteen hundred feet, and make by the manner of cutting almost a continuous avenue on the west margin from Fayette to Monument street.

It certainly must be patent to all that the line which closest follows the old channel will be less expensive to construct in the matters of cutting through the higher grounds and the grading up of lower, and at the same time will interfere with less property necessarily to be condemned, than for an entire new channel, as contemplated by the straight line theory.

These considerations, sustained as they are by the distinguished engineers to whom the matter was referred, induced me to favor the channel or line, with slight alterations, that can be made advantageously, as laid down in the map submitted by Messrs. Craighill and Kneas. While, however, I agree with those gentlemen in the matter of alignment, I do not accept other theories embraced in their report. I consider the dam-if it may be so called-at Baltimore street, and the paving of the bed of the Falls from thence to Eager street, as recommended by them, as not at all necessary. In order to construct the dam, which of course is to be the head of navigation, it will be necessary to raise the bed of the Falls at this point-about four feet-to the level of mid-tide, and to continue this filling or raising up to a point between Monument and Madison streets. This raising of the bed of the Falls would necessarily involve the raising of the side walls also, and therefore interfere materially with the grades of three of our principal streets where they cross the Falls, viz: Baltimore, Favette and Gav streets, ranging from two to four and a half feet. These additional elevations, added to their present grades, in approaching the Falls from the west, would render them quite steep.

Besides, the paving of the bed of the Falls to Baltimore street, and the raising of it at that point would most effectually exclude the use of dredging machines north of said street, and compel a resort to the expensive process of the hand shovel for removing the sediment that will accumulate in the bed of the stream. The paving of the bed down to the tide point would, I think, be an improvement—say to Bath or Hillen street. Neither do I perceive the utility in extending, the head of navigation above Pratt street, unless it be desirable to increase the nuisance in the heart of the city, of which there are already so many complaints in regard to the "Basin."

Nor do I perceive any necessity, at the present in particular, for extending the avenues on either side of the Falls above Pratt or Lombard streets. Should necessity hereafter suggest an extension—which I doubt—they can be opened as are other new highways, under the general ordinance of the city. These avenues, as originally suggested, are estimated by one of the engineers to cost eight hundred thousand dollars.

While I believe it to be the duty of the city to adopt such plan as will protect the citizens residing or owning property in the flooded district, from loss of life or property by the overflowing of the Falls, I think it should do so at the least possible cost.

These are some of my views upon the subject. The matter is too prolific of details for this communication. Much might be said in reference to the width of the channel, the construction of bridges and sewerage, &c., but believing that the matter will by you be placed in the hands of those whose judgment and integrity will guarantee a faithful and skillful performance of the duty assigned them, I submit it to your consideration.

CONCLUSION.

The reports of the respective Departments of the City Government that accompany this annual communication will furnish information that will doubtless constitute the basis of much of your legislation. To these I invite your attention.

It will be my pleasure to co operate with you in the adopttion of measures that will advance the welfare of our people, strengthen their attachment to the municipal government and inspire confidence in and respect for those who are charged with the administration of its affairs. To deserve that respect and confidence the single purpose of the public good must guide and control our actions respectively, and while a parsimonious economy should not tempt us to withhold our support from measures that the enterprise of our eitizens and the progress of the age suggest, a regard for the best interests of the city should at the same time admonish us of the necessity of adopting prudence and economy in legislation, and of laying as lightly as may be compatible with the ends of government, the hands of the tax gatherer upon the shoulders of a noble people. This done, industry in its varied departments will ply its work with elastic vigor, and enterprise swell the tide of a common prosperity.

I have the honor to be,

With the highest regard,

Your obcdient servant,

JOSHUA VANSANT, Mayor.

Register of the City.

REGISTER'S STATEMENT.

REGISTER'S OFFICE—CITY HALL, Baltimore, December 31, 1871.

To the Honorable the Members of the First and Second Branches of the City Council.

GENTLEMEN :

As the fiscal year, by ordinance No. 56, of 1871, ends October 31st, the Register, in obedience to the requirements of Articles 6 and 8 of Baltimore City Code, submits herewith his "account of all monies received and expended by him," from January 1st, 1871, to October 31st, 1871, together with his "statement of the estimated receipts and payments" for the present fiscal year, and " report of existing claims" against the corporation, as of Oct. 31st, 1871.

The total receipts were \$5,509,600 52, derived from the following sources:

From taxes, levy 1861.....\$1,837,094 27

	" previous levies 747,325 82 \$	2,584,420	09

62

The appropriations in levy of 1871, amounted to \$4,810,-950 44, and the appropriations made since the levy, to \$326,948 97, together making the total of appropriations \$5,137,899 41, while the receipts from taxes and other sources of revenue were \$3,847,727 94. If to the latter sum we add the estimated receipts from taxes and other sources of revenue for November and December, \$622,589, it leaves \$667,582 47 as the deficiency receipts to expenditures Dec. 31st, 1871.

As shown by statement marked B, the total requirements of the city for the fiscal year ending October 31st, 1872, amount to the sum of \$4,714,869 86, from which deduct \$1,778,170 04, the receipts from taxes in arrear and other sources of revenue as itemized in statement C, will leave \$2,936,699 82 as the amount to be raised by taxation for the current fiscal year.

The assurance given last year by the gentlemen comprising the Water Board, that the revenue from that department would be ample to pay the interest on the water loan, amounting to \$300,000 per annum, I am happy to state, has been complied with, as evidenced by the prompt payment of the interest which fell due last May, and the balance to their credit October 31st being more than sufficient to meet that falling due November 1st, 1871.

The stock debt of the city has been increased by the sale of City Hall 1900 stock, (authorized by ordinance No.37, approved April 15th, 1870, and ratified by a majority of the legal votes cast at the election held April 21st, 1870,) amounting to \$218,400, for which the sum of \$214,367 31 was realized, and an issue and sale of \$74,000 of the funding loan of 900, being a balance unissued from the previous year.

The guarantee debt has been increased \$650,000 by endorsement of the Western Maryland Rail Road bonds to that amount, and decreased \$23,500 by purchase and cancellation of North Western Virginia Rail Road bonds. It will be perceived, by reference to statement D, that the sum of \$18,586 05 was expended during the fiscal year, on the Jones' Falls improvement; during the previous year, 1870, the expenditures for the same were \$16,007 71, making the total \$34,593 76. This is in the nature of a claim to be 1870, the expenditures for the some were \$16,007 71 making reimbursed to the treasury by issue of stock.

Statement "A" is an exhibit of the stock and guaranteed debt.

- "" "B" is a report of existing claims against the corporation and estimate of expenses for 1872.
- "C" is an estimate of receipts other than taxes.
- "D" is a summary of receipts and disbursements for 10 months of the fiscal year ending October 31st, 1871.
- "E" show condition of Western Maryland R. R. sinking fund.
- " "F" shows condition of five million loan sinking fund.

You are respectfully referred to the report of the Commissioners of Finance for condition of general and other sinking funds of the corporation.

Respectfully submitted,

JOHN A. ROBB,

Register of the City.

PORT WARDEN'S OFFICE—CITY YARD, Baltimore, November 23d, 1871.

JOHN A. ROBB, ESQ., City Register:

Dear Sir: -I enclose herewith my estimate of the amount required for this department for the year commencing Nov. 1st, 1871:

Harbor and back basin	\$70,000
Sea wall	10,000
Repairing wharves	5,000
Repairing machinery	
Cleaning Harford run	
	\$92,750

Very respectfully,

JOHN H. COOPER, Port Warden.

OFFICE BOARD OF FIRE COMMISSIONERS, Baltimore, Nov. 221, 1871.

To the Honorable the

Mayor and City Council of Baltimore :

GENTLEMEN :—The undersigned, the Board of Fire Commissioners of the City of Baltimore, respectfully beg leave to submit the estimates for the working expenses of their department for the year 1872, and respectfully call the attention of your honorable body to the communication of the Chief Engineer, herewith enclosed, and will be pleased to meet the Committee on Ways and Means, at any time suitable to them, to afford any information or explanation that may be desired.

The increase asked for in the amount of salaries is caused by the necessity to provide for two new companies, Engine Co. No 9, to be placed in service January 1st, 1872, and Engine Co. No. 10, on July 1st, same year.

The amount asked for apparatus, repairs to apparatus, and for hose, horses, harness and furniture, is based upon the estimates of the Chief Engineer, and it will be seen that in his judgment the entire amount of those estimates will be imperatively necessary. This amount includes the expenditures to be made for Engine Cos. Nos. 9 and 10, from the unexpended amount of appropriation made for that purpose, and not yet drawn from the Register.

> JOHN S. HOGG, President. EDWIN L. JONES, GEO. F. THOMPSON, THOS. W. CAMPBELL, JAMES LOGAN, JR.

GEO. A. CAMPBELL, Sec'ry.

REPORT OF THE

The amount of appropriation required for the expenses of the Baltimore City Fire Department for the year 1872, is \$149,894, to be expended as follows, viz:

Salaries, (including No. 9 and No. 10 Engine Cos.)	\$86,494
Harness and repairs	2,000
Washing	1,000
Horse'shoeing	900
Apparatus repairs	8,000
Fuel	1,800
Office expenses	600
Advertising	200
Ground rent	1,200
Furniture	3,000
Hose	8,000
Horses	5,000
Oils, grease, &c	800
Apparatus	7,250
Medicines	400
Insurance	150
Stationery and printing	700
Gas	1,800
Feed	7,000
Water rent	650
Miscellaneous	2,250

\$139,194

To which must be added balance of appropriation	
to pay expenses for 1871, to be taken from the	,
levy of 1872, and not yet drawn from the Reg-	
ister	10,700
	\$149,894

Office of Chief Engineer B. C. F. D. November 20th, 1871.

JOHN S. HOGG, Esq.,

President Board of Fire Commissioners:

Sir :- As the time is at hand when your estimate for the expenses of the present year will be required by the Register, I beg leave to suggest that the most liberal allowance consistent with the economical working of this department be made therein. The recent calamitous disaster at Chicago has already prompted the consideration of an increase in the effective force of the Fire Departments of other large cities, and although not prepared at this time to suggest a similar increase here, I think it my duty to advise that no doubtful idea of economy should prevent the provision of ample means to keep our present unprecedentedly small department up to the highest degree of efficiency. The appropriation for the last year for apparatus repairs, hose and horses, proved inadequate, for the same reasons which will require a largely increased amount for 1872. The rapid increase in buildings, and the extent of territory covered therewith, has and will continue to greatly augment the wear and tear upon apparatus, hose and horses. The working districts assigned the companies now in service, are so much larger than formerly, that it will be seen that the working expenses must be proportionably greater. In the first three years of the existence of this department, the apparatus and hose was new, and the horses young, and, as a consequence, the expense of repairs upon the one, and cost of renewing the others, could be measurably saved.

But it must be borne in mind that we have some engines and horses yet in the service of this department, which were placed therein during the first year of its establishment, 1859, and as such material grows older, it will require either a larger amount of repairing or entire replacement. The necessity for a greater quantity of hose has long been felt, and in view of the scarcity of fire plugs in the newly erected portions of the city, and the consequent distance to which the water must be forced, and the importance of providing each engine company with reserve hose in case of emergency, I am satisfied that not less than 6000 feet additional will be required. Fifteen more horses will also be necessary during the coming year, and not less than \$8,000 for apparatus repairs. These estimates are based upon the result of my observation of the working of the department for 1871, and cannot, in my judgment, be safely reduced.

H. SPILMAN, Chief Engineer.

BALTIMORE, November 27th, 1871.

To the Honorable the Mayor and City Council of Baltimore:

GENTLEMEN :-- Since submitting our estimate of expenses for 1872, we find it will become necessary to purchase the property in rear of No. 6 Engine Company's house, in North Gay street, now rented by the department for a stable, at an annual rental of four hundred and sixteen dollars; as in case of the sale of the same by the heirs, who have determined thereon, that company would have to be located elsewhere, at a greatly increased expense. The sum asked for the property is sixty-five hundred dollars, in fee, (\$6,500.)

Respectfully,

JOHN S. HOGG, President. EDWIN L. JONES, THOS. W. CAMPBELL, GEO. F. THOMPSON, JAS. LOGAN, JR., Fire Commissioners.

GEO. A. CAMPBELL, Sec'ry.

Decrease			\$84,197	85

The only tax levied during the present year for this purpose, is the one referred to above as imposed by Ordinance No. 139, for increase of the fund for redemption of City Hall stock, in accordance with a provision of the law authorizing the creation of that debt.

The customary levy of three and one-half cents for redemption of water stock was not imposed.

Your attention is respectfully invited to the brief statement following:

The water loan originated in an Act of the General Assembly, passed January, 1858, authorizing the issue of two millions, and the authority has since been extended, and the amount increased to five millions of dollars, now issued. It is "redeemable at the pleasure of the Mayor and City Council, on and after the first day of May, 1875."

In each Act of the General Assembly authority was given to provide by ordinance for redemption of the stock. Many

of the ordinances authorizing issues did make provision for the creation of a redemption fund, by ordering payments to the Commissioners of Finance of money received for premium on bonds, and the surplus of receipts, after payment of interest and expenses ; and for its increase by levies of taxes. The levies, apparently contemplated by successive Councils, amounted in the aggregate to twelve cents on every hundred dollars of assessable property, and if they had been levied and collected, as contemplated, would have produced a large fund. It is to be presumed that this was not done, as the two funds, known as Water, Nos. 1 and 2, are shown in this report to amount only to \$368,297 15. It is thus seen that upon the eve of the designated maturity of the loan of five millions, a portion of which has existed for a period of nearly twenty years, the fund particularly provided for its redemption is less than seven and one-half per centum of the amount to be redeemed. While it is true that by the terms of the loan, the city has the option of extending the period of payment, it is not therefore any the less obligatory or prudent to provide for payment at some date not very remote from the one named in the obligation, unless it shall be claimed that the pleasure provision determines that the loan is practically to be irredeemable, or of a very protracted maturity. Such a view, it is presumed, will not be acceptable to the creditor, nor is it desirable that it be adopted by the debtor. It is therefore most respectfully submitted that considerations of good faith and of sound policy alike require that more effective provision be made for payment; and it is suggested as desirable that the customary tax be levied for the present and succeeding years, or that some other arrangement looking to the same result be made. In this connection it may not be improper to state that this Board has a conviction that if it be not absolutely necessary, it is nevertheless expedient, and most desirable in every respect, that contributions be

made annually to the funds provided for the ultimate payment of the public debt of the corporation, and that the amount of those contributions should be in proportion to the amount of the debt and the period of its maturity.

THE AMOUNT AND CONDITION OF THE SINKING FUNDS.

Statement No. 3 exhibits in detail the amount and condition of the investments of thirteen sinking funds, as shown by the books of the Commissioners of Finance.

\$4,477,364 79

This statement does not embrace any items connected with current receipts and expenditures. It refers only to the stock and bond liabilities of the corporation, and to its fixed investments.

CONSOLIDATION OF STOCKS.

Provision having been made by Ordinance No. 92 of 1864, for the conversion of the old 5 per cents. of 1860, into the consolidated 5 per cents. of 1885, and by Ordinance No. 42 of 1867, for consolidation of the Jail Stock of 1873, into the 6 per cents. of July, 1890, and those provisions being acquiesced in by nearly all the holders of those issues, it is not regarded necessary to advise any action with reference thereto.

NORTH-WESTERN VIRGINIA RAILROAD COMPANY.

Your attention is directed to the fact of maturity of the guaranteed bonds of the North-Western Virginia Railroad Company, on January 1st, 1873.

The account stands thus :			
Amount of bonds uncancelled	•••••	• • • •	\$850,500 00
Less amount of bonds held in th	ne fund	••••	126,000 00
Balance to be redeemed January	y 1st, 1873.		\$724,500 00
For redemption there is held i	in the fund	the	
stocks following, viz:			
Consolidated loan of 1890	\$647,910	20	
City Hall loan of 1900	79,000	00	
York and Cumberland guaran-			
teed bonds	11,000	00	
Overdue coupons	321	75	
-	\$738,231	95	
Deduct amount due to other			
sinking funds	11, 115	30	
-			\$727,116 65

Unless the amounts offered for sale during the coming year be very large, which is not probable, it will be necessary to realize from these stocks, prior to January 1st, 1873, the money requisite for redemption of the bonds then due and payable. It is therefore respectfully suggested that authority be given to exchange stocks held in the fund, for bonds which may be presented for the purpose during the year, and to sell so much thereof as may be requisite to redeem at maturity the remainder outstanding. Although the fund has been specially provided, and is held for the purpose of redemption, the fact that it is an invested fund, and must be realized in money, makes it proper that such authority be conferred as will enable that to be accomplished before maturity, so that the holders of bonds be not subjected to inconvenience.

CONSOLIDATION OF FUNDS.

Experience has shown that there are practical inconveniences, without corresponding benefits, caused by the distribution of funds, devoted to a single purpose, into so many parts; and therefore it is recommended that authority be given to lessen the number, in such manner as will not, in any way, lessen the effectiveness of operation. It is necessary, for obvious reasons, that the distinctive character of some of the funds be maintained; but there are those which can and should be merged into that one called "general," because intended to be applied to the redemption of any portion of the public debt, not specially provided for.

THE STATE TAX ON CITY STOCK.

In presenting this report, the Commissioners of Finance have pleasure in noting the evidence furnished by the daily market quotations, of a better appreciation of the value and security of the stock issues of the city, notwithstanding that they are still below what is regarded as the true standard of value. Except in periods of extraordinary financial depression, city six per cents. should, in view of the security they furnish, command par and accrued interest, and that they do not, is to be ascribed alone to the influence of the tax imposed upon them by the State. In the belief that you will not object to a due consideration of any matter affecting the public interest and credit, nor regard it as beyond the limit of duty intended to be imposed upon this Board, it is determined as not improper to invite your attention to this subject. The tax (nineteen and one-fourth cents on each one hundred dollars) is equal to six per cent. upon three dollars and twentyone cents, and lessens the real value of the city issue to the investor by so much. The State Defence Loan, a six per cent., free from State, county and municipal taxes, is as good

an investment at par as the city issue at $96\frac{3}{4}$. To this manifest difference may be added that which results from the inconvenience of calculating the amount to be received at the time when the tax is to be deducted and withheld by the city, and from an unwillingness to accept less than six per cent. upon an investment. These together affect the general estimate of value to the extent of causing a difference in price, at least, of five per cent, as is determined by the market quotations. In the negotiation of a loan, whether its proceeds be applicable to a new public improvement, or to retiring a matured obligation, (processes among the probable duties of the future,) the city will be obliged to submit to a deduction from the true standard of value, whatever it may be at the time, by an amount greater than the principle represented by the tax, computing at six per cent. per annum.

If these conclusions are correct, the loss to the city in the negotiation of each million of dollars, in consequence of the tax, will be fifty thousand dollars, while the gain to the State will be, not six per cent. upon that amount, but nineteen hundred and twenty-five dollars per annum. As thus presented, it will be observed, the question becomes practical. The city really bears the burthen of the tax : that being determined, it will be admitted that it should be removed. The approaching session of the General Assembly affords an opportunity to seek relief, and an application, if made and supported by a proper representation of the injurious effects resulting to the public interest, it is not doubted will receive favorable consideration.

COMMISSIONERS OF FINANCE.

THE WESTERN MARYLAND RAILROAD COMPANY.

In its last annual report this Board submitted a brief statement of its action with reference to deliveries of endorsed bonds of this company, as authorized and required by Ordinance No. 11 of 1870. It is now regarded expedient to repeat that statement, and to present copies of papers then furnished, and to add others among the records of this Board.

It will be observed that the estimates of the Finance Committee of the company are consecutive, and the accounts continuous. They are therefore furnished entire, and will be found in an appendix to this report, arranged in the order of presentation and dates.

At a meeting of the Board, October 11th, 1870, the following papers were submitted for consideration and action :

BALTIMORE, September 16, 1870.

To the Honorable

the Mayor and Finance Commissioners of Baltimore : GENTLEMEN :

In pursuance of a resolution of the Board of the Western Maryland Railroad, as Finance Committee of said company, we are directed by said Board, to base upon accompanying sworn statement, an application for the bonds necessary to provide for the construction of the road.

Referring you to the same,

We remain, very respectfully,

Your obedient servants,

(Signed)	C. MORTON STEWART,
	J. K. LONGWELL,
ner E	M. WEISENFELD,

Messrs. Charles Morton Stewart, J. K. Longwell, and Moses Weisenfeld, Finance Committee of the Western Maryland Railroad:

GENTLEMEN :

I respectfully submit following statement in compliance with resolution presented by your Chairman, and unanimously adopted by your Board at a special meeting held September 13th, 1870, as follows:

Resolved, That the Finance Committee be instructed to present to the Finance Commissioners a sworn statement of the officers of the company, and to base upon such statement an application for the bonds requisite to continue the construction of the road.

STATEMENT.

That in compliance with Ordinance No. 11, Section 3, approved January 26, 1870, the General Assembly of Maryland passed the Act, chapter 110, March 23, 1870, authorizing the said endorsement. That the ordinance has been "submitted to the legal voters of the city of Baltimore," and his Honor the Mayor, has certified that "a majority of the votes cast at the said election were in favor of the said ordinance." That the said Western Maryland Railroad Company has delivered to the Register of the City a deed of mortgage duly executed and acknowledged, and in such form, and with such covenants and conditions "as have been approved by the City Counsellor."

That in compliance with Ordinance No. 11, Section 4, approved January 26th, 1870, the General Assembly of Maryland passed, chapter 110, March 23, 1870, amending the charter of the said Western Maryland Railroad Company by giving to the Mayor and City Council of Baltimore an additional number of directors.

That at a general meeting of the stockholders of the Western Maryland Railroad Company, held in the city of Baltimore, April 18, 1870, the said amendment to the charter of the company was, by resolution, unanimously accepted.

That in compliance with Ordinance No. 11, Section 5, the following resolution was submitted by the Committee on Construction, and unanimously adopted at a regular meeting of the company, held August 2d, 1870.

Resolved, That Charles Morton Stewart, John K. Longwell and Moses Weisenfeld, who now constitute the Finance Committee of this company, or a majority of them, be authorized and empowered to receive from time to time the bonds, so to be endorsed by the city of Baltimore, and dispose of the same, the proceeds thereof to disburse, under the provisions of the ordinance of the Mayor and City Council of Baltimore, No. 11, approved January 26, 1870.

That in compliance with Ordinance No. 11, Section 8, at a regular meeting of the company held May 31st, 1870, they adopted the location submitted by their engineer, of "a new, direct, and independent line of railroad, from a point at or near Owings' Mills, to a point in the city of Baltimore, west of Pennsylvania Avenue," and known as the "Turnpike Line." That herewith are submitted the original contracts. "entered into by the said railroad company with competent parties," (their competency assured by bond to the extent of 20 per cent. of the estimated amount of work performed, or material furnished, in addition to a monthly retention of 15 per cent. from payments,) "for the construction and completion of the said new and independent line from Owings' Mills to Baltimore, as well as for the completion of the road of said company from its present western terminus to Williamsport, within a reasonable time." That the said contracts have been approved by the City Solicitor, and have not been "made until advertisements have been published in one or more

newspapers published in the cities of Baltimore, Philadelphia and New York, inviting proposals for the doing of said work," (certificates of advertisement herewith submitted,) and said company have considered fairly the proposals made to it in awswer to the said advertisement.

That the contracts entered into by the company at a sum per cubic yard for graduation and masonry, per lineal foot for bridge superstructure and trestle work, per pound for iron rails, spikes and fastenings, per piece for cross-ties and splices, and the price bid for track-laying, show that if the estimates furnished by General I. R. Trimble, and our engineer, Richard B. Osborne, of the amount of work to be performed, and the quantity of different materials to be supplied are correct, the construction and completion of the road from Baltimore to Owings' Mills, and from its western terminus to Williamsport, will cost eight hundred and fifteen thousand, two hundred and eighty-three dollars, and ten cents, (\$815,283 10.)

That our engineer's estimate of the cost of graduation, masonry, bridge superstructure, and track-laying, from Owings' Mills to Baltimore, is two hundred and eighteen thousand, one hundred and fifty-eight dollars and twenty cents, (\$218,-158 20,) which, deducted from \$815,283.10, shows the cost of the road, exclusive of the line from Owings' Mills to Baltimore, to be \$597,124.90.

COPY OF ENGINEER'S ESTIMATE.

Graduation and masonry, Owings' Mills division.\$120,054 4	0
" " Middle division 158,950 6	0
" "Williamsport division. 39,634 4	
Bridge superstructure, entire road 52,256 0	
4 600 tons rail at	
291,200 lbs. spikes at 3 84 per 100 lbs. 11,182 0	8
18,700 fastenings at 60 per set 11,220 0	0
137,280 cross ties at	
151,200 01085 0105 0105 0105 0105 0105 0105 0	
10.100 Uak spiroes	
52 miles track-lay'g at 325 00 per mile 16,900 0	

\$815,283 10

That if the \$1,200,000 of bonds are negotiated so as to realize not less than 90 per cent. net, or \$1,080,000, there will be left, after completing the road from its present terminus to Williamsport, the sum of \$482,875 10. Deducting our engineer's estimate of the cost of the line from Owings' Mills to Baltimore, \$218,158 20 and \$100,000 for equipment, leaves \$164,716 90 applicable for contingencies.

That at a general meeting of the stockholders of the company, held in the city of Baltimore on the 15th of March, the following resolution was unanimously adopted :

Resolved, That the Western Maryland Railroad Company hereby promises and guarantees to the Mayor and City Council of Baltimore that the company will locate its principal or main repair shops in or adjacent to the said city.

That Messrs. Isaac Motter and John Welty, who were instructed to ascertain what would be the cost of right of way from Hagerstown to Williamsport, have, after full investigation, assured the company that it would be less than \$20,000. That less than \$10,000 are necessary to settle right of way damages from the present terminus to Hagerstown.

That responses naming a price have been received from the following persons on the line from Owings' Mills to Baltimore : Heirs of Wm. Barnett, $3z^{2/2}$ acres 6 miles out \$10,000

Yours, very truly,

(Signed) GEORGE M. BOKEE, Baltimore, Sept. 16, 1870, Pres't W. M. R. R. Co. STATE OF MARYLAND-CITY OF BALTIMORE, TO WIT:

Be it remembered, that on this 16th day of September, A. D. 1870, before me, the subscriber, a Justice of the Peace of the said State, in and for the city aforesaid, personally appeared George M. Bokee, President W. M. R. R. Co., and D. Preston Parr, Secretary and Treasurer of said Company, and made oath on the Holy Evangely of Almighty God, that the aforegoing statement is just and true, to the best of their knowledge and belief.

(Signed) JOHN B. O'DONNELL, J. P. The undersigned, members of the Finance Committee of the Western Maryland Railroad Company, having examined the foregoing statement, hereby certify that it is correct, to the best of our knowledge and belief.

> (Signed) J. K. LONGWELL, M. WEISENFELD.

APPLICATION No. 1.

BALTIMORE, October 13th, 1870.

To the Honorable the Mayor and

Commissioners of Finance of the City of Baltimore :

GENTLEMEN :

The undersigned, members of the Committee of Finance of the Western Maryland Railroad Company, respectfully state---

That in compliance with the provisions of "an ordinance to authorize the endorsement or guarantee by the Mayor and City Council of Baltimore, of the mortgage bonds of the Western Maryland Railroad Company, and to provide a sinking fund in connection therewith," they transmitted to the said Mayor and Commissioners of Finance, a paper addressed by the President to the Committee of Finance, embracing a statement sworn to by the proper officers of the Company, in which it is unmistakably shown that the means of the Western Maryland Railroad Company are ample to complete the said Western Maryland Railroad from the western limits of the City of Baltimore to Williamsport, in Washington county, as required by the provisions of said ordinance;

That the members of the said Finance Committee have executed sufficient bonds to the Mayor and City Council of Baltimore, in the penalty of fifty thousand dollars, conditioned for the faithful application of all the bonds guaranteed by the city, under the provisions of this ordinance;

That having given indubitable evidence in the sworn statment aforesaid, and having presented duly certified copies of contracts entered into by the said Railroad Company, with competent parties, for the construction and completion of the said new and independent line from Owings' Mills to Baltimore, as well as for the completion of the road of said Company from its present western terminus to Williamsport, within a reasonable time;

That having presented satisfactory evidence in the sworn statement heretofore referred to, by the only parties competent to determine the question of having sufficient means to complete said road, which we hereby unhesitatingly certify to, and there being but one point unsettled, the right of way, for which there is abundance of means left, after all the expenditures necessary for the construction and completion of said Western Maryland Railroad, the Committee of Finance hereby make an application to the Mayor and Commissioners of Finance for an amount of Western Maryland Railroad bonds, endorsed by the City of Baltimore, to pay for work done and material used in construction of said road, as per Estimate No. 1 of the Engineer of this Company, and also for an amount of bonds so endorsed to meet the probable expenditures, as per Estimate No. 2, by said Engineer, which estimates are hereto annexed, and which are presented by us, as

the statement showing the items of expenditures in the equipment of the road of said Company, and in the work of the construction of said road, and on what part of the road the bonds or proceeds of the same are to be applied by the Finance Committee.

	(Signed)	GEORGE M. BOKEE,
		President.
Witness :		WM. KEYSER,
(Signed)	WM. J. KING.	J. K. LONGWELL,
		M. WEISENFELD,
		Finance Committee.

Certified copies of contracts, bearing the approval of the City Solicitor, were likewise submitted and ordered to be placed on file, as follows:

- With the Abbott Iron Company, dated August 17, 1870, for 4,600 tons iron rails.
- With Marshall P. Smith, dated July 27, 1870, for 290,000 pounds spikes and 25,000 sets of fastenings.
- With Marshall P. Smith, dated September 9, 1870, for 75,000 button-head spikes.
- With M. P. Placide, dated July 30, 1870, for all the bridges between the City of Baltimore and Owings' Mills, and between its present western terminus and Williamsport, and for all the trestle-work required in the middle division, extending from section 8 to section 40, inclusive.
- With John Lyons & Co., dated July 26, 1870, for the graduation and masonry of sections 8 to 15, both inclusive, sections 17 and 18, sections 21 to 25, both inclusive, and sections 27 to 40, both inclusive.
- With Bridget K. Conway, dated July 24, 1870, for the graduation and masonry of section 16.
- With Dougherty & Co., dated July 21, 1870, for the graduation and masonry of sections 19 and 20.

- With John Donohue, dated July 26, 1870, for graduation and masonry of section 26.
- With James McGuckin & Co., dated July 28, 1870, for the graduation and masonry of that part of the Western Maryland Railroad known as the lower division, extending from Owings' Mills to Baltimore, including sections 1 to 7.

With James McGuckin & Co., dated July 28, 1870, for the graduation and masonry of that part of the Western Maryland Railroad known as the upper division, extending from Hagerstown to Williamsport, and embracing sections 1 to 7, inclusive.

The endorsement of the Solicitor is as follows:

"I have examined the foregoing contract and approve the same."

(Signed) R. D. MORRISON, City Solicitor.

August 3, 1870.

And then were submitted estimates Nos. 1 and 2 (see appendix,) which were placed on file.

Upon consideration of the premises the Board, being satisfied that the required conditions had been complied with, ordered the delivery of bonds to amount of one hundred thousand dollars.

December 14, 1870. The Board met pursuant to adjournment; the application following was presented:

APPLICATION No. 2.

BALTIMORE, December 13th, 1870.

To the Honorable Mayor and

Commissioners of Finance:

GENTLEMEN :

We hereby make application for an amount of Western Maryland Railroad bonds, endorsed by the city of Baltimore (two hundred thousand dollars,) to pay for work and material used in the construction of said road, as per estimates Nos. 3, 4, 5 and 6 of the Engineer of this company, which estimates are hereto annexed, and which are presented by us as the statement showing the items of expenditure in the equipment of the road of said company, and in the work of construction of the said road, and on what part of the road the bonds or proceeds of the same are to be applied by the Finance Committee.

(Signed) W. KEYSER, Chairman.

We, the undersigned members of the Finance Committee of the Western Maryland Railroad Company, do hereby make affidavit that the estimates upon which the within application is based are, to the best our knowledge, correct and true.

(Signed) WM. KEYSER, Chairman.
 M. WEISENFELD,
 J. K. LONGWELL.

Sworn before W. H. HAYWARD, J. P., and certificate attached.

Estimates Nos. 3, 4, 5 and 6, and a detailed statement of disbursements from September 13th to November 30th, 1870, (see appendix,) amounting to \$74,304 26, with the vouchers therefor, were presented and ordered to be filed.

It was then ordered that bonds to amount of two hundred thousand dollars be delivered to the Finance Committee of the company, coupons Nos. 1 and 2 to be taken from bonds before delivery.

February 6, 1871.—A communication from the Finance Committee of the Western Maryland Railroad Company was presented, read and ordered to be placed on record, as follows:

APPLICATION No. 3.

Hon. Robert T. Banks, Messrs. Robt. T. Baldwin and Chas. J. Baker,

Finance Commissioners :

GENTLEMEN :

The undersigned, Finance Committee of the Western Maryland Railroad Company, respectfully make application for a delivery to them of three hundred thousand Western Maryland Railroad guaranteed bonds, the proceeds thereof to be disbursed under the provisions of ordinance No. 11, approved January 26, 1870. And in accordance with requirements of sec. 5 of said ordinance, herewith submit a full statement in writing, under oath, showing for what items of expenditure in the equipment of said road, or in said work of construction of said road, and on what part thereof the said bonds asked for by them, or their proceeds, are to be applied by them, and also proper vouches showing the application of bonds endorsed under the provisions of this ordinance, previously delivered to them.

GEO.	M.BOKEE, President.

Sworn before W. H. HAYWARD, J. P., and certificate attached.

M. WEISENFELD.

And the papers therein referred to were likewise presented to the Board, as follows:

1st. A statement (see Appendix) showing the items and amount of expenditures to January 30th ultimo, with accompanying vouchers for the same, and also a statement (see Appendix) showing the aggregate amount stated to have been received from sales of bonds heretofore delivered to said committee.

2d. Estimates Nos. 6, 7 and 8, (see Appendix.)

The chairman gave notice, that on February 3d, he delivered to Mr. Keyser, \$50,000 of bonds of the Western Maryland Railroad Company, taking therefor the following receipt:

BALTIMORE, February 3d, 1871.

Received of Hon. Robert T. Banks, fifty thousand dollars of the bonds of the West. Md. Railroad, endorsed by the City of Baltimore, said bonds to be placed in hands of Cashier of National Mechanics' Bank, and they or the proceeds of same, at 90 per cent., to be held subject to the check or order of Hon R. T. Banks, Chairman Finance Commission.

(Signed) WM. KEYSER,

Chairman Finance Committee W. M. R. R.

Upon motion, the Clerk of the Board was instructed as to the accounts, and further action upon the application was deferred.

February 15th, 1871.-The application of the Finance Committee of the Western Maryland Railroad Company, for the issue of \$300,000 00 bonds, filed at the previous meeting, being under consideration, the Clerk stated that he "had examined the vouchers and found them correct ;" also from the papers filed Feb. 7, it appears the proceeds of sale\$295,000 00 bonds, amount to..... \$258,375 55 \$5,000 bonds on hand at 90..... 4,500 00 \$262,875 55 Total payments as per vouchers..... 233,721 41 Leaving on hand cash...... \$29,154 14 Probable estimates...... \$226,536 00 Matured bills unpaid...... 11,920 79 \$238,456 79 Leaving...... \$209,302 65

as the amount for which bonds are to be issued.

After consideration of the statement of the Clerk, on motion, it was resolved to issue \$200,000 of endorsed bonds, in addition to \$50,000 issued February 3d, 1871, the receipt for which is recorded in the proceedings February 6, 1871; and that the funds deposited in the National Mechanics' Bank to the credit of the Chairman of the Commissioners of Finance, as a pledge for this issue of \$50,000, be placed to the credit of the Finance Committee of the Western Maryland Railroad Company. On motion, it was ordered to be entered on the minutes, as the opinion of this Board, that the bonds now to be issued should not be sold at less than 90, with accrued interest, less the customary allowance for commissions.

May 11th, 1871.-The following papers were submitted.

APPLICATION No. 4.

Hon. Robert T. Banks, Messrs. Robt. T. Baldwin and Chas. J. Baker, Commissioners of Finance:

Gentlemen :

The undersigned Committee of Finance of the Western Maryland Railroad Company, respectfully make application for the delivery to them of one hundred and fifty thousand dollars of the guaranteed bonds of the Western Maryland Railroad Company, the proceeds thereof to be applied for the purpose of the completion of the construction of the said Western Maryland Railroad, as an independent road from the city of Baltimore to Williamsport, and for its equipment, for which purpose alone it is hereby declared the said bonds or their proceeds shall be applied. In compliance with Section 5, Ordinance No. 11, approved January 26th, 1870, they herewith submit "a full statement in writing, under oath, showing for what items of expenditure in the equipment of said road, or in said work of construction of said road, and on what part thereof the said bonds, asked for by them, or their proceeds, are to be applied by them, and also proper vouchers, showing the application of all bonds endorsed, under the provisions of this ordinance, previously delivered to them.

(Signed)

WM. KEYSER, Chairman. J. K. LONGWELL, JOS. F. FRIEDENWALD.

ACCOMPANYING PAPERS.

These papers were placed on file. On motion it was

Resolved, That the further consideration of this application be postponed until a reply be received to the following letter:

> CITY REGISTER'S OFFICE, Baltimore, May 12th, 1871.

William Keyser, Esq.,

Chairman Finance Committee,

Western Maryland R. R. Company.

I am directed to inquire if the work on the Western Maryland Railroad has reached that stage of progress to enable your engineer to verify the former estimates; or in other words is there sufficient means in the proceeds of the bonds yet to delivered to enable the company to complete the construction and equipment of the road, as contemplated in the ordinance granting aid to the company. It would be gratifying to the Board if this information could be communicated at an early day.

Very respectfully, yours,

(Signed)

JOHN A. ROBB,

Clerk to Commissioners of Finance.

May 17th, 1871.—The following letter was received and placed on file:

BALTIMORE, May 15th, 1871.

Hon. Robert T. Banks,

Robt. T. Baldwin, Esq., Chas. J. Baker, Esq. Gentlemen :

Your favor of May 12th is duly to hand, and in compliance with request contained therein, I furnish you herewith the statement of Mr. Osborne, the chief engineer of the road, which gives the information you desire, with as much accuracy as it is possible at this stage of the work. This statement is made up to April 1st, at which date you will see the surplus funds had been absorbed to the extent of \$29,207 72. In expressing an opinion as to the sufficiency of the amount to be derived from the city's endorsement, to complete the whole road as contemplated, we have only the same general data to go upon as when we expressed the opinion in the beginning. So far as the work has progressed, we see no reason to apprehend that the surplus fund (estimated at about 160,-000) will not be adequate to meet all the incidental expenses not contemplated in the contracts. The contractors have so far, without exception, complied with their contracts, there having been, as we are informed, in no instance, a deviation from the prices agreed upon. You will see by Mr. Osborne's statement (furnished herewith) that the excess of expenditure owing to short estimate of work to be done did not exceed on the Mechanicstown division $5\frac{3}{4}$ per cent. Should the same experience be met with on the remainder of the line, there would be little doubt of the funds being fully sufficient. This, however, is not likely to be the case, as some of the mountain sections will exceed this per centage. The question of right of way is an element which enters largely into the calculation which must be made. The President, who has been giving this matter his personal attention, informs us that he feels satisfied, from the results of the condemnations already made, together with settlements which have been effected between the company and the owners of land, that the amount originally estimated will be very nearly sufficient to secure the entire right of way. The company found that in the mountain and Washington county divisions there were a number of claims for right of way still unsettled; some of these parties have been settled with and settlements are now being made with

COMMISSINERS OF FINANCE.

the remainder. It was also found to be advisable (looking to permanency) to substitute a bridge across Owens' creek, instead of a trestle, as comtemplated originally. This of course absorbs a portion of the surplus.

Whilst we feel some hesitancy in expressing an opinion where there are so many contingencies which may arise to vary the result, we can see no reason to apprehend that we were wrong in our original opinion of the amount provided being sufficient to complete the road as contemplated. As you are aware, the ordinance provides for the completion of the new and independent road from Baltimore to Smithsburg in Washington county before the work beyond that point is proceeded with. This being the case, it will be proper when that point is reached to institute an accurate investigation as to cost of completion to Williamsport; and should there be any probability of a deficiency of means, we think that a portion of the amount set aside for equipment could, without detriment to the business of the road, be transferred to construction. In view of such a contingency, this Committee have concurred in the views of the President that it would be judicious to reserve as much of the equipment fund as possible (consistent with the proper working of the road,) to meet such an emergency. This Committee are of the decided opinion that the policy of devoting the greatest energy to pushing the Owings' Mills division through to completion is the proper one. Until this is done there can be nothing gained by pushing the work between Mechanicstown and Smithsburg, faster than economy requires.

Trusting that this may convey to you the information desired,

We are, very respectfully, yours,

(Signed)

WM. KEYSER,

Chm'n Committee Western Md. R. R. Co.

The Clerk of the Board asked attention to a bill for engineering services, amounting to \$14,273 83, presented among vouchers, February 6, 1871, and objected to by this Board. It was ordered that the bill be submitted to the City Counsellor, and his opinion asked as to the propriety of its acceptance as a legal voucher.

It was further ordered that bonds to amount of \$50,000 be endorsed and delivered to the Finance Committee, upon Application No. 4.

June 15, 1871.—It was ordered that bonds to amount of \$20,000 be endorsed and delivered on account of Application No. 4, for the purpose of meeting a present requirement.

June 20, 1871.—The following opinion of the City Counsellor was read and filed :

"The bonds are to be applied to the "completion of the construction of the road," and to no other purpose except equipment.

Now the completion of the construction can have two meanings-

- 1st. "That it will embrace only liabilities which were incurred . from and after the passage of the ordinance," or
- 2d. "Those unpaid bills in reference to the construction which were for work and labor bearing on the construction, and which were represented as a part of the cost for the completion and construction." Whether the voucher comes in the 2d category, is a question of fact.

(Signed) WM. HENRY NORRIS,

City Counsellor.

On motion it was "resolved, that a copy of the opinion be submitted to the Finance Committee of the Western Maryland Railroad Company, and that it be requested to furnish

this Board with a statement of the facts with reference to the bill for engineering expenses, heretofore objected to by this Board.''

The following letter was presented :

OFFICE WEST. MD. R. R. COMPANY, Baltimore, May 20, 1871.

Hon. Rob't T. Banks,

Messrs. Rob't T. Baldwin and Chas. J Baker, Commissioners of Finance.

GENTLEMEN :

In compliance with request, I herewith submit the accompanying estimate of our Chief Engineer, R. B. Osborne, Esq.

Respectfully, &c.,

(Signed) GEORGE M. BOKEE, Pres't W. M. R. R. Co.

The accompanying papers, being letter of Richard B. Osborne, Esq., Chief Engineer, and statements marked re_ spectively "A," "B," "C" and "D," (see Appendix,) were placed on file.

On motion, it was ordered that bonds to amount of \$80,000 be endorsed and delivered to the Finance Committee of the Company, being the balance upon Application No. 4, dated May 11th, 1871.

July 7, 1871.-The papers following were submitted :

BALTIMORE, June 30th, 1871.

John A. Robb, Esq., Register.

Dear Sir:—Your favor of June 20th, to President Bokee, has been by him handed to this committee, together with the legal opinion of the City Counsellor, Mr. W. H. Norris. In accordance with your request, I herewith furnish you with a statement of the Treasurer of this Company by which you will see that the amounts returned by this committee as having been paid for engineering expenses, etc., are correctly chargeable to the fund provided by the city's endorsements. Should any further evidence be necessary, an examination of the bills themselves will prove conclusively the correctness of this statement. Very respectfully,

(Signed) WM. KEYSER, Chairman.

BALTIMORE, June 24th, 1871.

Finance Committee West. Md. R. R. Co.:

GENTLEMEN:

The account referred to by Mr. John A. Robb, Clerk of the Finance Committee of Baltimore city (\$14,273.83), is a legitimate charge (under the opinion of the City Counsellor) against the fund guaranteed by the city for completing the road. The debt having been incurred entirely for the unfinished portion, in fact, much of it in making full and proper estimates of cost of completion, &c., and was included in the general estimates, as I understand, when the loan was applied for. Mr. D. M. Moore, the former auditor of the company, and acting treasurer, preceding me, stated that \$30,000 was estimated for, but as after careful examination I could only make up the amount of \$14, 273 83, that amount only was claimed. A much larger amount of debts now paid, and being paid by the company on the unfinished portion of the road, and for which no claim is contemplated by the company, would, under the same opinion, become undoubtedly legitimate charges. Most respectfully,

> (Signed) D. PRESTON PARR, Treasurer W. M. R. R. Co.

On motion, it was resolved that the bill for engineering services, having been incurred prior to the passage of Ordinance No. 11, approved January 26, 1870, is not, in the opinion of this Board, a proper voucher, and "that notice hereof be given to the Finance Committee of the Company."

APPLICATION No. 5.

August 31, 1871.—The following letter, being application No. 5, was presented :

Hon. Robert T. Banks, Messrs. Robt. T. Baldwin and Chas. J. Baker,

Commissioners of Finance.

GENTLEMEN :

The undersigned, Committee of Finance of the Western Maryland Railroad Company, respectfully make application for the delivery to them of one hundred and fifty thousand dollars of "the guaranteed bonds" of the Western Maryland Railroad Company, the proceeds thereof to be applied for the purpose of the completion of the construction of the said Western Maryland Railroad as an independent road from the city of Baltimore to Williamsport, and for its equipment, for which purpose alone it is hereby declared the said bonds, or their proceeds, shall be applied.

In compliance with section 5, ordinance No. 11, approved January 26, 1870, they herewith submit a full statement in writing, under oath, showing for what items of expenditure in the equipment of said road, or in said work of construction of said road, and on what part thereof the said bonds asked for by them, or their proceeds, are to be applied by them, and also proper vouchers showing the application of all bonds endorsed under the provisions of this ordinance, previously delivered to them.

(Signed) J. K. LONGWELL, Chairman.M. S. HESS,JOS. FRIEDENWALD.

Baltimore, August 23, 1871.

ACCOMPANYING PAPERS.

Estimates Nos. 11 and 12, (see appendix.)

A statement of expenditures (see appendix,) with vouchers therefor, amounting to a sum total of \$615,520 13.

On motion, it was ordered that bonds to amount of \$100,000 be endorsed and delivered.

APPLICATION No. 6.

October 5, 1871.--The following letter, being application No. 6, was presented and placed on file :

Hon. Robert T. Banks,

Messrs. Robt. T. Baldwin and Chas. J. Baker,

Commissioners of Finance :

GENTLEMEN :

The undersigned, Committee of Finance of the Western Maryland Railroad Company, respectfully make application for the delivery to them of fifty thousand dollars of "the guaranteed bonds" of the Western Maryland Railroad Company, the proceeds thereof to be applied for the purpose of the completion of the construction of the said Western Maryland Railroad as an independent road from the city of Baltimore to Williamsport, and for its equipment, for which purpose alone it is hereby declared the said bonds, or their proceeds, shall be applied.

In compliance with section 5, ordinance No. 11, approved January 26, 1870, they herewith submit a full statement in writing, under oath, showing for what items of expenditure in the equipment of said road, or in said work of construction of said road, and on what part thereof the said bonds asked for by them, or their proceeds, are to be applied by them, and also proper vouchers showing the application of all bonds endorsed under the provisions of this ordinance previously delivered to them.

> (Signed) J. K. LONGWELL, Chairman. JOS. FRIEDENWALD, M. S. HESS.

Baltimore, September 28th, 1871.

Hon. Robert T. Banks, Messrs. Robt. T. Baldwin and Chas. J. Baker, Commissioners of Finance :

GENTLEMEN :

The undersigned, Finance Committee of the Western Maryland Railroad Company, respectfully submit herewith their Engineer's estimate of the graduation and masonry of the revised location of the road, from its track near Owings' Mills to the junction with the Baltimore and Potomac Railroad at Baltimore, and the bridge and the track superstructure necessary to complete the same, showing a total amount needed for that purpose of \$243,444 16. Also a statement in detail of the amount awarded by condemnation of jury and otherwise, the expenses incurred, &c., for the entire right of way on Owings' Mills division, excepting for the land owned by John S. 'Gittings, A. B. Patterson, T. S. Keerl and John Rogers, showing a total needed of \$104,406 49. Also amount of sales of bonds and vouches for expenditures to date. Having paid for rails sufficient to lay the track from Baltimore to Smithsburg, and fastenings for the entire road, as well as large quantities of other materials, we are of the opinion that \$300,000 of the bonds will be sufficient to insure the completion of the road from Owings' Mills to Baltimore, and respectfully suggest that \$100,000 of the bonds, in addition to the \$200,000 set apart and reserved by section nine of the ordinance No. 11, approved January 26, 1870, be applied to that portion of the road. It will be observed from examination of statements herewith submitted, that the sale of bonds have not been adequate to our wants, and pressing demands have compelled the borrowing of money at high rates of interest, which might perhaps be avoided if the price was left more at our discretion, so as to allow our broker a latitude to meet the constant fluctuations of the market.

The undersigned respectfully make application for the delivery to them of one hundred thousand of the guaranteed

bonds, the proceeds thereof to be applied in the payment of right of way, and for graduation and masonry on that portion of the road between Owings' Mills and Baltimore.

> (Signed) J. K. LONGWELL, Chairman. JOS. FRIEDENWALD, M. S. HESS.

Baltimore, September 28, 1871.

ACCOMPANING PAPERS.

Estimates Nos. 13 and 14, (see appendix.) Amount of arbitration, ""

A statement of sales of bonds, (see appendix.)

The accounts having been examined and reported as unsatisfactory, it was resolved that it is not expedient to make any further deliveries of bonds until the accounts shall be adjusted and placed in a form satisfactory to this Board.

October 11th, 1871.—Application No. 6 being under consideration, the following letter was presented :

BALTIMORE, OCTOBER 4th, 1871.

Robt. T. Baldwin, Esq.

DEAR SIR:

The Finance Committee authorize and respectfully request you to withdraw the claims paid for freight and interest, which they are advised have been objected to by the Commssioners of Finance, and also request that hereafter they may be permitted to explain personly their reasons for the allowance of said claim.

Respectfully, &c.

(Signed) GEORGE M. BOKEE,

Sec'y Finance Committee W. M. R. R. Co.

Whereupon it was ordered, "that bonds to amount of \$50,-000 be endorsed and delivered.

October 14th, 1871.—The Board met this day pursuant to adjournment.

The communication of the Finance Committee of the Western Maryland Railroad Company, under date of 27th September, in regard to the price at which the endorsed bonds of the Western Maryland Railroad Company should be disposed of, being under consideration, it was resolved to adhere to the opinion expressed February 15th, at a meeting of the Board, viz: "It is the opinion of this Board that the bonds now to be issued should not be sold at less than 90, with accrued interest, less the customary allowance for commission." The Secretary was directed to address a communication to the Finance Committee of the Western Maryland R. R. Co., calling attention to the above resolution, and to Section 9 of Ordinance No. 11, approved January 26, 1870. Also to request them to keep separate accounts of the expenditures of the road from Owings' Mills to Baltimore, to make separate requisitions for that part of the road, and also to a resolution of this Board "that no further issue of bonds be made until the accounts of the road are put in proper form."

October 27, 1871.—The following papers were presented and placed on file:

An estimate of the graduation and masonry of the Owings' Mills division (see Appendix).

A corrected statement of expenditures (see Ap-

pendix) to September 26th, 1871, total.......\$649,538 70 A statement (see Appendix) of expenditures on

Owings' Mills division to September 22nd,

1871, total...... 49,069 53

The accounts being now regarded as in proper form, it was ordered that bonds to amount of \$100,000 be endorsed and delivered.

The foregoing record of the action of this Board, under the ordinance granting aid to the Western Maryland Railroad Company, and the accompanying papers, exhibiting the grounds of that action, are respectfully commended to your consideration, in the belief that thereby is furnished so full information as to render unnecessary the addition of any explanatory remarks.

In the Appendix will be found (attached for convenience of reference) a copy of the ordinance, and a short analysis of those parts referred to in this report.

THE VALLEY RAILROAD COMPANY OF VIRGINIA.

Ordinance No. 59, approved September 14, 1869, authorizes and requires a subscription of one million of dol ars to the stock of this company, upon the following conditions:

- 1st. That the sum of \$2,200,000 shall have been validly subscribed, either by counties and towns in the Valley of Virginia, or by persons or corporations solvent and able to pay the amount of their respective subscriptions.
- 2d. That thirty per cent. of the amount of every subscription which shall be made to said stock by individuals and corporations other than said counties, shall have been paid in cash to said company.
- 3d. That at least one million of dollars (of the \$2,200 000) shall have been subscribed by the counties and towns in the Valley of Virginia, or by corporations or persons resident therein, and solvent and able to pay the amount of their respective subscriptions.

During the period now being reported upon, the President and Directors of the Company have made informal and personal applications to this Board, for the purpose of obtaining from it preliminary determinations of questions relating to those subscriptions which had been obtained (in compliance with one of the required conditions) from counties, towns and individuals in the Valley of Virginia.

These preliminary determinations were made necessary by the fact that a proposed subsrciption of the Baltimore and Ohio Railroad Company, (contemplated as a part of the \$2, 200,000,) was made dependent upon that of the city, the President and Directors of that Company having adopted a resolution submitted to this Board, in form following:

"Resolved, that the President be authorized to subscribe one million dollars (\$1,000,000) to the capital stock of the Valley Railroad Company of Virginia, upon the conditions that satisfactory arrangements are made for the prosecution of the work, and that the said subscription shall not take effect until the subscription of the City of Baltimore for one million of dollars (\$1,000,000) becomes operative.

The subscriptions of counties and towns were reported as being made to amount of eleven hundred and five thousand dollars, (\$1,105,000.) those of individuals to ninety-five thousand dollars, (\$95,000.)

Questions as to the validity of the subscriptions, and as to the solvency and ability to pay of the individual subscribers, were to be determined.

Information as to the pecuniary ability of the individual subscribers, being satisfactory, the Board was enabled to determini that question affirmatively.

The question of validity of subscriptions involved inquiries as to the legal powers possessed by counties and towns, the authority of the persons subscibing in their names, and the character of the subscriptions; for which a knowledge of legislation and of judical decisions in Virginia was requisite, and this made necessary, as the Board was informed by the City Counsellor, the services and opinion of a competent member of the bar of that State. Accordingly, the legal opinion of the Honorable Hugh W. Sheffey was obtained, and after submission to the City Counsellor, and receiving his approval and endorsement, was presented to this Board.

That which follows is a record of the proceedings of the Board, and is respectfully submitted for your information.

At a meeting of the Commissioners of Finance, October 31st, 1871, the following papers were submitted and ordered to be entered on the minutes:

" Application of the Valley Railroad Company of Virginia," for subscription of stock, \$1,000,000.

At a meeting of the Board of Directors of the Valley Railroad Company, held in the City of Baltimore, September 8th, 1871, it was

Ordered by the Board of Directors of the Valley Railroad Company, that Messrs. Rob't Garret, Prest., P. P. Pendleton, Richard Norris, Jr., William Keyser and Hugh W. Sheffey, be, and they are hereby, appointed a committee, whose duty it shall be to apply to the Commissioners of Finance of the City of Baltimore, to make and complete the subscription to the stock of this company, of one million of dollars, in pursuance of an ordinance, entitled "An ordinance to authorize a subscription of one million of dollars to the stock of the Valley Railroad Company, in the State of Virginia, and a loan to pay such subscription," approved by the Mayor of the City of Baltimore, on the 14th of September, 1869, and ratified and approved by a majority of the votes cast at an election in said city, held on the 24th day of March, 1870, and that said committee be instructed to inform said Commissioners of Finance that the conditions prescribed in said ordinance, as conditions precedent to the making of said subscription by the said Commissioners of Finance, have been complied with, as follows, to wit:

That the sum of two million two hundred thousand dollars has been validly subscribed to the stock of this company by the counties and towns in the Valley of Virginia, and by persons and corporations solvent and able to pay the amounts of their respective subscriptions in manner following, that is to say: By the county of Roanoke the sum of two hundred thousand dollars.

By the county of Botetourt the sum of two hundred thousand dollars.

By the county of Rockbridge the sum of five hundred and twenty-five thousand dollars.

By the town of Lexington the sum of thirty thousand dollars.

By the city of Staunton the sum of one hundred and fifty thousand dollars.

Making in the aggregate the sum of one million one hundred and five thousand dollars subscribed by the counties and towns in the valley of Virginia.

By McMahon, Green & Co., citizens and residents of the Valley of Virginia, seventy-five thousand dollars; and by Robert Garrett twenty thousand dollars; and by the Baltimore and Ohio Railroad Company one million of dollars; making together as aforesaid two millions two hundred thousand dollars, of which amount a sum greater than that prescribed in said ordinance had been subscribed by the counties, towns and residents in the Valley of Virginia. Furthermore, that thirty per cent. of the amount subscribed by the towns of Staunton and Lexington, by McMahon, Green & Co., and Robert Garrett, and by the Baltimore and Ohio Railroad Company, has been paid to the Treasurer of this company, and is held to the credit of this company; and that so soon as the subscription of the city of Baltimore is perfected, this company will be prepared to begin and carry on to completion the great work for which the company was organized, to wit: the construction of a railroad from the town of Harrisonburg, in the county of Rockingham, to some point on the Virginia and Tennessee Railroad, at Salem, in the county of Roanoke.

2d. That the President of the company furnish the Commissioners of Finance of the city of Baltimore with copies of the subscriptions, in writing, made by the counties and towns in the Valley of Virginia, of the ordinances authorizing the same, and of the orders of stockholders and of the Board, accepting said subscriptions; and that he likewise exhibit to said Commissioners vouchers duly signed by the Treasurer of this company, showing the payments of thirty per cent. of the stock subscribed by the stockholders, required by the ordinance of the city of Baltimore, to make such advance payment before the making of the subscription by the city of Baltimore.

(Signed) ROBERT GARRETT, Pres't.

ACCOMPANYING PAPERS.

Extracts from the Minutes of Proceedings of the Stock holders and Board of Directors of the company. Duly certified---

Copies of the ordinance of the Supervisors, and in pursuance thereof the subscription of Roanoke county, Va.

Copies of the order of the County Court, and in pursuance thereof the subscription of Botetourt county, Va.

Copies of the orders of the County Court, and in pursuance thereof the subscriptions of Rockbridge county, Va.

Copies of the ordinance of the Town Council, and in pursuance thereof the subscription of the town of Lexington, Va.

Copies of the ordinances of the City Council, and in pursuance thereof the subscription of the city of Staunton, Va.

"A Certificate of the Treasurer of the Valley Railroad Company of Virginia (COPY.)

"I hereby certify that there has been paid to me, as Treasurer of the Valley Railroad Company, the sum of \$382,500, being 30 per cent. in cash paid upon the subscriptions to the

COMMISSIONERS OF FINANCE.

stock of said Valley Railroad Company, by corporations and individuals other than the counties in the Valley of Virginia, to wit: \$45,000 from the city of Staunton, \$9,000 from the town of Lexington, \$22,500 from McMahon, Green & Co., \$6,000 from Robert Garrett, and \$300,000 from the Baltimore and Ohio Railroad Company. And I further certify that said sum of \$382,500 is in my hands as Treasurer.

Given under my hand this 28th day of October, 1871.

(Signed) W. H. IJAMS, Treasurer.

LEGAL OPINIONS.

BALTIMORE, October 23d, 1871.

WM. H. NORRIS, ESQ.

Dear Sir :- I have carefully examined all the orders of Court and of the Boards of Supervisors, and the instruments evidencing the subscriptions by the agents of the counties of Roanoke, Botetourt and Rockbridge, and of the town of Lexington, and the city of Staunton, and I do certify that in my opinion the various subscriptions have been validly made under and in pursuance of the laws of the Commonwealth of Virginia, to wit: the sum of \$200,000 by the county of Roanoke; \$200,000 by the county of Botetourt; \$525,000 by the county of Rockbridge ; \$30,000 by the town of Lexington; and \$150,000 by the city of Staunton. You will find an instrument executed by Thos. G. Godwin, as President of the Board of Supervisors of Botetourt, and as agent of said Board, ratifying and confirming the former subscription by Jno. T. Anderson and Thos. D. Houston, his agents, and out of abundant caution, renewing said subscription in proper You will also find the Court order of the County form. Court of Botetourt county, and also the Court order of the County Court of Rockbridge county, showing conformity with the law in respect to the subscriptions of those counties, which were not with the papers when they were formerly

exhibited. You will also find herewith the receipt of W. H. Ijams, Esq., the Treasurer of the Valley Railroad Company for the full amount of the 30 per cent. in cash upon the subscriptions made by corporations and individuals, other than the counties in the Valley of Virginia. I trust you will be able to certify that the subscriptions to the full amount required by the ordinance of the City of Baltimore, have been validly made, so as to entitle the Valley Railroad Company to ask the Commissioners of Finance to make the subscription of one million of dollars, as provided for by the ordidinance of the City of Baltimore.

(Signed) HUGH W. SHEFFEY.

ENDORSEMENT.

I have notified the Commissioners of Finance that, from unacquaintance with the laws of Virginia, and the charters of the subscribing towns, counties and cities, and other corporations in the Valley, I was not competent to give any opinion as to the validity of the subscriptions. But this opinion has above been given by Judge Sheffey, and there is every reason to authorize the Commissioners of Finance to confide in his competency and integrity. The certificate as to the payment of the 30 per cent., seems also proper, and the solvency of the subscribing parties is a question of fact for the judgment of the Commissioners of Finance. These things being settled, the case arises under the ordinance for the subscription by the City of Baltimore on the part of the Commissioners of Finance.

> (Signed) WM. HENRY NORRIS, City Counsellor.

COMMISSIONERS OF FINANCE.

To the Hon. the Commissioners of Finance

of the City of Baltimore.

GENTLEMEN :

I have examined the form of subscription to the capital stock of the Valley Railroad Company, in the State of Virginia, which has been proposed for your signatures, as required by the ordinance, approved September 14, 1869, and find the same to be in all respects correct.

(Signed) R. D. MORRISON, Baltimore, Oct. 31, 1871. City Solicitor.

Whereupon the Commissioners of Finance did subscribe to the stock of the Valley Railroad Company, as follows, viz : "The Mayor and City Council of Baltimore, by the Commissioners of Finance of the said city, do, in pursuance of, and under and subject to all the terms and provisions of an ordinance authorizing a subscription of one million of dollars to the stock of the said Valley Railroad Company, which said ordinance was approved on the 14th day of September, 1869, subscribe for ten thousand shares of the stock of the said Valley Railroad Company."

In witness whereof, we do make the said subscription for and in the name of the Mayor and City Council of Baltimore.

THE MAYOR AND CITY COUNCIL OF BALTIMORE, &C. &C.

Your attention is respectfully directed to a copy of the ordinance authorizing the foregoing subscription, which is placed for your convenience in the Appendix.

The undersigned are unwilling to close this report without an expression of their estimate of the value to them, in the performance of their duties, of the intelligent, efficient, and faithul services of the gentlemen in the office of the Register of the city, upon whom they have been obliged to impose an unusual amount of clerical labor during the current period.

152 REPORT OF THE COMMISSIONERS OF FINANCE.

They acknowledge their obligations for prompt and polite attention always given to their requests, and especially to the Register and Deputy Register for accuracy and neatness in the books and accounts of the Board.

Respectfully submitted,

JOSHUA **V**ANSANT, Chm'n, CHARLES J. BAKER, ROBERT T. BALDWIN,

Commissioners of Finance

Baltimore, September 6th, 1870.

State of Maryland, City of Baltimore, to wit:

On this 28th day of September, in the year of our Lord one thousand eight hundred and seventy, before the subscriber, one of the Justices of the Peace of the State of Maryland, in and for said city aforesaid, personally appeared Richard B. Osborne, Chief Engineer of the Western Maryland Railroad Company, and made oath on the Holy Evangely of Almighty God that the above items of expenditure are necessary for the equipment or construction on that part of the Western Maryland Railroad therein set forth.

Sworn before

WM. J. KING, Justice of the Peace.

State of Maryland, City of Baltimore, Sct:

This 29th day of September, 1870, before the subscriber, a Justice of the Peace of the State of Maryland, in and for the City of Baltimore, personally appeared John K. Longwell and Moses Wiesenfeld, and did each make oath in due

form of law that the within true statement is correct and true to the best of their knowledge, information and belief. WM. J. KING, Justice of the Peace.

APPLICATION No. 2.

ESTIMATE No. 3.

We, the undersigned, members of the Finance Committee of the Western Maryland Railroad Company, do hereby make affidavit that the estimates upon which the within application is based, arc, to the best of our knowledge, correct and true. Signed,

WM. KEYSER, Chairman. M. WIESENFELD, J. K. LONGWELL.

Sworn before W. H. HAYWARD, Justice of the Peace, and certificate attached.

Probable amount required to meet the payments of the Western Maryland Railroad Company under the new contracts, ending October 31st, 1870:

ENGINEER'S OFFICE,

BALTIMORE, May 17th, 1871.

GEO. M. BOKEE, ESQ.,

President Western Md. R. R. Co.

SIR :---I submit, according to your instructions, my estimate of the cost of completing the Road, from Section 16 to Section 31, at Smithsburg. It has been arranged in tabular form for the convenience of examination.

On Sheet "A," which exhibits 1st, The actual cost of graduation and masonry to Section 15. 2d, The Engineer's estimate of 1870, of the graduation and masonry of Sections 16 to 31. 3d, The amount of current estimates on these sections (16 to 31) up to April 30th ult. And 4th, The monies still required to complete the whole to Smithsburg.

Statement "B" is a combination and revision of the report to March 31st of Statement "A"; exhibiting the total cost of graduation and masonry to Smithsburg, including the amount of future expenditures; also, the total increase in cost over the estimate of 1870.

Statement "C" is merely confirmatory of "B," by using total sums to work out similar results; and

Statement "D" is an exhibition of the stock on hand and paid for, as materials to be used in future work on the Road. The excess of \$32094 will be reduced 50 per cent. by the margin afforded on the Owings' Mills division in the cubic quantities under the contract.

The above, it is believed, will afford you the information required.

I am, Sir, your obedient servant,

(Signed) RICHARD B. OSBORNE.

" A"

WESTERN MARYLAND

Section 25, Engineer's Estimate in 1870	2180	70
Section 26, Engineer's Estimate in 187024),472	39
Section 26. Amount of Current Estimates to April		
30th, 1871	8,941	00

Sections 27 and 28, Engineer's Estimate in 1870...11,327 13

Sections 29, 30 and 31.....

COMMISSIONERS OF FINANCE.

"A."

RAILROAD CONTINUED.

FT11 .

This section can be completed for this amount	2180 70
On this Section a permanent embankment is in	A100 10
progress in lieu of an awkward side hill	
trestle. It will cost on this account \$5020	
over Estimate of 1870	6950 99
No work has been done on it. Out	0000 00

No work has been done on these Sections. The work estimated in 1870 can be done for the amount estimated; but at Raven Rock Hollow, to avoid the span of that bridge unnecessarily made 150 feet, it is proposed to erect a stout pier that will divide it into two spans of 75 feet each. This pier may cost \$2000, making the amount requisite to complete all. 13,327 00 An increase in cost over Estimate of 1870 of \$2000.

T	otal	amount	re	quired	to	fin	ish	Gradi	ation	and		
	V	Iasonry	to	Smith	sbu	rg,	also	the	neces	sarv		
	B	Bridge Su	iper	structu	re			, • • • • • • • • •		\$69	788	48

N. B. It will be observed that the increase of cost on Sections 16, 26 and 31 is due entirely to the Improvement and addition to the works, rendering the road at these points permanent and efficient. The amount of these increases will, it is believed, be greatly reduced by the saving in the quantities on the 1st Divisions at the contract prices.

(Signed)

RICHARD B. OSBORNE, Engineer. Baltimore, May 17th, 1871.

Probable amount required to meet the payments of the Western Maryland Railroad Company under the new contracts ending September 30th, 1871.

Graduation and Masonry Monterey Div. Sec. 21 to 25	\$2,500
" " Mechanicstown " 16	2,500
Track and Bridge Super Section 16 to 26	2,500
Graduation and Masonry Owings' Mills Division,	·
Section 1, 2 and 8	4,000
Cross Ties 5000	2,500
100 Kegs of Spikes	
20 House Cars	

#### ENGINEERING EXPENSES.

Baltimore Office	330
Owings' Mills Division	258
Mechanicstown Division	235
Monterey Division	
Williamsport Division	
	200

\$29.234

Engineer's Office, W. Maryland R. R., Sept. 8th, 1871. (Signed) RICHARD B. OSBORNE, Engineer.

#### COMMISSIONERS OF FINANCE

# State of Maryland, Baltimore City to wit:

Be it remembered that, on this thirtieth day of September, A. D. 1871, before me, the subscriber, a Justice of the Peace of the said State, in and for the city aforesaid, personally appeared Richard B. Osborne, Chief Engineer of the Western Maryland Railroad Company, and made oath on the Holy Evangely of Almighty God, that the annexed estimate of amounts required to meet the payment of the Western Maryland Railroad Company for the work therein specified is true to the best of his knowledge and belief for the month ending thirtieth of September, 1871.

Sworn before

(Signed) WM. J. KING, Justice of the Peace.

#### COMMISSIONERS OF FINANCE

#### ORDINANCE 11.

### 1870-Ordinance No. 11.

AN ORDINANCE to authorize the endorsement or guarantee by the Mayor and City Council of Baltimore of the Montgage Bonds of the Western Maryland Rail Road Company, and to provide a sinking fund in connection therewith.

SECTION 1. Be it enacted and ordained by the Register to Mayor and City Council of Baltimore, That the ern Maryland Register of the City, upon presentation to him of Rail Road the bonds of the Western Maryland Rail Road Bonds. Company, amounting in the aggregate to the Amount. sum of fourteen hundred thousand dollars, and payable on the first day of January, 1900, with Interest halfinterest at the rate of six per centum per annum, yearly. payable half yearly in the City of Baltimore on the first day of January and July in each and every year, be and he is hereby authorized and To be endirected to cause the same to be endorsed with dorsed by the the guarantee of the Mayor and City Council of Mayor& Coun-Baltimore, which endorsement shall be made in the manner, at the times, and after compliance with the provisions hereinafter mentioned.

SEC. 2. And be it enacted and ordained, That Endorsement the endorsement of the bonds provided for in the to be written. next preceding section of this ordinance shall graved. either be made in writing, or by causing the same to be printed or engraven on the said bonds, Signed by and the said endorsement shall be signed by the the Mayor and Mayor and countersigned by the Register of the countersigned City for the time being, and shall have affixed by the Registhereto the corporate seal of the City, and shall ter. To have Corbe in form following : porate seal.

"For value received, the Mayor and City Council of Baltimore hereby guarantees the payment of the principal and interest of the within bond, in accordance with an ordinance, entitled, 'An ordinance to authorize the endorsement or guar-dorsement. antee by the Mayor and City Council of Baltimore of the mortgage bonds of the Western Maryland Rail Road Company, and to provide a sinking fund in connection therewith-approved 1870;

Form of en-

ORDINANCE 11, which ordinance was subsequently submitted to and ratified by the people of Baltimore. Witness Attest. the signature of the Mayor and Register of the City of Baltimore and its corporate seal;" and the blank left in the above form for the date of the approval of this ordinance shall be filled with the date of said approval. The coupons attached to said bonds shall also contain the endorsement of the guarantee of the said Mayor and City Council of Baltimore, by having written, printed or engraven thereon the words, "Guaranteed by Guarantee. the Mayor and City Council of Baltimore," to which shall be attached the name of the Register. for which purpose a fac-simile of his signature may be employed.

SEC. 3. And it further enacted and ordained, Subject to Act of General That the endorsement of said bonds shall not be Assembly.

made unless, and until an Act shall be passed by the General Assemby of Maryland authorizing

To be submitted to the ordinance shall have been submitted to the legal voters of the City of Baltimore in the manner legal voters. hereinafter mentioned, and a majority of the votes cast at the said election shall be in favor of the said ordinance; and before any endorsement of said bonds shall be made, the said Western Maryland Rail Road Company shall deliver to the

R. R. Co. to Register of the City a deed of mortgage, duly give mortgage executed and acknowledged, and in such form and with such covenants and conditions as shall be

approved by the City Counsellor, wherein and To be ap-whereby there shall be conveyed to the said proved by whereby there shall be conveyed to the said City Counsel-Mayor and City Council of Baltimore, all the road and railway of the said Company, as now or hereafter to be constructed, and all its franchises, rights, tolls and revenues, rolling stock, machinery, and all its other estate, real, personal and mixed, of every kind and description, by way of mortgage to secure and indemnify the said Mayor and City Council of Baltimore, for and in its endorsement and guarantee of the said bonds, and for all charges and expenses connected therewith, which mortgage shall be next in priority to those now already executed by said Company,

lor.

#### COMMISSIONERS OF FINANCE.

and shall contain proper covenants for the pay-ORDINANCE II. ment by said Western Maryland Rail Road Company of the principal and interest of the bonds heretofore mentioned, at and when the same shall respectively become due and payable. And the said bonds shall be applied only to the purposes mentioned in this ordinance; and all the expenses of the execution and recording. of said mortgage shall be paid by said Company at the time of said execution and recording.

SEC. 4. And be it further enacted and ordained, Additional That the endorsement of the said bonds herein-Directors by before authorized shall not be made, unless and charter. until such an amendment to the charter of the said Western Maryland Rail Road Company, shall be made by an act of the General Assembly of Maryland and accepted by said Company, as will give to the Mayor and City Council of Baltimore such an additional number of Directors as will secure to the said city, a majority of three members in the Board of Directors.

SEC. 5. And be it further enacted and ordained, That before any of the bonds of the Western to dispose of Bond-. Maryland Rail Road Company shall be endorsed under the provisions of the ordinance, the said Western Maryland Rail Road Company shall authorize and empower Charles Morton Stewart, John K. Longwell and George M. Bokee, who now constitute the Finance Committee of the said Company, or a majority of them, from time to time, to receive the bonds so to be endorsed by the City of Baltimore, and dispose of the same, the proceeds thereof to disburse, under the provisions of this ordinance; which persons shall give bond to the said Mayor and City Council of Committee Baltimore in the penalty of fifty thousand dollars, of Finance to with such surety or sureties as shall be approved give bond, \$55,000. of by the Mayor of the City, conditioned that they will faithfully apply all the bonds guar- Bond to be anteed by the City, under the provisions of this approved by ordinance, which they shall receive, or the pro-the Mayor. ceeds thereof to the purposes for which it is hereby declared the said bonds, or their proceeds, are to be solely devoted, and to no other purpose; and

Committee

249

ORDINANCE 11. when the said persons shall have given bond as aforesaid, the bonds for whose endorsement provision is made by this ordinance, shall be endorsed in the manner in this ordinance directed. and shall be delivered to them as the representatives of said Company, at such times and in such amounts as the same shall be required in the course, and for the purpose of the completion of the construction of the said Western Maryland Rail Road Rail Road as an independent road from the City to be an inde- of Baltimore to Williamsport, and for its equippendent one. ment, for which purposes alone it is hereby declared the said bonds or their proceeds shall be applied. And whenever in the judgment of the said members of the Committee of Finance of said Company it is necessary and requisite that a portion of said endorsed bonds should be delivered to them for the purposes aforesaid, they shall, at least ten days before the time at which they will Com. of Fi-require the delivery of said bonds, make a writnance to make ten application therefor to the Mayor and Comapplication in missioners of Finance of the city, and shall acwriting. company the same with a full statement in writing, under oath, showing for what items of Under oath. expenditure in the equipment of said road, or in said work of construction of said road, and on what part thereof, the said bonds asked for by Produce them, or their proceeds, are to be applied by them. and also proper vouchers showing the application vouchers. of all bonds endorsed under the provisions of this ordinance, previously delivered to them; and the said Mayor and Commissioners of Finance, upon being satisfied that a proper application has been made of all bonds so before delivered by them under this ordinance, shall deliver to the said Committee of Finance of said Company, at the time by them designated in their aforesaid written 'application, the quantity of bonds mentioned in their said application, unless in the judgment of said Mayor and Commissioners of Finance of the city, or in the judgment of a majority of them, the said amount is beyond what is needed for the purpose designated, in which event they shall deliver only such an amount of said bonds as in

their judgment, or in the judgment of a majority ORDINANCE 11. of them, shall be necessary for such purpose; and the persons so receiving said bonds shall see Persons reto and shall be responsible, as shall their bond, ceiving bonds for their proper application to the purposes desig-sible. nated by them as those for which said bonds are needed.

SEC. 6. And be it further enacted and ordained. That upon the removal, death, resignation, or Case of other disqualification of the persons above named death, &c., of as constituting the Committee of Finance of said Committee of Western Maryland Rail Road Company, or either Finance, no of them then up further of linear states of them, then no further delivery of the bonds be issued unmentioned in this ordinance shall be made to the til successor wid Western Maryland Pail Read Company until has bonded. successor said Western Maryland Rail Road Company until some other person shall have been designated by said Company to fill the vacancy thus occurring, and the person thus designated shall have given bond as aforesaid; and as often as a vacancy shall occur in the said Committee of Finance of said Company, and it shall be filled by said Company, and the person or persons thus appointed shall have bonded as aforesaid, they shall perform all the functions and discharge all the duties in reference to said bonds above designated, to be performed and discharged by those now constituting said committee; and two of said committee shall be directors on the part of the city. And if, in the judgment of the Mayor, the bond which shall have been given by the persons constituting the Committee of Finance of said Company, under the provisions of this ordinance, or any of them, shall become sufficiently impaired in value, by reason of a change in the pecuniary condition of the sureties, as to make it prudent that a new bond should be given, then no further New bonds delivery of bonds shall be made hereunder until to be given. a new bond shall have been given and approved by the Mayor, conditioned as hereinbefore provided.

SEC. 7. And be it further enacted and ordained. ## REPORT

OF THE

TO THE

## MAYOR & CITY COUNCIL OF BALTIMORE,

# From January 1st to October 31st, 1871.

## REPORT.

TAX DEPARTMENT, CITY COLLECTOR'S OFFICE,

Baltimore, November 1st, 1871.

To the Honorable the Mayor and

City Council of Baltimore :

GENTLEMEN :

I beg leave to present herewith for your consideration, the operations of this Department for the past ten months, viz: from January 1st to October 31st, 1871.

The report for this portion of the current year, is called for by the change in the fiscal year which now goes into effect.

On the levy of 1871 (basis \$210,310,975,) there has been collected \$58.42 per cent.

On the levy of 1870 (basis \$201,750,882,) there has been collected 93.96 per cent.—viz: 72.44 per cent. in 1870, and 21.52 per cent. in 1871.

On the levy of 1869 (basis \$198,829,489,) the total collections have reached 97.06 per cent.

On the levy of 1868 (basis \$194,635,064,) the total collections have reached 99.47 per cent.

Of the amount uncollected on the levy of 1869 one percent. is represented by the tax on mortgages. This tax is resisted on the ground that the act of the last Legislature which abolished it, is retrospective in its operation. There is a suit now pending which will determine this point. The annexed Tables give in detail the collections from January 1st to October 31st, 1871.

Table A gives the monthly collections of both City and State Taxes for the past ten months, amounting in the aggregate to \$3,074,187 34, of which the City's portion was \$2,-787,164 83, and the State's \$287,022 51.

Table B exhibits the basis of the several levies on which collections have been made this year, with the amount collected on each levy, and also gives the gross amount received from opening and closing streets and alleys, and advertising. This table shows that there has been collected

from taxes in arrear	747,325	82
and on the levy of 1871	$1,\!834,\!857$	27
from opening and closing streets, &c	204,981	$7\pm$

Total City Collections.......\$2,787,164–83 Table C gives the tax rates for the various items of the several levies, and Table D gives the amount collected for each item according to these rates.

Table E gives the per centage of taxes collected within each year from 1867 to 1870 inclusive, and for 1871 to 31st October, also the per centage collected to that date on levy of 1870.

Table F shows the per centage of taxes collected in each of the past ten months, viz: on levy of 1870 for January, February and March, and on the levy of 1871 from April to October inclusive.

Table G details the sources from which the amounts collected for opening, closing and widening streets and alleys has been received.

I deem it proper to suggest that in my opinion legislation is much needed for the revision of the whole system of taxation as applicable to the City of Baltimore. The present

266

mode of enforcing the payment of taxes is exceedingly cumbrous and involved, and a failure to comply in any one particular with the various requirements of the law, is fatal to the whole proceeding. This might be much simplified.

I would also beg to call your attention to the urgent necessity for some action in regard to the division of large tracts of land, assessed in many instances by the acre, and which are now being leased for building lots. It should be made incumbent on the original holders to furnish this department with accurate plats of the property thus divided, as otherwise it will be impracticable hereafter to determine on what portion of such ground the taxes are paid or may remain unpaid.

I can probably best illustrate my meaning by citing a recent instance where a large lot of ground, assessed by the acre, is being leased for building lots of  $16 \times 103$  feet, fronting on streets that have been or may hereafter be opened through it,—each lot valued at about \$100, that being its proportionate part of the entire assessment of say \$30,000. It will readily be seen that the payment of taxes on so small a portion of a large assessment, without a plat on which to designate the particular lot it represents, will inevitably lead to much confusion hereafter.

I make the above suggestion as it may not be practicable to have such property re-assessed by the front foot.

I find that the continual opening of new streets, and the construction of sewers, the collection of benefits for which purposes devolves on this office, has so largely increased our labors, as to render necessary the services of another bailiff, and I would therefore beg to recommend that authority be given to make such appointment.

All of which is respectfully submitted.

JAMES H. BARNEY, City Collector.

# ANNUAL REPORT

OF THE

TO THE

# Mayor and City Council of Baltimore,

From January 1st to October 31st, 1871.

# REPORT.

CITY COMPTROLLER'S OFFICE, Baltimore, November 1st, 1871.

### To the Honorable the Mayor and

City Council of Baltimore :

The undersigned, City Comptroller, herewith presents for the consideration of your honorable body, his annual statements of the receipts and expenditures by the several departments of the City Government; and also an account of the appropriations of the Mayor and City Council for especial purposes under Ordinances and Resolutions during the period ending October 31st, ult.

The accompanying report cannot illustrate thoroughly the business of the departments by a comparison with any previous reports in consequence of the Ordinance of the Mayor and City Council, changing the ending of the fiscal year to October 31st, (Ordinance No. 56, approved April 7th, 1871,) —the present statements, therefore, giving the transactions for a period of ten months only.

Under the Act of the General Assembly of Maryland, chapter 451, approved March 30th, 1868, the City Council is required to meet in Annual Session on the first Monday in November, of each year, instead of on the third Monday in January, as previously required under the Code of Public Local Laws. Heretofore the annual levy of taxes has been made about April 1st of each year, two or three months after the expenditures for the year have commenced. In view of th

#### REPORT OF THE

above change in the time of the Annual Session of the City Council by the Legislature, and the subsequent change in the ending of the fiscal year, by the Mayor and City Council, I would earnestly recommend that the Levy be made approximating as nearly as possible the beginning of the fiscal year, so that the collection of taxes may be commenced correspondingly early, and funds provided for the necessities of the city. It is also extremely desirable that the levy be made to *cover*, if possible, the entire wants of the several departments during each current fiscal year, thereby relieving the City Register from the annoyance, in a great measure, of providing funds by loans, &c. for appropriations for objects not included in the estimates upon which the assessment of taxes is based.

The Receipts into the City Treasury from January 1st to October 31st, were, (including Cash Balance January 1st, 1871, \$398,356 70) \$5,509,600 52. The Expenditures for the same period amounted to \$5,549,482 03, an excess of Expenditures of \$39,881 51. The Receipts on account of taxes by the City Collector compare favorably with those of a corresponding period for any previous year, and the revenue from other sources, Markets, Licenses, &c., is fully up to the estimates made at the end of the fiscal year. Under the operation of the law of Congress prohibiting the collection of Tonnage fees by any local State or municipal authority, after April 1st, 1871, the Harbor Master, on that date, discontinued the charges previously made upon vessels entering this port. The amount received from this source, during the year 1870, was \$16,806 98, which may be safely assumed as a safe approximate estimate of the loss to the City, under this law, for the present year. Licenses for Theatricals also show a falling off to some extent, owing to the reduction of the annual license for Theatres, Public Halls, &c. to \$50.

The sales of stalls in the new Lafayette Market, yielded \$76,430 00, which sum will more than cover the entire cost

280

of both the ground and building, and give the City the annual licenses and rental of the stalls as an annuity without outlay of capital. The improvements at the Lexington and Bel Air Markets will also return largely upon the expenditures under the appropriations of the Mayor and City Council for those purposes.

I would respectfully renew the recommendation so frequently made to your Honorable Body to create a new department, dissolving the old relation of the Commissioners of Finance with the City Register; placing the entire control of all the Sinking Funds, as well as of Stock issues and sales in their hands and requiring their business with the City Register to be transacted through the medium of the Comptroller's office, in the same manner as is that of the other departments.-The authority and duties of this office might also be modified to great advantage. It is now almost fifteen years since the establishment of the City Comptroller's department, since which time the duties under the original law have been, to a great extent, changed by subsequent legislation. At the beginning of a new administration it would be fitting to inaugurate steps looking to the remodeling and harmonizing of all the bureaus of the City Government. The City Comptroller should be the Auditor of the facts as well as the figures of each department to preserve perfect checks upon each; and, should have increased facilities not only in regard to the disbursements of appropriations made in behalf of the several departments, but also for acquiring information as to the working of those whose business is entirely separated from the control of the public funds. I will be glad to submit such propositions as I have in view to the Committee of the Council upon this office, and am convinced, should your Honorable Body approve them, the changes will be largely compensatory to the City in the more thorough and satisfactory statements of its condition which will be made feasible thereby.

In conclusion, the Comptroller would respectfully ask an appropriation for the purchase of a safe for his office. A great many valuable papers are entrusted to his custody, and it is desirable that some greater security be had for them than he now has.

Herewith, please find annexed the usual statements of the expenditures under appropriations of the Mayor and City Council, and the receipts from the various revenues of the City.

All of which is respectfully submitted.

SAMUEL MACCUBBIN,

City Comptroller.

# ANNUAL REPORT

#### OF THE

# JUDGES OF THE APPEAL TAX COURT,

#### TO THE

Mayor and City Council of Baltimore,

#### REPORT.

OFFICE OF THE APPEAL TAX COURT,

Baltimore, November 1, 1871.

To the Honorable the Mayor

and City Council of Baltimore :

GENTLEMEN:

A late ordinance of the Council directs, that hereafter the fiscal year of the city shall commence with the first day of November, and close on the thirty first day of October.

In accordance with this direction, we submit our report for the preceding ten months of the year 1871, from January 1st, to October 31st.

During this period the same spirit of improvement, which has marked the last three or four years, has continued to be manifested. The city is rapidly extending by its own natural growth, as will be seen by reference to the number of permits issued in the last ten months for new buildings, &c., and the number reported as liable to taxation by our Assessor since the first of January last.

The rapid and continuous growth of our city will be appreciated by the following brief statement of the number of permits issued for new buildings and improvements in the past three years and ten months, as follows:

In the year 1868	2,879
In the year 1869	3.012
In the year 1870	3 620
From Jan. 1, 1871 to Oct. 31, 1871, "10 months"	0,000
1011 0 thi, 1, 1011 to Oct. 51, 1011, "10 months"	3,185

Total......12,706

Showing a total of twelve thousand seven hundred and six. Annexed will be found a statement of the taxable basis presented to the Collector from 1867 to 1871, inclusive, with the assessments, collections and abatements thereon.

#### REFUNDS.

From January 1, 1871, to October 31, 1871, there have been one hundred and seventeen (117) orders for refunding of taxes given, principally for small amounts paid by parties_in error.

#### NEW ASSESSMENTS.

The number of houses assessed during the year up to November 1, and their cash value, will be seen by the report from our faithful and efficient assessor, Captain Thomas Gifford, as follows:

#### REPORT OF THE

#### BALTIMORE, November 1, 1871.

#### To the Honorable Judges of the Appeal Tax Court :

GENTLEMEN :

I submit to your consideration a report of new buildings and improvements, and the value of the same, as assessed by me since January 1, 1871, up to the present date, and apportioned among the several wards as follows:

Wards.	New Buildings.	Improvements.	Value.
1st		45	\$419,200
2d		10	28,200
3d		18	27,700
4th		9	16,650
5th		18	61,200
6th	139	14	211,600
7th		29	520,500
8th		5	108,600
9th		6	605,500
10th		14	200,600
11th		15	149,000
12th		9	325,700
13th		12	42,000
14th		12	59,200
15th		16	123,500
16th	149	34	169,100
17th		30	185,300
18th	252	25	374,900
19th		16	1,326,100
20th		19	304,000
Total	2,287	356	\$5,258,550

Respectfully yours,

THOMAS GIFFORD, Assessor.

#### TRANSFERS.

During the ten months of the present year there have been three thousand two hundred and ninety two (3292) transfers of property, showing an increase of two hundred and fourteen (214) over that for the same period of last year.

#### ABATEMENTS.

The total amount of abatements made during the year up to November 1, was eight miliins nine hundred and eighty seven thousand, nine hundred and sixty five dollars, (\$8,987, 965). Of this sum \$600,180 was from the basis of 1868; \$1, 174,001 from the basis of 1869; \$2,400,236 from the basis of 1870; and \$4,813,548 from the basis of 1871. The greater portion of the abatements was for personal property, caused by the fluctuations in trade and changes in business.

We have thus endeavored to give a brief, but fair exhibit of the affairs of this department for your consideration, and believe the facts will warrant us in saying that our city is steadily advancing with rapid strides on the road to wealth and prosperity.

Respectfully submitted,

BEALE H. RICHARDSON, EDWARD A. GIBBS, RICHARD C. WELLS.

DAVID HENLY, Clerk.

OFFICE OF THE WATER BOARD, No. 24 North Street, Baltimore, Dec. 16th, 1871.

To the Honorable the Mayor and City Council of Baltimore:

GENTLEMEN:

"The Water Board of the City of Baltimore" respectfully submit their report for the fiscal year ending October 31st, 1871, together with the annual reports of the Water Engineer and Registrar and Civil Engineer, as required by the City ordinance.

These reports show the operations of the Department for ten months only, in order to conform to the recent change of the fiscal year.

The several Lakes and Reservoirs are in perfect order.

The Conduit has been carefully inspected throughout its entire length and thoroughly cleansed.

Water was let into Druid Lake early in the year, since which time the whole supply of the City has been drawn from that Lake.

We are now able to report the entire completion of this Lake. The Tower and Observatory has been finished at a cost of \$4,519 10. A neat and substantial iron railing en closing the whole lake,  $(7,656_{105}^{65})$  feet,) has been erected at a cost, as per contract, of \$13,145 77, being \$1.77 per foot. The old stops, which were very defective and expensive, have been entirely remodeled, and the Stop House thoroughly overhauled and repaired. Experience has convinced the engineers that an additional supply Main will be required to feed Druid Lake, and it is the intention of the Board to lay such a Main in connection with the High Service Reservoir, now building. The Board has had under consideration for the past two years the subject of a better water supply for the high elevations in the Western and Northwestern sections of the city. Upon such information as we possessed at the date of our last Annual Report, it was supposed that a Stand Pipe would answer the purpose, at a comparatively small cost. Later investiga-

370

tions by the Water and Civil Engineers of the Department, in the course of which they personally inspected the various Water Works in Philadelphia, New York, Brooklyn, Boston, Newark and elsewhere, determined the Board to construct a High Service Reservoir in Druid Hill Park. This work was put under contract and commenced during the past summer, and will be pushed to completion as rapidly as the nature of the work admits of. For full description of this new work, and the reasons which decided the Board in its favor, as also for an account of the means at our disposal for the same, we respectfully refer you to a report submitted to this Board, in June last, by the committee to which the matter was referred for examination.

The drought during the past summer was of unexampled duration and severity, in consequence of which Lake Roland was drawn down lower than ever before; indeed, for eight months there was absolutely no overflow at the dam; during the same period the daily consumption of water largely increased, reaching as high a figure as 14,122,032 of gallons per day. Thanks to the great storage capacity of Druid Lake, the City enjoyed a full water supply, notwithstanding the drought, nor do we anticipate any serious inconvenience from short supply for several years to come. At the same time, in view of the largely increased consumption, we fully appreciate that the day is not distant when the water of the Gunpowder river must be brought to the City, and we are giving the subject careful consideration.

Looking at the steady and regular increase of the Revenues of the Department from Water Rents, there is good reason to hope that with proper management the Gunpowder supply can be brought to the city without subjecting the city to one dollar of additional taxation. For the past two years the increased revenue of the Department has been equal to the interest on a sum quite as large as we should think it desirable or prudent to expand in any one year on this work; and on the completion of the work the revenues might reasonably be expected to pay interest on the whole Water Debt and defray all the expenses of the Department.

We should not, however, advise any active effort in this matter until after the completion of the New High Service Reservoir, and the additional supply main for Druid Lake. But as the sessions of the Legislature are biennial, we would suggest that it might be as well to obtain, during the present session, such an amendment to the act authorizing the issue of Water Stock, as will enable the Mayor and City Council to take the sense of the people without unnecessary delay, when the time shall arrive for so doing.

Although the supply of water in the several Lakes and Reservoirs has been ample during the past year, it has not been possible, at all times, to furnish a satisfactory supply to all parts of the City. The explanation of this condition of things is found in the insufficient capacity of many of the mains. These were laid at a time when the finances of the Department did not admit of much provision being made for the future, and the rapid growth of the City in the last few years has greatly overtaxed them. This was especially the case with those mains laid along and near to the City limits, and from which latterals had been extended for the supply of premises located in Baltimore county. These supplies have seriously effected the city supply. And the Board finding that the present mains were not adequate for the supply of both city and county, and believing that the first duty of the Department was to furnish an ample supply of water to all parts of the city, have prohibited any further extension of mains beyond the city limits or any new supplies from the mains already laid. This action of the Board will of course involve some loss of revenue to the Department, but we have not felt that we had any right to weigh such pecuniary loss against the health and comfort of the people at whose expense the works under our charge was constructed.

It is the intention of the Board to continue those supplies heretofore granted beyond the city limits, as long as the necessities of the city will permit, but to allow no further draw on the mains.

We would again respectfully call your attention to the insufficiency of the annual appropriation of \$6,000 for "Fire Plugs and Pumps." This amount was fixed years ago, when labor and material were little more than half their present rate; moreover, out of this appropriation we have to provide public drinking fountains, which become indispensable as various pumps fail. This appropriation should not be less than \$10,000.

In like manner it is but simple justice to the water con sumers that an ample appropriation should be made to pay for the water used by the Fire Department.

Interest on the entire Water Debt, and all expenses of the Department, including New Mains, are now paid out of the revenues of the office, and there is no good reason why the expenses of furnishing water for fire purposes, or of maintaining public drinking fountains, should be borne exclusively by one portion of the community. We therefore renew the suggestion of our last annual report, that the City Register be authorized to allow the Department an annual rent of \$20 for each Fire Plug,

We have to report the loss, by death, during the past year, of a valuable and greatly respected member of the B and, Mr. Charles D. Slingluff. For the past four years, he has devoted himself to the business of the Department with all his accus tomed energy, with a mind single to the best interests of the City, whose trust he had accepted, and with an evenness of temper which endeared him to every member of the Board and every officer and employee of the Department.

We remain, very respectfully,

JOSHUA VANSANT, ex-officio, President. JAMES L. MCLANE, Secretary. GEO. U. PORTER, JOHN A. GRIFFITH, JOHN F. HUNTER, GEORGE P. THOMAS, Commissioners.

REPORT OF

# Committee on Better Supply

40

FOR HIGH ELEVATIONS,

#### REPORT.

The undersigned, appointed in June, 1870, "a Special committee to investigate the necessity for a better supply of Water at Lafayette, Square and vicinity, and also to report upon the best method of furnishing such improved supply," submit the following report :

We learn from a report of the Water Engineer, made in November, 1870, that there are within City limits seven hundred and sixty-two (762) acres of ground at elevations above tide of from 171 to 233 feet. Of this area, more than onehalf is built upon, and the remainder is being rapidly improved.

We are satisfied by the statements of numerous residents, fully sustained by the investigations of the Water Engineer, prosecuted under our directions, that at all points within this area, of greater elevations than 180 feet above tide, the supply of water is very insufficient. While, whenever Hampden reservoir is drawn down 6 or 8 feet, as it frequently is when cut off from Lake Roland because of the muddy condition of that Lake, very serious embarrassment is occasioned, even at elevations of 170 feet above tide.

In the opinion of your committee, therefore, "the necessity for a better supply of water" is urgent at all points 170 feet above tide, or in other words for the whole area of 762 acres above mentioned, and it remains only to determine the best mode of furnishing such supply.

The Board will bear in mind that Hampden Reservcir and Druid Lake, our present high service distributing works, have their water service, when full, 217 feet above tide, and are supplied by *natural flow* from Lake Roland, which is 225 feet above tide. All that can be accomplished by *natural flow* has been done, and any higher water surface than Hampden reservoir, for distributing purposes, can be had only by pumping.

The printed reports of the several Water Departments of Philadelphia, New York, Boston and Chicago, induced the belief that a STAND PIPE presented the means of increasing the Water head, at much less cost than a high reservoir, to be supplied by pumps, and your committee obtained plans and estimates for a STAND PIPE and engines, with all necessary high service mains, as early as November last, and were prepared to recommend a site for the location of the same which would have secured an elevation of 290 feet above tide.

Deeming it best, however, to defer action on so important a matter until the Engineers of the Department could make a personal examination of the several Stand Pipes and Engines already in operation elsewhere, and could learn from the engineers in charge of them the result of their experience of the actual working of the same, we requested Mr. Curran and Mr. Martin to visit Philadelphia, Jersey City, Brooklyn, New York and Boston, and to make a careful inspection of the different systems for pumping in use in those cities.

The very tull reports made by these officers, on their return in March, 1871, have already been before the Board, and have had controlling weight with this committee.

We find that all the Engineers with whom they conferred, agreed in the opinion that a Stand Pipe should never be resorted to when a *proper site* for a high service reservoir could be obtained, and they gave reasons for their opinions which appear to your committee conclusive. With a Stand Pipe, the engines must be kept constantly in motion—night and day. Stop the engines for a moment, for any cause, and the supply ceases. Therefore, to guard against accidents to the machinery, and to provide for necessary repairs, a double set of engines would be required.

Again, working the engines hight and day would necessitate

a double set of hands, and the consumption of fuel would be enormous, at the same time the wear and tear on the machinery would be greatly increased.

Thus, whatever might be saved on *first cost*, because of the cheaper construction of a Stand Pipe, would very soon be lost in the greatly increased working expenses.

On the other hand, with a Reservoir of 20,000,000 or 25,000,000 of gallons capacity, it would not be necessary to work the engines more than *three* or *four* days in each week, if so much, and not at all at night. For such a reservoir but one engine would be required, and that one neither larger nor more expensive than each of the two required for a Stand Pipe. But one set of hands would be needed to work the engine. The wear and tear would be greatly diminished, and the consumption of fuel very moderate, and attended with little or no waste.

In another important particular a reservoir possesses marked advantages. The supply of water would be regular and uniform, and not liable to interruption from accidents to the machinery; because a reservoir of the capacity here indicated would supply the High area (762 acres) when fully built on, for at least one week, without pumping.

Fully appreciating the disadvantages of the one and the advantages of the other system, your Committee at once set to work to ascertain whether a proper site of sufficient elevation above tide for a high service reservoir could be obtained.

It was all important that the site should be not less than 300 feet above tide, in order to deliver water to the upper floors of dwellings located on the highest points within the city limits, viz: 233 feet above tide.

On the score of economy, it was not less important that the site should be as near the city as possible, and of easy access for supply mains. In the same connection, the cost of land and right of way for the supply mains had to be considered.

Mr. Martin found by actual survey, that within Druid Hill Park, and at the distance of 4,400 feet from the head of Druid Lake, we could obtain all we required. Here we find

#### REPORT OF THE

a site, already the property of the city, at an elevation of 340 feet above tide, of sufficient area to admit of the construction at reasonable cost, of a circular reservoir, with inside diameter 500 feet, outside diameter at top 539 feet. Water surface when full 353 feet above tide, which with a depth of water 20 feet will have a capacity of 26,130.258 gallons

The formation of the ground between this site and Druid Lake, whence the supply for the reservoir would be taken, is well suited for laying supply mains, as well to the reservoir as from it to the city, and in both cases these mains would be laid in the Park, or in ground exclusively under the control of the Park Commissioners, an arrangement which presents very important advantages.

The subject was at once brought to the attention of the Park Commissioners, and they, with a desire to facilitate in every way a work of such prime importance to the city, cheerfully consented to the location of a reservoir on the site above indicated, as well as to a location for the pump house selected by our engineers

With this report we submit plans and estimates for a reservoir, of two sizes, together with necessary engine and pumps, and proper supply mains.

These estimates have been prepared with great care by the Water and Civil Engineers of the Department, who concur in the opinion that they are ample to complete the work. In a matter so purely professional, your Committee can have no hesitation in accepting their conclusions as correct.

Of the two sizes, we concur with the engineers in giving the preference to the larger, and, entertaining as we do, the opinion that such a reservoir, located as before suggested, in Druid Hill Park, and supplied by proper steam pumps of either the Worthington or Henderson pattern, as may hereafter be determined, of about 2,500,000 capacity in the 24 hours, will furnish a full supply of water to the highest parts of the city, and this in the best and surest manner. Your Committee respectfully recommend that such a work be put under contract at as early a day as practicable.

380

The Board will understand that the work here recommended will, in no way, involve any increase of the water debt, nor will any special appropriation by the city be required for it. In the judgment of your Committee, the Board has at its disposal ample means to accomplish the work, and that the Board may clearly understand the ground on which the Committee rests its opinions of the sufficiency of those means, we submit with this report a statement showing the present marketable value of the real estate and ground rents now held by the Board, to be in excess of the estimated cost of the proposed high service works. Our estimate of value for the real estate, will, we think, fall below the actual price obtained, as the establishment of a Public Square in the immediate vicinity of our lots, as recently authorized by ordinance of the Mayor and City Council, will naturally enhance their value.

The Board is aware that the Engineers of the Department have for some time past been satisfied of the necessity of laying an additional supply main from Hampden reservoir to Druid Lake, in order to maintain a full head of water at the latter. At present Druid Lake receives its supply by *two* pipes, each 30 inch diameter, and discharges water for city use by an equal number of pipes and of the same size ; another influent pipe would appear to be necessary under any circumstances, but will certainly be so when a further draw on Druid Lake is made for the supply of the High area, as now proposed.

We have, therefore, had prepared, and submit the same in connection with estimates for a new reservoir, an estimate of the cost of an additional influent pipe from Hampden reservoir to Druid Lake, and we would recommend that the same be laid in time to be available on the completion of the new high service works.

(Signed)

JAMES L. MCLANE, JOHN A. GRIFFITH, GEORGE U. PORTER, Special Committee.

June 5th, 1871.

On motion, the above report was adopted.

#### REPORT.

WATER REGISTRAR'S OFFICE, No. 24 North Street. Baltimore, Oct. 31, 1871.

# To the Honorable President

and Members of the Water Board:

GENTLEMEN :

In compliance with the provisions of City Ordinance, No. 56, of 1871, determining the Fiscal Year, for the corporation of the City of Baltimore, and changing the same from the 31st day of December, to the 31st day of October, and approved April 7, 1871,

I have the honor to submit herewith, my fourth annual report, embracing the first ten months of the year 1871, the Financial Operation of the Registrar's department, exhibiting in detail under their appropriate heads, the revenue collected and deposited with City Register, requisitions made upon the City] Comptroller, new supplies added, amount of disbursements, and abatements made during the same period of 1871.

In addition to the water rents, the department have received from sale of Real Estate during the first ten months of 1871, the following viz.:

From H. C	. Turn	bull, Esq.,	lot on	North	Charles
-----------	--------	-------------	--------	-------	---------

street	\$10,000	-00
From Talbott Denmead, Esq , lot on North Charles	· · · ·	
street, on account	29,716	00
From Ground rents and rent of lot near Mt. Royal		
Reservoir	1,904	44
Total	\$41,620	44

#### REPORT OF THE

The total gross receipts collected from all sources during the first ten months of the year 1871, from water rents, including dwellings warehouses, and water furnished by meter, to hotels, railroad companies, rolling mill, distilleries, beer breweries, coal oil refineries, sugar refineries, oyster and fruit packers, malt houses, cattle yards, rectifyers, white lead works, brick yards, tanners, chemists, and agricultural manufacturing establishments, including \$41,620,44, received for sale of real estate, amounts to 396,390 51.

Amount due Water Department, annual appropriation by the Mayor and City Council for fire plugs, pumps, public fountains, &c., \$16,000 00.

The disbursements made during the first ten months of 1871, was for working expenses, 40,307–25; six months interest on 5,000,000 00 water stock, 149,999–54; Christiana Bond, ground rent redemption, lot near Mount Royal Reservoir, 10,-000–00; on account of grading lot, Biddle and St. Paul's streets, 4,428,85; money returned, paid in error, and discount on 71 bills, 15,815–75; amounting to 220,551–39.

Showing an excess of receipts, over working expenses, interest on water stock purchase of real estate &c., of 175,839 12.

In addition to the disbursements of 220,551–39, there was expended for extension of mains for the first ten months of 1871, 34,171–18; Druid Lake 54,692–50; new high service reservoir, 3,907–40; meters 4,937–83; fire plugs, pumps &c., 5,054–89; amounting to 102,763–80.

386

I would request the attention of the Board, to the inconvenience experienced in identifying dwellings, &c., on many of the streets in the eastern and north-western section of the city, on account of the imperfect numbering; the many new improvements erected this year and without numbers increases the difficulty, and as a further means to increase a permanent revenue to the department, I would respectfully recommend to the Board to authorize a new survey of the entire city.

#### METERS.

The total number of meters applied to premises of water consumers is 247; of this number 102 are  $\frac{5}{8}$  in., 82 1 in., 28  $1\frac{1}{2}$  in., 18 2 in., and 17 3 in. They are attached to hotels, railroads, distilleries, oyster packers, beer breweries, and other manufacturing establishments.

I am gratified to be able to report that the revenue is steadily increasing, and the collections for the first 10 months of 1871 nearly equal to the entire collections for the year 1870, as will appear by reference to the following Summary of Receipts.

#### Summary of Receipts for 10 months, 1871, viz: January 1st to October 31st, 1871.

# REPORT.

To the President

and Members of the Water Board:

GENTLEMEN:

In compliance with ordinance No. 10, Sec. 8, which requires the Water Engineer to report in full the condition of the works under his charge, the amount expended during the year, and all such other information as may be required by the Water Board, I report as follows:

The fiscal year having been changed from Dec. 31st to Oct. 31st, the present report comprises but ten months of the year 1871.

Whilst the years 1869 and 1870 were remarkable for their long draught, the past summer has exceeded them. I am not able to report as in 1869, a constant overflow at Lake Roland, on the contrary during the months of July, August, September and October, there was no waste whatever, until it was occasioned by shutting off Lake Roland to clean out Hampden Reservoir. During the above months we fell off at times as low as eighteen inches below the face of dam. It was very clear that our supply was not equal to our consumption, which I ascertained to be in October, 14,122,032 gallons per twenty four hours. It will be readily seen why the supply of water at Lake Roland fell short of our consumption, when it is well understood how soon said Lake becomes affected and its water unfit for use by the most moderate rain, when I have to report that no rain fell that disturbed the water in the least from the 28th of March to the closing of the fiscal year, Oct. 31st, 1871.

I received many complaints of short supply from the high points of the city, during the very warm weather, and previous to the restricting of the use of the street washers, in June.

There can be no question of the utility of said order, and I regret to have to say that there was some persons who looked upon the order as an infringement of their rights, whilst the anxiety of the department was protection to those who were less favored with a good supply.

During the month of February we were obliged to shut off at Lake Roland in consequence of muddy water, fifteen days and fifteen hours. It is very apparent then, that without the use of Druid Lake, and as heretofore with but six days storage, we would have been obliged to admit muddy water into the city nine days and fifteen hours before it was in condition to do so.

I have occasionally received complaints of the disturbed condition of the water. They have been very often traced to local causes; for instance, a dilapidated hydrant will receive the surface drainage, and its first discharge will be very offensive; again, where pipe lines terminate and a connection hereafter very improbable, I am attaching blow out cocks. I have been desirous for persons who have grievances to report at once to the office.

Druid Lake having been in successful operation since February last, ample opportunity has occurred to test its working. It has been fully demonstrated, that with the great increase in our consumption of water, an additional pipe line is required from Hampden Reservoir; as at present arranged, there are two pipes which supply the lake from Hampden, and two pipes which supply the city from Druid Lake; they are all of the same dimensions; the two former enter the Lake against a twenty feet head, and the two latter leave it under a head of forty feet. You will therefore see the impossibility of keeping Hampden Reservoir and Druid Lake on a level, as their construction designed, unless the additional pipe line is laid.

The advance of tunnels by the Potomac and Union Rail Road, along our pipe lines, has required much attention during

the past season, particularly along Boundary Avenue, where we were obliged to move seven hundred feet of ten inch pipe, out of the line of tunnel. Said line of pipe furnishes the supply to the eastern section, high elevations. The Board being anxious to improve the line, and being obliged to move it advantage was taken to increase it to a twenty inch pipe. Some action is now taken to open Boundary Avenue. When it it is done. An advance with the twenty inch pipe as far as Belair Avenue would be of great benefit.

I have been obliged to have two trusses sixty feet long sprung across the tunnel at McMechen and Boundary Avenue to sustain the two principal mains. I have also been obliged to remove seventeen hundred and twelve feet of pipe for the Potomac Road and three hundred and thirty feet for the Union Road.

With the advice of Board, I have had laid thirty one hundred feet of six inch pipe in the north eastern section of the city. This main was laid for the purpose of relieving the now overdrawn high service main, and drawing from the low service supply. It was the proximity of the high service main that has heretofore caused the department to use it, but the elevation of the land will admit of a satisfactory supply from the low service reservoir.

I have had laid thirty three hundred and thirty seven feet of six inch pipe in the south western section of the city. The supply has been entirely inadequate heretofore in this section, which is improving. Immediately upon its completion seventy four additional rents, yielding nine hundred and fifty five dollars, was connected.

At the close of last year a contract was made to improve the twelve thirty inch stops, located in the lower stop house at Druid Lake. They are completed, and are admirably adapted for the work they perform.

I have appended a table locating all the meters now in use. There are two hundred and forty seven in service. They continue to work satisfactorily, and the suspicions of our people are quietly wasting away. There have been four miles, seventeen hundred and sixty five feet of service pipe laid during the ten months.

There have been seven miles, three thousand four hundred and fifty five feet of main pipe laid.

There have been forty six stops, and eighty nine branches connected.

In accordance with the directions of the Board, I, in company with the Civil Engineer, Mr. R. K. Martin, visited all the Water Works as far as Charlestown, Mass., with the view of getting general information, that might be beneficial in the preparation for the high service work now under construction in the Park.

As you are aware previous to our visit, we were somewhat impressed with the Stand Pipe system, but the farther we advanced the more firmly we became convinced that the system was defective. It is simply a safety valve upon their mains. The stoppage of pumps at once checks the supply, and the column is also at the mercy of a severe winter.

The opinion of nearly all those experienced in a water supply gives preference to the reservoir, if an elevation can be procured. We are much favored in that respect, as we have procured a site giving an elevation of three hundred and fifty feet, and the highest elevation we have to serve is but two hundred and thirty three. We reported in full the result of our visit. The reservoir is well advanced, and it is expected that the pumping anachinery will be contracted for early in the Spring.

#### LAKE ROLAND.

The flow of deposits into the Lake has been less than any year since its construction, but there already exists an accumulation that it would be advisable to remove at an early day. The slopes and riprapping have received their annual attention. The grass upon the slopes has been cut oftener than usual with the view of improving the sod. The screws on the gates have been taken out and sent to the lathe, and put in fine order. The gate house dam, land and fencing, are in good condition.

I refer you to inventory of property at Lake Roland.

-412

#### AQUEDUCT.

The banks near Cross Keys have received a top dressing of manure. The Culberts and fencing are in good order. In October six men passed through the Conduit, and swept its entire length from Harper's Waste Weir to Hampden Reservoir with hickory brooms, a distance of two and a half miles, the whole work is in excellent condition.

#### HAMPDEN RESERVOIR.

The grounds have been cleaned up, the grass on slopes has been kept cut close to benefit the sod. The reservoir was emptied October 18th and cleaned out, it was filled again October 22d. In filling the reservoir the conduit discharged per twenty four hours 25,057,937 gallons.

The riprapping along the the south west side was repaired, and the screen also. It is in good condition. I refer you to inventory for property.

Along our pipe lines on the N. C. R. R. all is well save the uneasiness that is felt about those rocks that lie in the bed of Jones' Falls near Mt. Vernon Factory; their tendency to divert the stream during floods, thereby endangering the pipe line, would make it advisable to have them removed. I have been advised, which will be done at an early day, to construct a sewer to carry off the spring water that accumulates near the west track, and then waste under pipe lines to the falls, thereby constantly disturbing their foundation.

#### MOUNT ROYAL RESERVOIR.

The usual white washing and painting has been done. I have had larger blow cocks put upon the mains in the Stop House. The grass on the slopes has received the same attention as at Hampden, and the property is in good condition. I refer you to inventory for property.

Expenditures of the Water Engineers' Department from January 1st to October 31st, 1871.

#### FIRE PLUGS.

As a precautionary measure for the winter, I have had all the fire plugs overhauled, and where repairs were required it was done.

There are one hundred and fifty five of the new style plugs in service. It is now three years since their introduction. They have given no trouble or expense for repairs, other than painting.

The Fire Department have used for extinguishing fires one hundred and eighty one plugs during the ten months.

FIRE PLUGS ERECTED FROM JANUARY 1ST TO OCTOBER 31ST, 1871.

# **CIVIL ENGINEER'S REPORT**

## REPORT.

BALTIMORE, November 1st, 1871.

#### Gentlemen of the Water Board:

As stated in my last Annual Report, the interior portion of Druid Lake was finished in December, 1870.

On the 2d of January, 1871, water was let into the Lake for the purpose of filling it, preparatory to its being used as a Reservoir.

In February of the present year Druid Lake came into use as a storage Reservoir, and has been in constant use ever since. Nothing has been done in the meantime to the inside portion of the Lake; every thing has stood as originally constructed.

Upon resuming work in May last, it was found that of the work to be done, the major portion consisted in embellishing or rendering sightly the surroundings of the Lake, where it had been necessary during the progress of the work to make excavations for material for construction. These embellishments were rendered necessary from the location of Druid Lake in a public Park.

The inside slopes of the Lake are rip-rapped from two feet above high water mark to ten feet below the same line, vertical measurement.

From the top of the rip-rapping to the top edge of the embankment surrounding the Lake is three feet, vertically or measured on the slope it is an average of nine feet.

This portion of the inside slope has been sodded and now

presents a fine appearance. The contrast between the gravel rip-rapping above water and the green sward being pleasing to the eye.

The insecure protection offered to visitors to Druid Lake, endered it necessary that a fence of some description should be erected around the inside edge and upon the outside top edge of the embankment. A light wrought iron railing, which does not obstruct the view, at the same time affords ample protection from accidents, has been erected upon the inside edge of the Lake throughout its whole extent.

A light wooden fence strongly built was deemed ample for the outside top edge of that portion of the Lake surrounded by embankment. The total length of the iron railing is  $7,656 \frac{76}{1050}$  feet; that of the wooden fence is 2,979 feet.

At the close of operations upon the Lake in 1870, the margin at the upper end was left in an unfinished state. Provision however was made to pass the drainage from the Park Lake as well as the surface drainage during the winter, in a temporary ditch.

The passage of this drainage permanently was a matter of some consideration. Several plans were thought of, and after mature deliberation, the following method was adopted. The drainage from the Park is received at the upper end of the Lake into an eighteen inch Scotch clay pipe and passed along under the outer edge of the margin on the north side of the Lake, and thence to the ravine on the north side, where it runs into Jones' Falls. The pipe has a fall in a distance of 2,200 feet of eight feet, which of course necessitated considerable excavation at the lower end to lay the pipe, but which is amply compensated in the extra width obtained around the margin, which now gives a passage way varying from 40 to 27 feet wide. At regular intervals of 100 and 200 feet along on the line of this pipe, brick traps are built, sufficiently large to admit a man to go down in and clean out whatever sediment may from time to time accumulate in the traps, below the bottom of the pipes. By means of these traps also, the surface

drainage which na'urally tends toward the Lake, is passed into the pipe and thence to the Falls, so that the only water that gets into Druid Lake is what is let in through the mains from Hampden Reservoir and what directly falls into it, in time of a rain.

The south side of the Lake or that part adjacent to the main entrance of the Park, is arranged in the same manner as the north side, only on the south side not having so much water to contend with, a smaller pipe was used, viz : a twelve inch. This pipe discharges its water into the ravine on the south side and thence into Jones' Falls.

To carry off the surface drainage from the north-west border of the Lake, an eight inch pipe connecting with the eighteen inch and the twelve inch pipes on the north and south sides of the Lake was laid, having a summit between the two pipes. This eight inch pipe catches the water that falls at this point, and directs it through the traps into the two pipes on either side and thence to the Falls below. Since these lines of pipes were laid there has been several heavy rains and the pipe capacity has been found adequate.

The Observatory which is located at the south-eastern angle of the dam, and which has lain in an unfinished state for the past four years, has been completed during the year. The inside is cased with brick and painted and an iron circular stairway erected on the inside leads to the top. The outside of this observatory has also been cleaned and pointed up.

Considerable amount of work has been accomplished during the year in the Stop House at the foot of the Dam. The former method of raising and lowering the stop-cocks, which are located there, was by means of a screw working in a nut on the inside of the stop, the screw then passing through the valve. This method had its disadvantages and gave a great deal of annoyance and trouble. It was found by experience that when anything got under the valve or the valve got canted by the pressure of water on the one side and not on the other, the fear was then that the screw being hid was liable to be stripped or broken by the double gear, with which the stops were worked. All this has been obviated by a hollow cast iron column open on two sides, which is bolted to the dome of the stop. At the top of this column, the screw attached to an iron rod covered with copper passing through a stuffing box, and thence to the valve below, is worked by a single gear wheel. The ease and security with which these stops are now worked, sufficiently compensates for the expenditure incurred in the alteration. The wooden platform around the stop-cocks in the Stop House has been replaced by a cast iron grate floor.

The ceiling of the Stop House has been ceiled with tongue and grooved stuff, oiled and varnished.

The inside of this house for four feet above the iron floor, as well as from the iron floor to the brick pavement below, has been wainscoted with yellow pine stuff. When painted this Stop House will compare favorably with any similar house in the country.

The clay and gravel pits surrounding the Lake, from which were obtained material for construction, have all been filled in, sloped and set in grass seed.

The amount received from the sale of old material, etc., and credited to Druid Lake up to October 31, 1871, was \$8,881 82.

The amount expended on Druid Lake from January 1st to October 31st, 1871, as shown by the books of the Department was \$54,692 50.

The total cost of Druid Lake up to October 31st, 1871, has been \$1,167,404 37.

Accompanying this report you will find an inventory of tools and material at Druid Lake amounting to \$4,532 40.

#### HAMPDEN RESERVOIR.

The water was let out of Hampden Reservoir in October, which had not been done for ten years. The condition of the works was found to be excellent. The slope wall lining was in as good a state as when first built, saving at the top where

364

the waves had direct action upon the stonework ; this needed some little repair, which was done.

There was found not over six inches of sediment in the bottom; this together with the fish was got out as well as possible and the water again let in.

#### CONDUIT.

Whilst the water was out of the Reservoir I inspected the conduit from Hampden Reservoir to Lake Roland and found every thing in the same excellent condition that it has always been since its construction.

The sediment on the top and sides of the conduit was broomed off and then washed out.

#### HIGH SERVICE RESERVOIR.

In March, 1871, a tour of observation was made by the Water Engineer, Mr. Curran, and myself, to the principal Northern cities for the purpose of ascertaining the best method of supplying the north-western section of our city with water.

After a full investigation and report to the Board, it was determined to pump water to a higher level, and thence by natural flow to the district to be supplied.

A sight for a Reservoir was selected in Druid Hill Park, a quarter of a mile north-west of the mansion, where an elevation of 350 feet above tide and 133 feet above our present height of supply is obtained.

After the necessary surveys were made, and the sanction of the Park Commission given to the location of the Reservoir in the Park, the graduation and masonry for the High Service Reservoir was let July 10th, 1871, to Patterson and Brother contractors, and work was commenced July 18th, 1871.

The shape of the Reservoir will be circular, with an internal diameter at the high water mark of 501 feet, having an area of water surface when full of 4 acres, 2 roods, 4 perches.

The embankment surrounding the Reservoir will be 15 feet wide on top, and three feet above the high water mark. The external slopes of the embankment will be 2 to 1 and the internal  $1\frac{1}{2}$  to 1.

The extreme depth of water will be 20 feet and the total capacity 26,241,116 gallons.

The amount expended upon the construction of the High Service Reservoir as shown by the books of the Department up to October 31st, 1871, was \$3,907 40.

Respectfully submitted,

#### ROBERT K. MARTIN,

#### Civil Engineer.

The illuminating power was determined with a Bunsen disc and standard Argand with fifteen holes and seven inch chimney, the gas burning at the rate of five cubic feet per hour, and the candle calculated to one hundred and twenty grains of spermaceti per hour.

WILLIAM E. A. AIKIN, M. D.,

Inspector of Illuminating Gas.

# REPORT.

....

Office of Inspector of Illuminating Gas, Baltimore, January 3, 1872.

Honorable Joshua Vansant, Mayor:

SIR: The accompanying table comprises the results of my observations on the character of the illuminating gas supplied to the city during the past year. It has been compiled from numerous, mostly daily, observations during the year on the gas from the works of the Baltimore Gas Light Co., and during the last six months on the gas from the People's Gas Co. The works of the latter Company not being fully in operation until about the middle of the year.

There is a slight difference in the illuminating power of the gas supplied by the two companies, but in both the standard established by the city ordinance has not only been maintained, but both show an average illuminating power much above the limit fixed by the law. Both have also been remarkably free from sulphur, the only impurity prohibited by the ordinance. The ordinary impurities of coal gas which are not referred to in the law, have also been carefully watched. Carbonic acid gas has been very rarely detected, and then only in very insignificant quantity. Sulphuretted hydrogen has not been detected at any time, and ammonia, though always present, has not appeared as abundant as formerly.— There would appear to be nothing in the chemical character of the gas, to explain the many complaints made against it on the score of deficient light-giving power. It is perfectly certain that if gas of suitable quality is supplied in suitable quantity and consumed from a burner properly constructed, the light it gives must of necessity be satisfactory. Then, if our gas does not give a good light, it is clear that either the quality of the gas is bad, or the quantity supplied is not sufficient, or the burner is badly constructed. But our gas, so far as chemical tests will show, certainly so far as the one requirement of the ordinance is concerned, is commercially pure. Being free from all reasonable objection on that score, the difficulty would seem to be due either to an insufficient supply or to defective burners.

A deficient supply of gas at the point where it is consumed, may be caused by a want of pressure in the street mains .--That pressure may not be sufficient to force the gas through the service pipes, they being of the proper size, or the pressure on the gas in the street mains may be all right, and the difficulty may be owing to the use of service pipes unsuitably small; pressure on the gas may be just what it ought to be at the works and in the street mains, but if the pipes that convey it through our houses are not proportioned to the number of burners in use, the gas supply to each burner will be insufficient, and the light will be defective. Pipes may be large enough to supply all the gas required for a certain number of burners, and yet be unable to supply double that number. If the demand for gas in any neighborhood should increase beyond the estimate that decided the diameter of the street main, no one could get a proper supply. Some time since there was a general complaint in the vicinity of one of our city markets, that the stores in the neighborhood could get very little light on the nights when gas was used in the

480

market house, while on other nights the stores had light The difficulty was entirely remedied by simply enough. substituting a larger main, one large enough to pass all the gas that was wanted. The quantity of gas that will pass through a pipe of given dimension under a given pressure, admits of calculation; if the calculation should be made a little too close and the service pipes in any building be of such size that the ordinary pressure in the street mains just suffices to supply the burners in ordinary use, then the addition of a few more burners would render the supply to each insufficient, or without bringing any more burners into use, a slight diminution of pressure in the main would show a want of proper supply and a corresponding loss of light. There is one large building in the city, where this difficulty exists, where the service pipes are too small to supply all the burners properly, and where the only remedy is the very costly one to replace the small pipes with larger ones.

The question of gas pressure is therefore intimately connected with the question of light. Should the pressure in the street main be excessive, it becomes objectionable as gas cannot be burned under excessive pressure without great waste. But this can be remedied in great part by the consumer .--The unnecessary pressure can be contracted by controlling the supply of gas admitted into the building, or by the use of governors. But for deficient pressure in the street mains, the consumer has no remedy. From all that I can learn, the numerous complaints of bad gas and bad light that have appeared in the papers within the last few months, have very probably been owing in great part to a want of proper pressure at the burner. But whether this was caused by want of pressure in the street mains, or by want of capacity in the street mains or by want of capacity in the service pipes, cannot easily be determined without a careful investigation in each

case. The ordinance specifies the kind of burner to be used in examining the gas. It must be an Argand burner of given dimensions, with 15 holes and a chimney 7 inches high, it must consume the gas at the rate of 5 cubic feet per hour, and must be used with a pressure of a column of water two-tenths of an inch high. This being the proper pressure to give the best light with that particular burner, no one could expect to get as much light from the same amount of gas used with the same pressure but with a different burner, one so constructed as to require a high pressure for its proper action. Thus it may easily happen that the weekly reports of the inspector will show the gas to have an illuminating power much above the standard, while the public with the burners in ordinary use will fail to get a satisfactory light, simply because the ordinary burners will not give a good light unless they are supplied with gas under a much higher pressure than that which suffices to give the best light with the standard Argand. The one, and only remedy for this difficulty is obvious enough, but how far it is practicable I am unable to determine.

If all gas companies could be required to supply consumers with gas of a certain purity, of a certain illuminating power, and under a certain pressure, there would be no reasonable cause of complaint left. In the meantime the private consumer must see that his service pipes have sufficient capacity; he must watch that they never become obstructed by drip; and he should select burners fitted to burn properly under a low pressure; and beyond this he can do very little.

• Complaint is sometimes made that the ordinary burners become obstructed by a deposit of what is called gummy matter. If the condensation of the gas at the works has not been properly accomplished, it may happen that some condensible gaseous matters will pass on and be distributed with the illuminating gas, and such matters condensing in the pipes and burners may produce difficulty. Such a condition of things would indicate great carelessness on the part of the gas company, and should be prohibited; but inasmuch as it is not prohibited, the public must try to believe that it is not likely to happen often, and that when it does happen, the company at fault will apply the proper corrective as soon as the matter is brought to their notice.

Let us now suppose the gas supply to be entirely unobjectionable in regard to purity; let us suppose it supplied through mains and pipes of proper size; let us suppose the pressure to be exactly what is required for the most perfect combustion; and yet, if the burners are not properly constructed, the light will be unsatisfactory. A burner may permit too much or too little gas to pass through; in either case we cannot get the best light. The necessity for selecting suitable burners for the most economical consumption of gas ought to be self evident. The importance of a proper selection may be inferred from the following abstract from the American Gas Light Journal, of a report by an English Commission appointed to investigate the question of gas supply to the metropolis:

"Even when burning at rates best suited to them, some burners give much more light in proportion to the quantity of gas consumed than others; the difference between good and bad burners being so great that the best give 70 and even 80 per cent. more light than the burners in common use. As a question of practical consumption of gas, it is true, the loss of the public from bad burners is never so great as these figures show, but certainly it may be taken at from 25 to 40 per cent."

To get the best light with the most economical consumption of gas requires some special arrangement to diminsh the rapidity of the flow of the gas as it escapes from the burner.

The double burner does this very effectually, if the lesser

# 484 , REPORT OF THE INSPECTOR OF ILLUMINATING GAS.

discharging capacity of the inner orifice is properly adjusted to the greater discharging capacity of the outer one. The material of which the burner is made is somewhat important; the porcelain or lava-tipped burners being less liable to corro. sion, preserve the original form of the orifice unchanged for a longer time, and are to be pre'erred to the metallic tips, which are rapidly corroded. In conclusion I must beg leave to remark, that a triffing amount is annually required to supply the necessary materials, as chemicals and apparatus needed in the daily work of this office. If the Inspector can be authorized to procure the necessary supplies to an amount not to exceed fifty dollars per annum, and send the bills to the proper city officer for payment, it would be sufficient for all ordinary purposes. Whenever the new City Hall approaches completion, it will be necessary to set aside an apartment for the use of the Inspector of Illuminating Gas, and to provide means to remove and fit up the apparatus necessary for his work.

> Respectfully, &c. WILLIAM E. A. AIKIN, M. D., Inspector of Illuminating Gas.

# ANNUAL REPORT

OF THE

# CITY COMMISSIONER

TO THE

# MAYOR AND CITY COUNCIL OF BALTIMORE,

From January 1st to October 31st, 1871.

.

# REPORT:

CITY COMMISSIONER'S OFFICE, Baltimore, November 1st, 1871.

To the Honorable the Mayor and

City Council of Baltimore.

GENTLEMEN:

In pursuance of the law and custom of this Department of the City Government, we have now the honor to report its operations during the last fiscal year.

The fiscal year having been made by ordinance of the Mayor and City Council, to terminate with the 31st day of October instead of the 31st day of December, as heretofore, this report will not embrace so long a period by two months, as our former ones. Hence, in order to present you an accurate comparative view of the growing utility of this office, we are constrained to refer more particularly than has been our habit to work under way, and which for the greater part will be completed by the close of the calender year.

The office of "Inspector of Buildings," however, was created by ordinance of the Mayor and City Council, approved June 10th, 1871. To it the matters of contracting for, and supervising the construction of, all public buildings—the issuing of permits for the erection of Steam Engines, Boilers, Frame sheds, &c, was transferred from the office of the City Commissioner.

This circumstance, while not reducing the number of topics for consideration and review, has nevertheless shortened our report on this occasion.

# GRADING AND PAVING NEW STREETS, ALSO RE-PAVING.

During the last ten months we have graded
and paved new streets amounting to
In addition to which we will complete by the
1st of January next
Making a total of square feet for the last
twelve months
The operations of the department under this head have
been for the last four years, or during the time we have had
the honor of holding our present position, unusually large,
as will be seen from the following statement, which shows the
number of superficial feet of paving for each year, since 1862
including the aggregate number of square feet of paved
streets, in the city, up to that time, as represented in the City
Commissioner's report for 1862 viz:
*
Number of superficial feet of pavedstreets in
Baltimore January 1st, 1862 28,574 866
Paved in 1863 20,849
1004
1000,
1000
·· ·· 1867
28,883 083
Number feet paved in the last four
years, viz:
In 1868 179,999
·· 1869 806,289
·· 1870
·· 1871 481,741
1,774 469
Whole area of paved streets in the city, (Square
feet.)

From this statement it will be perceived that, during the last four years, there have been paved 1,774,469 square feet of new streets, which are nearly equal to  $\binom{1}{17}$ , one-seventeenth of the whole area of paved streets in the city. This fact, perhaps beyond all others, clearly demonstrates the rapid growth and expansion our city has made during the time referred to.

The Grahamite Asphalt Company, by virtue of an ordinance of the Mayor and City Council, and by an application of interested property holders representing two-thirds of the front feet, are laying their patent Asphalt pavement on South street, between Baltimore and Lombard streets. Like all improvements of this character, it will take a little time to develope the merits or demerits of this pavement and enable us judiciously to compare its cost for repairs, &c., with the cost of those we have in use.

In accordance with resolution No. 244, approved 14th of June, 1869, we removed the track of the Baltimore and Ohio Railroad and the Northern Central Railroad Companies from the bed of Howard street, between Baltimore and Cathedral stree's, on the 1st of May last, and repayed the street, or that part from which the track was taken.

We regret to say, however, that some difficulty has been experienced in collecting the cost of this work from the property holders, who, in their petition to the Mayor and City Council, agreed to pay the expense of the same. About one fifth of the amount has been received. The balance of the unpaid bills will be placed in the hands of the City Solicitor, with the instruction to institute suit for the recovery of the same.

The grade of West street, between Hanover and Leadenhall streets, at the intersection of Race street, was raised  $3\frac{1}{2}$ feet, and an open culvert (8) eight feet wide constructed across the street in order to prevent the overflow of water, which, during heavy rains and high tides, flooded it to such an extent as to render it impassable, and also extremely detrimental to the health of the inhabitants of that locality.

It is quite unfortunate that the grade of this (West) street, also Cross street at a similar point, was established so low, being only about (3) three feet above mid-tide.

During high tides, produced by south-east winds, in connection with heavy rains, a large surface of the streets in the vicinity is inundated, much to the injury of the property situated on them, as well as tending seriously to engender sickness.

The course of the water from South Howard street, along Ostend street to Sharp, was changed in compliance with a resolution of the Mayor and City Council, and conducted down Howard street to the Spring Gardens, by altering the grade at the intersection of Howard and Ostend streets, and constructing an open sewer under the bed of the Baltimore and Ohio Railroad. This has made a very desirable improvement, and cost less than one-half of the estimated cost of a tunnel.

Court House Lane, between Calvert and St. Paul streets, has been repayed with the Nicholson pavement, in pursuance to a general ordinance.

#### REPAIRS OF PAVED STREETS.

Our paved streets, embracing as we have seen over thirty and a half millions of superficial feet, have been during the year kept in a very good condition, with the emparatively limited appropriation (\$45,000) for that purpose, involving a cost of less than one-sixth of a cent per foot. Small as this cost per foot really is, it were possible to diminish it materially if successful efforts were made to conform, as far as practicable, to the suggestions we had the honor to convey in our last Annual Report. We beg to repeat it.

Reference was made "to a great source of expense attending the repairs of streets, resulting from the laying and repairing of gas and water pipes. Of course the trouble and expense necessarily involved cannot be entirely overcome, but may be partially lessened by laying the pipe, when practicable, previous to the paving of such streets as require their introduction. It often occurs that soon after a street has been paved, trenches are opened for gas and water purposes, its entire length. This at once breaks the keying or bond of the paving, and causes a settlement, from which the grades of the streets can only be restored by re-grading. It would, besides being much cheaper to the city on account of repairs of streets, also prove far less expensive to the Gas Company and Water Board, if the pipes were laid before rather than after the paving of the streets had been comdleted.

#### CONSTRUCTION OF BRIDGES.

A new iron bridge over Jones' Falls, on the line of Decker street, now in the course of construction, will be completed by the close of the current year. This bridge is 117 feet clear span, measured in the street line, and 66 feet wide, and excepting the flooring is composed entirely of iron. The completion of this structure, in connection with the bridge erected by the Northern Central Railroad Company over their road, on the line of the same street, opens up another important highway, much to the relief of Charles street Avenue. A wagon bridge has been erected over Jones' Falls, at Centre street, near the foot bridge, which was put up immediately after the flood of 1868.

#### REPAIRS OF BRIDGES.

The bridges have been kept in good condition by renewal and repairs of flooring, &c. No extraordinary repairs were resorted to in connection with those crossing Jones' Falls, with the exception of the Draw-Bridge, which must be reconstructed during the coming year.

The old Belvidere Bridge, to which we have referred in each of the reports we have had the honor to present, has been repaired and supported as far as practicable. Three years since an appropriation was made to construct a bridge over Jones' Falls, on the line of John street, with the view of superseding this bridge, but owing to the fact of John street, between Greenmount Avenue and Belvidere Road, not having been condemned, the work was necessarily postponed. We regret to say that we fear the old bridge will either have to be closed to travel, or be reconstructed entire, before the condemnation of John street will be consummated. This is a matter of vital importance to the public, hence we beg to call your special attention to it.

#### HARMAN BRIDGE, OVER GWYNN'S FALLS.

By resolution No. 234, approved October 25, 1870, we were appointed an arbitrator, with the power to notify the owner or owners of the Harman Bridge, over Gwynn's Falls, to appoint, within sixty days, an arbitrator for the purpose of ascertaining the cost and purchasing said bridge for the City, under authority of an Act of the General Assembly of 1835, Chapter 24, and its various supplements. We proceeded to notify the owners, who appointed an arbitrator, as required; but after a few interviews with him, we discovered that the various supplements of 1836 and 1867 repealed the section of the Act of 1835, which gave the city the right to purchase the bridge *at its original cost*, and enacted that, when the City assumed control of said bridge, it should *pay the owners its present value*, at the time of taking possession.

After consulting the law officers of the City, together with the Mayor, on the subject, it was decided that the *present value* would include the franchise or revenues of the bridge, as well as the cost of the superstructure. This would have in-

#### CITY COMMISSIONER.

creased the amount so far above that supposed by the Committee on Bridges to be sufficient for the purchase, when they recommended the passage of the resolution above mentioned, that when we called their attention to the fact, after mature consideration they secured the repeal of the same by the Council.

We would state in connection with this subject that the City has the right to construct a new bridge, or crossway over Gwynn's Falls, near to, and parallel with the present structure, which can be accomplished for at least one-half of the estimated value and franchise of the old one, and the right of way for the same can be had without cost.

#### PUBLIC SQUARES.

The two squares on Eutaw Place, lying between Lanvale and Mosher streets, the work on which was commenced last year, have been enclosed with an iron railing supported upon a granite base, similar to the square lying between Lanvale and Dolphin streets.

Last year we were directed by resolution to enclose the two squares on Broadway lying between Fayette and Orleans streets, in a manner corresponding to those that had been previously completed; the appropriation for which was to be taken out of the levy for the present year. Before beginning the work, however, we discovered that the amount of the appropriation, which was made without consulting us, was sufficient to enclose (including the squares just mentioned) the square lying between Jefferson and McElderry streets. When this fact was made known to the Council we were directed to enclose this last mentioned square also-all of which will be completed before the 1st of January next. At Eastern Spring and Battery Square, a number of seats and benches has been added-also, at the former a number of evergreens has been set out, and the grass and walks have been much improved.

#### REPAIRS AND CONSTRUCTION OF SEWERS.

The sewers of the City have received the usual amount of repairs during the year—several of them, especially the sewer over Chatsworth Run, required considerable work, at divers periods, to prevent serious damage to property adjacent and binding thereon. To the remarks made in a former report on the defective manner in which, for the most part, our sewers are constructed, particularly in regard to their alignment, we would again invite your attention.

We were directed, by resolutions of the Mayor and City Council, to construct the following sewers, viz: on Ann street between Barnes street and Belair Avenue; on Calhoun street from Franklin to Thompson, and from Adams to Mosher street; on Oliver street, from Decker to Jones' Falls via Morton alley; on John and Mosher streets, from McMechen to Elm street; on Druid Hill avenue, from Wilson street to North avenue; and on Mulberry street from Carey to Republican street.

The plans and specifications for them have been completed, and two of them, viz : the Ann street and Druid Hill avenue, sewers have been put under contract. Owing to the lateness of the season, and the fact the appropriations for their construction were not included in the levy for 1871, the work was postponed, and the appropriation will be carried for the levy of 1872. The appropriations for the Ann street and Calhoun streets will not be sufficient to complete them, as contemplated by the resolutions ordering their construction. Judging from the lowest proposal received for the work of each, the former will require an additional amount of \$5,000, and the latter \$3,800.

The movement to construct a sewer on Liberty, Howard and Camden streets, gave rise to litigation which for a while threatened to be troublesome. This has been adjusted, and plans for the work are now being prepared and will be completed in time to commence its construction early in the next season. There has also been some delay experienced in commencing the sewer from the foot of Scott street to the Spring Gardens, for which an appropriation was made in 1869. This delay was occasioned by difficulties encountered in condemning the ground necessary for its course. A sewer has been constructed on Fulton avenue, between Baker and Presbury streets, eight feet in diameter; another across Pennsylvania avenue, at Oxford street; also a large culvert, twelve feet in diameter, across East Monument street at the intersection of Patapsco street. The sewer at the intersection of Mill and Pratt streets, which has heretofore given much trouble, has been completely overhauled and enlarged, and is not likely again to cause embarrasment.

#### REPAIRS AND CONSTRUCTION OF PUBLIC SCHOOLS.

In our last report we alluded to the fact that school house No. 17, which we had been directed to erect on the lot in the rear of House No. 2, at the corner of Bank street and Broadway, had been delayed in consequence of a difference of opinion in the School Board as to the location, so late in the fall as to prevent the commencement of the work. Early in last Spring, just as we had prepared to begin the work, we were directed by resolution No. 48, to change the location of this house, and a lot was obtained on Washington street between Fayette and Hampstead streets, on which the building has been completed, with such alterations in the plan as to adapt it to the new location and requirements of the school. An iron railing was put up in front of the Eastern Female High School, which was necessary to protect the building.

The repairs of school houses, as well as their construction in connection with other public buildings, it will be remembered was transferred to another department in June last, hence we have little to report under this head, except that,

during the period they were subject to our control, they received proper attention.

#### BAY-VIEW ASYLUM.

The roof of the Cupola of Bay View Asylum was thoroughly repaired, and, together with the entire exterior of the main and other buildings attached thereto, painted. The parlor, public reception rooms and offices were also repaired and painted.

#### LAMPS AND PILLARS.

During the year we have put up 145 additional lamp posts, and renewed 57 which were broken, also furnished 206 new gas and 44 oil lamps.

#### FLAG STONES.

Besides the renewal of flag stones, or substituting the wide for the old narrow ones, at a number of street crossings, we have also placed them in front of several Churches and other points, in pursuance of resolutions of the Mayor and City Council. These wide and substantial flags, which were introduced a few years ago, are highly appreciated by the public, and in time will prove more economical than those formerly used.

#### MARKET HOUSES.

In our last Annual Report we referred to three market houses in the course of construction, viz: Lafayette, on Pennsylvania Avenue; Lexington, between Paca and Eutaw streets, and Bel Air, on the space at the east end of the present market of that name.

496

Two of these houses, Lafayette and Bel Air, when nearly completed, were blown down, during severe storms last winter. After strict examination and review of the details of the plans, it was deemed necessary to further strengthen these houses, by additional braces &c., the plans for which were submitted to the Council, and we were authorized to carry out the same, which has been accordingly accomplished in the most substantial manner. Full descriptions of these houses, with their dimensions, &c., were given in the report above referred to.

In the Lafayette Market, which covers an area of 433x77feet, there are '64 butcher and 144 shed or vegetable stalls. These stalls were sold during the year, for \$15,000 over and above the entire cost of the market house and lot on which it is built.

In the reconstruction of the Lexington Market, which occupies a space of 330x66 feet, we succeeded in gaining 6 additional butcher and 12 vegetable stalls, the sale of which very nearly paid for the entire cost of the new house. We also introduced into this market iron drain pipes, which are a great improvement, in connection with the ice-boxes used by a majority of the butchers.

The Bel Air Market, occupying a space of 152x60 feet, a part of which has been converted into a fish market, contained 20 butcher and 56 vegetable stalls, which, taken at the prices brought by stalls sold at the other markets, will produce an amount much in excess of the cost of the entire building.

The construction of the Armory for the 5th Regiment Maryland Guards, over the Richmond Market, was transferred along with other public buildings, in June last, to the Inspector of Buildings.

#### PERMITS FOR SHEDS, BAY WINDOWS, &c.

The revenue derived from this source, before being placed

under the direction of the Inspector of Buildings, on the 2d of June last, was as follows:	
For Frame Sheds and Signs\$1,450 53	
" Bay Windows	
" Steam Engines and Boilers 250 00	
\$2,000 53 The revenue accruing from permits, vaults, areas and sewers, during the year was	•
\$1,573 73 Total\$3,574 26	

### TUNNELS OF THE UNION AND BALTIMORE AND POTOMAC RAIL-ROAD COMPANIES.

These works which have been under way since last spring, extending entirely across the City from its western to its eastern limits, are of great magnitude and importance. And passing in their course through a very valuable portion of the City, require on the part of those having them in charge, much care and caution, which, with few exceptions, has been well observed, and therefore have given us but little trouble.

THE CITIZENS' PASSENGER RAILWAY CO.

The Citizens' Passenger Railway Company, have laid their tracks in pursuance of an ordinance of the Mayor and City Council, extending from the north-western to the south-eastern limits of the City, and are now completing another section, on Howard street, in compliance with a supplementary ordinance.

It would be well, in granting the important franchise to corporations to lay tracks in the streets of the city, to attach a penalty to the ordinance for the non-compliance to certain obligations, to which they are required to conform.

#### MISCELLANEOUS.

During the year Boston street has been shelled; E. Fayette street has been repaired and partially shelled, and the Washington Road has also been repaired. The old fort on E. Monument has been removed.

Iron plates have been placed across the following crossgutters: at Light street and Williamson street and alley; at the intersection of Charles and Reed streets; Charles and Centre streets; St. Paul and Centre streets; also across Park Avenue at Camel alley, and at the intersection of Calvert and Centre and Monument and Calvert streets. These iron plates make easy and pleasant crossings over gutters, which, before being improved, were not only inconvenient, but dangerous.

The Circuit Court room has been improved by the introduction of extra windows, &c., with the view of its better ventillation, and comfort of those who frequent it. A new plastic slate roof has been put on the south side of Lexington Market, been Paca and Green streets; also, a roof of the same material on the south side of the north wing of the Hanover market. The eves of the Lexington have been lined with boards, and Broadway market house white-washed and otherwise improved.

#### CONCLUSION.

After having presented you with a faithful exhibit and review of our last year's operations, we have only to add, in conclusion, that we have not exhausted the appropriations accredited to this department, by \$216,345–58. 'This can be accounted for, however, from the fact that, a number of the special appropriations, or those made after the general levy, were passed too late in the year to render it practicable to complete the work for which they were severally designed; and that with few exceptions, all the finished work has been completed *within* the amount appropriated for it.

The cost of work referred to in this report when not specified, can be ascertained by an inspection of Table A, hereto appended.

We are indebted to Mr. L. E. Slicer, Assistant Commissioner, and Mr. G. P. Woodward, Clerk of this Department, for valuable aid in conducting its arduous and extensive operations.

Respectfully submitted,

J. H. TEGMEYER,

City Commissioner.

# LIST OF TABLES ANNEXED TO THE CITY COM-MISSIONER'S REPORT FOR 1871.

Table "A" exhibits the amount of appropriations, the amount expended and the balance due on the several appropriations for the year 1871.

Table "B" exhibits the amount of balance on appropriations for 1871, for work not completed, and balance due on work completed during 1871.

Table "C" exhibits the number of streets and alleys paved and repaved during 1871.

Table "D' exhibits the number of streets under contract for paving,

Table "E" exhibits the amount of superficial feet of paving in the City to December 31st, 1870, and the amount of superficial feet of paving during 1871.

Table "F" exhibits the revenue received in the Department of the City Commission during the fiscal year ending October 31st, 1871.

# ANNUAL REPORT

OF THE

TO THE

Mayor and City Council of Baltimore,

From January 1st to October 31st, 1871.

•

# REPORT

OFFICE OF THE PUBLIC PARK COMMISSION, October 31st, 1871.

## To the Honorable the Mayor

and City Council of Baltimore :

The Public Park Commission present respectfully their Twelfth Annual Report.

Heretofore the Commission have been in the habit of making their annual report so as to include the twelve months of each current year. Now, however, in accordance with the notice of the Mayor to that effect, the report for the current year will include the ten months only, up to the 31st of October, which will be, of course, the starting point of the reports hereafter.

#### DRUID HILL PARK.

Much work has been done at this park during the last ten months, and a larger force has been employed than at any time previous. The connection of the drive with the avenue that the Water Board had completed around Druid Lake, suggested several changes, involving considerable labor, from the northern extremity of Swann avenue towards Spring Lake. The grade of the drive where it crosses the rivulet from the skating pond has been considerably raised, and the width of the drive between the rivulet and Swann avenue increased in width. Druid Lake Avenue was completed to

#### REPORT OF THE

the north of the Lake, and much work done in filling the great gravel pits excavated during the construction of the Lake, and smoothing and bringing into shape the surface of the ground in a portion of the Park that had become attractive to the public. A new road has been completed in the north west section of the Park, made necessary by the construction of the new, or upper reservoir; and an entirely new road is in progress of construction in the eastern section, which when completed will throw open to the public a portion of the domain of singular beauty. The work here referred to, generally, as having been done during the last ten months in connection with the roads of the Park, will be described in detail in the Engineer's Report.

# THE APPROACH FROM MADISON AVENUE.

This is still imperfect, and will probably remain so until the litigation which the condemnation of a portion of the property required to widen it at its southern extremity, next to North avenue, shall have terminated, or existing difficulties shall have been obviated by the action of the county authorities.

# LAND TO BE OBTAINED WITHIN THE PARK.

Early during last spring, the members of the City Council were invited to visit Druid Hill Park to receive upon the spot the explanations that the Commission desired to make with reference to the land within the limits of the Park belonging to others than the city, as well as in regard to certain improvements for farm purposes, and an extension of the water supply. The opportunity was taken on this occasion to show the members of the Council the use that had been made of the Fort near the main entrance in connection with the improvement of the Park.

The result of this visit was the passage of resolutions au-

thorizing the condemnation of the property not owned by the city, an appropriation of \$11,000 00 for the erection of farm buildings, and \$10,000 00 for the water extension. It was the unanimous opinion of all who visited the Park on this occasion that the retention of the Fort, coupled with the improvements near it, had been eminently judicious. The Commission, are able to say that the farm buildings and the water extension have been completed within the appropriation of the Council.

Since the last report, however, it has been ascertained that more land than was then supposed to be in outside hands, within the limits of the Park, has yet to be obtained by purchase or condemnation.

Among the original purchases was a lot near the German burying ground of seven acres and three roods, purchased from Hugh Gelston at \$700 00 an acre. The title to this, submitted to the Counsellor of the city, was found, on its face, to be unexceptionable. A link in the chain, however, was a will duly admitted to probate and apparently all sufficient to pass a title, but which was alleged to be a forgery, and of course void for all purposes. This was found to be the fact at the trial before the Circuit Court of Baltimore County; but, inasmuch as Mr. Gelston and the city had enjoyed an adverse possession for upwards of twenty years, this was held to protect the latter against all claimants whose rights were not saved by their minority, so that, in fact, the city was held to be responsible for but four-sevenths of the property. An appeal has been taken to the Court of Appeals. What the result here may be, is doubtful; the Commission however think it prudent to look at the case in its worst aspect. Since the passage of the ordinance authorizing condemnation the Commission have endeavored to ascertain the views of the holders of the German burying-ground, and Mr. Presstman, looking to a purchase of their respective properties, but regret to say that the amounts asked seem to leave no alternative but condemnation, which it is proposed to proceed with at an early date.

#### THE PARK RAILWAY.

The completion of the connection between the Madison and Pennsylvania avenue routes of the City Passenger Railway, has relieved the Commision from the necessity of maintaining their track on North avenue; and the public in consequence are relieved from the nuisance of steam on this important highway. The buildings connected with the Park Railway for the shelter of cars and engines have been removed to the junction of Lawson's lane with North avenue, and the Park has been freed from an unsightly incumbrance as well as a dangerous one, owing to the immediate proximity of the farm buildings.

#### UPPER RESERVOIR.

The exigences of the north-western portion of the city in regard to water having induced the Water Board to determine to construct a reservoir at an elevation sufficiently high to meet all reasonable demands, the Water Board applied to the Commission with a view of ascertaining whether the city, without going beyond the limits of its own property, did not already possess a site of sufficient elevation in Druid Hill Park; and after a very full and careful investigation a spot was selected in the north-western angle of the Park suitable for the purpose, and on which it was believed that the proposed works could be erected, without materially interfering with the convenience or picturesque of the Park. There can be no question that the Park Commission would have much preferred that the Water Board had been able to find a spot outside the Park equally suited to their purposes, for there can be little doubt that the new construction will contribute nothing to the beauty of that portion of the Park in which it is situated. Taking all things, however, into consideration, and looking upon the Water Board and the Park Commission as being equally interested in the concerns of a common principal, the City of Baltimore, the Commission, after stipulating with the Water Board for the supply of water for park purposes from the new reservoir, and the construction of the roads whose location had to be changed, assented to the work, which is now being pushed rapidly to completion.

The value of the permission thus given to the Water Board might very fairly be charged to it in dollars and cents, and a credit to the same amount be claimed from the resources of the latter for Park purposes. The common interest, however, already referred to, has rendered this unnecessary; and the matter is now mentioned only in proof of the harmonious co-operation of the Commission and the Board in a matter of much interest to the City.

#### PATTERSON PARK.

In addition to the improvements mentioned in the last report, the Commission have erected a building for the sale of refreshments, as well as the convenience of visitors, and have also provided, in anticipation of the coming winter, better accommodations than have heretofore been had for the use of visitors at the skating pond. The Commission refer to what they stated in their last report looking to the extension of the Park.

#### BATTERY SQUARE.

By a resolution of your Honorable Body, the Park Commission were authorized to enlarge Battery Square, within certain bounds indicated in the plat referred to, and extending southerly to the Patapsco, provided, however, that the cost of the proposed addition was not to exceed \$100,000 00.

The Commission entered at once into a negotiation with the proprietors of the land that would be required for the proposed enlargement, and ascertained that the price demanded was \$325,000, exclusive of an avenue of 100 feet in width, by which the Park was to be 'surrounded; inasmuch, however, as the proposed addition was intersected by the Locust Point Branch of the Baltimore and Ohio Railroad, which, if made the southern boundary, would effect in a great degree the object which the projectors of enlargement had in view, to wit: the extended landscape in the direction of the bay. The Commission ascertained the price demanded for this, to wit: \$135,000, a sum also in excess of the Council's appropriation. With no power, to proceed in carrying out the ordinance, all the Commission could do was to make a special report to your Honorable Body, a copy of which will be found in the appendix.

#### PLANS FOR THE ENSUING YEAR.

Those suggested in the last report have as already stated been carried out, so far as the farm buildings and the water extention are concerned. Those still to be perfected are the purchase or condemnation of the lots of outside parties already referred to, and the completion of roads already commenced, the construction of new ones, and the maintenance of the whole in perfect order.

The Commission propose during the coming year to erect a suitable residence for the Engineer and General Superintendent, which shall not only furnish him with accommodation and conveniences which have long been required, but which will add, in their architectural beauty, to the adornment of the Park. Nothing but narrow means has prevented this from being done long before. Its necessity, however, permits no further postponement.

#### CITY OFFICE.

The enlarged operations of the Commission and the in-

#### PARK COMMISSION.

convenience to which all having business with it were subjected in being compelled to go the office at the Park, as well as the importance of a place where the Commission could meet, and where many of their papers could be kept, without trespassing upon the private office of the Mayor, made it prorer that the Commission should open an office in the city for the transaction of its business. When the City Hall shall be completed, accommodation will, doubtless, be provided for the Public Park Commission three; in the meanwhile the office of the Board is at No. 42 St Paul street.

#### NEW COMMISSIONER.

The resignation of Mr. Ramsey ,since the date of the last report, having created a vacancy, it has been filled by the election, ratified by your Honorable Body, of James Webb, Esq.

Appended hereto will be found report on Battery Square.

# ENGINEER'S REPORT.

DRUID HILL PARK, October 31st, 1871.

## To the Public Park Commission :

GENTLEMEN :

The Ninth Annual Report of my services as Engineer and General Superintendent is respectfully submitted, as follows:

During the first months of the year a moderate force of workingmen was employed in the usual way, followed for years and required by local circumstances. Cutting out dead trees and limbs, grubbing and burning brush, mauling and cording wood, hauling wood and stumps, cleaning snow from Skating Pond and Park Buildings, hauling manure to compost pile, cleaning drains, repairing roads and walks, are amongst the items of winter-work which was carried on towards spring, with the additional work of leaf-raking and cleaning up generally.

With the beginning of spring new work of construction was laid out and pushed on with increased forces. The approach to the new Lake Avenue from existing park roads, which in former years answered their purpose, but were now considered too narrow, was widened and graded in accordance with the Lake Avenue (of last year's description,) so that one road may be considered a continuation of the other. This improvement began at the head of "Swann Avenue," and passing the head of Druid Lake, joined the south and east approach to the Mansion, together with the Druid Lake Avenue. The finishing and grading of the latter was subsequently taken up again and completed by the end of the year, whilst at the same time other work in different sections of the park was going on.

There was a great deal of work to be done at this avenue on account of an old extensive gravel pit (in the vicinity of the Lutheran Burial Ground) which had to be filled up, and the high steep banks of a late gravel pit, originated from the construction of Druid Lake, which had to be sloped down and brought into shape.

In conformity with the location of this Avenue, and the dead level road around the Lake, the Water Board has performed a great amount of work by grading and shaping up the irregular grounds around the Lake, and there is little left to be done by the Park Commission, who, by agreement, will take charge of these surroundings in the way of ornamentation. In this direction we have already constructed a handsome pavillion on the west side of the Lake, and walks leading'to and from this structure have been graded. One of these walks (that leading to the head of the lake) had to cross an excavation of a former road which had to be obliterated. The filling material for this purpose was close at hand and consisted of an old embankment, which was part of a road leading to the dam of a former ice-pond in the vicinity of the head of the Lake. In leveling off this embankment and fiilling up that excavation, the irregular surface of the ground in that neighborhood was put in proper shape.

An approach to the Lake road from near the main entrance was constructed after a careful study for an easy grade and a graceful curvature. You also instructed me to locate a road over the extensive and unimproved grounds north and east of Druid Lake, as it would develope some beautiful scenery, at the present shut out of view of Park visitors. The consequent studies and location of such a road showed the practicability and great usefulness of the improvement, and the final location was examined and approved by you. A serpentine line around hills and ravines, with the easiest possible grades, and some very interesting views, will be the character of this proposed improvement. Preparations for its construction have already been made, and the light nature of the work promises its completion by next spring or summer.

In June, the foundation work for the new farm buildings was commenced with a small force of park laborers, by making preliminary excavations and embankments which enabled the contractor of the buildings to go on with the construction of his work. This was finished in the fall of the year to your fullest satisfaction. The remaining work of grading around the buildings, the approaching roads and walks, were executed immediately after the mechanics had left their work ; a large area of sod procured from the opening of a new road to be built in connection with the new Reservoir in the western section of the park, was laid over the graded surface of the ground around the buildings; the unsightly Dummy shed of temporary construction was removed to the park lot joining the north Avenue of the city. Here the question arose, whether the foundation of the shed should be a solid embankment or a trestle-work. The high embankment of the Avenue and an expensive sewer required along the park railway had, in former years, decided in favor of a trestle-work of 200 feet length. At the first sight it appeared that a similar structure would be required for the foundation of the shed, but on reflecting that this trestle-work had a rise of 3 feet to the Avenue, and that there was no necessity of joining the shed with the level of the Avenue, it was concluded that a dead level for the shed would save an elevation of 3 feet, and that an embankment on the low ground would possibly cost less than a trestlework. The subsequent levels taken on the ground, and a calculation of quantities showed, in fact, that an embankment would cost little over \$200, whilst a trestle-work would have cost about \$1.000.

This embankment of only 10 feet was carried out by contract, and the shed erected over it. The old lumber of the shed had been used in the new position, with little additional new timber, as the structure was considered of a temporary character. A substantial and elaborate building did not seem to be advisable, as efforts of Passenger Railway Companies seem to be made to extend their routes to the limits of the Park, which might eventually relieve the Park Commission from the burden of running steam-cars at present.

The selection of the elevated ground in the western corner of the Park for a high-service Reservoir, as a part of the city water-works, necessitated the change of some roads to avoid sacrificing some valuable features in the scenery. The ground covered by the new reservoir will be upwards of 8 acres (including the slopes for embankments.) The roads were to be adapted to the construction of the reservoir, and their location and construction were naturally left to the Park Commission, whilst the Water Board offered to bear the expenses of them.

One of those roads, about one-fourth of a mile long, passing along the south side of the reservoir and leading to Green Spring Avenue, has been graded and finished in the fall of the year, and has done already great service during the Pimlico cattle-show. The other road on the west side of the reservoir, connecting the forestroad leading to "the Dell, " is in progress of construction and may be finished during this winter.

An important improvement has been accomplished, during the summer, in the laying of water pipes along the principal roads in the park, and the employment of more water carts for the efficient laying of dust. Though the work began rather late in the season, its great benefit has been felt even in its incompleted condition, some hydrants having been made available at an early period. About 20,000 feet of iron pipe has been laid at a cost of about \$10,000, with suitable hydrants (valves) at distances averaging 1,000 feet apart, based on the experience that a watering cart will be filled and emptied at that distance without loss of time. When diverging drain-pipes were required, their ends were not allowed to meet again or approach each other nearer than 1,000 feet. In this way several thousand feet of pipe were saved.

There are more pipes projected to be laid when the new reservoir shall be finished, as they could be fed, easier directly from this instead of pumping the water to the higher elevation of the small reservoir which at present supplies our fountains and watering pipes. It is understood that in future the Water Board will do the pumping for the Park after their new reservoir is completed. This would require the insertion of a branch pipe in their pumping system, in connection with our small reservoir, which cannot be dispensed with on account of its high elevation required for the fountains, whilst the level of the new reservoir may be considered sufficient to supply the largest portion of the pipes laid and to be laid for irrigating purposes ,for which the water may be drawn directly from the new reservoir with less expense.

A small gang of laborers who graded the walks and ground at the pavilion between Swann Avenue and Druid Lake, was almost exclusively employed in grading new and finishing old walks in other directions of the Park, so, for instance, a new walk from the spring above Garrett's Bridge to Crow's Nest, a branch walk through No. 6 Grove, leading to the "Clipper Gate," have been graded and partially graveled; other walks have been studied and are contemplated to be opened to the pedestrians at an early period.

The trimming of the borders of drives and walks has constantly been attended to under the superintendence of the gardener. Weeds and sedge-grass had been removed from the lawns to some extent. Top-dressing of portions of the lawns was also attended to. The ploughed ground from last year's commencement of improving the western section of the Park was thoroughly leveled and set in grass.

In making repairs of roads, and graveling new ones, the original cheap way of procuring gravel and decomposed rock from park quarters was still adhered to. This enabled us, with a comparatively small working force, to finish large stretches of roads and walks in a very short time. Though the condition of such roads cannot be compared with the expensive roads of the New York parks, they have stood very well and given general satisfaction. It has been said that such expensive roads of the hardest material and the heaviest foundation would be the cheapest in the end. But when (according to the last annual report of the New York Park Commission) the repairing and cleaning of roads and walks (in the Central Park) has cost (in one year) \$92,377 77, it cannot be denied that roads even of the best quality require care and attention. As long as there are new roads and walks to be made, and funds are limited, I believe the best plan is to go on with the new work in the old way, and give to the public more roads and walks, so that the beautiful grounds of the park may be more developed and enjoyed at an earlier period. After this, the roads may be improved in hardness by the application of a few inches of good material to be spread and rolled on the surface of the roads. This is all that is required for a good Park drive.

The various kinds of work going on in many directions of the Park kept me very busy during the whole year; surveying, drawing, sketching, studying locations and grades, setting grade-stakes and laying out work generally for about five gangs employed in different locations, I was able to do without any engineering assistance. The hands and hired carts under the able management of Mr. Smith had to be divided according to circumstances, and often changed from one place to another. Great assistance in the performance of my various duties has been rendered by the indefatigable Capt. Cassell, who, besides the faithful execution of his police duties, could always find time to attend to many things entrusted to him by you and me.

#### REPORT OF THE

In Patterson Park some improvements were made by constructing and changing walks in accordance with the location of a refreshment saloon erected early in summer. The small force of laborers was principally engaged in repairing and keeping up the place.

A map of Druid Hill Park, showing the progress of the. work up to the 31st of October, 1871, is enclosed.

All of which is respectfully submitted.

AUG. FAUL,

Eng'r and Gen'l Sup't.

## REPORT OF THE

An Inventory of Property at Druid Hill Park, Oct. 31, 1871.

Bouldin's Plot of Druid Hill Park with case.

- 2 Topographical maps of Druid Hill Park.
- 1 Topographical map of Patterson Park. Map and profile for Terrace at Pavilion.
- 4 sheets map of Druid Hill Park. Some sheets of drawing paper.

### OFFICE DEPARTMENT.

- 1 oak desk.
- 1 pine desk.
- 1 cane seat rotary chair.
- 1 dozen cane seat arm chairs.
- 1 large oak table.
- 1 pitcher and wash bowl.
- 2 spittoons.
- 1 walnut wash stand and looking glass.
- 1 painted bucket.
- 2 student lamps.
- 2 stoves.

### TOOLS, IMPLEMENNTS AND FARMING UTENSILS.

- 7 setts of cart gears.
- 3 carts, 6 pair of hames.
- 5 water carts, 1 wagon saddle.
- 1 wagon and 1 jagger wagon.

dray and night cart, 1 saddle and bridle.

- 2 single and 1 double sett of wagon gears. mowing machine.
- 4 lawn mowers.
- 8 tool boxes.
- 2 plows.
- 2 drag harrows. straw cutting machine.

- 1 snow plow.
- 25 picks.

81 spades.

- 34 long handle shovels.
- 25 handles for shovels.
- .1 sand screen.
- 1 pair of shears.
- 2 patent sod cutters.
- 2 half moon knives.
- 4 saws to trim trees.
- 1 block and tackle.
- 9 scythes and 5 sneads.
- 1 force pump.
- 5 tree forks.
- 2 watering pots.
- 1 brier scythe.
- 4 garden reels.
- 2 cespool hooks.
- 1 garden plow.
- 1 lot of old canvass.
- 2 pair of double swingletrees.
- 1 hay knife.
- 2 pair of lead chains.
- 9 axes, 2 grindstones.
- 2 hand axes.
- 2 mauls and 4 wedges.
- 1 peck measure.
- 1 half bushel measure.
- 3 locks for feed room. lot of curry combs and brushes.
- 1 cross cut saw.
- 18 wheelbarrows.
- 12 hay forks.
- 10 small stone hammers.
  - 2 rollers.

6 pea fowls.

6 guinea-fowls.

8 Chinese geese.

12 wild geese.

# ANNUAL REPORT

OF THE

# COMMISSIONERS FOR OPENING STREETS,

TO THE

· MAYOR AND CITY COUNCIL OF BALTIMORE,

For the year ending October 31st, 1871.

# REPORT.

Office of the Commissioners for Opening Streets, Baltimore, December, 1871.

To the Honorable the Mayor and City Council of Baltimore:

GENTLEMEN:

The Commissioners for Opening Streets beg, respectfully, to submit their Fourth Annual Report for the fiscal year commencing January 1st, 1871, and ending October 31st, 1871.

The Commissioners have, during the above named period, completed the assessments of damages and benefits, and have made a final return to the Register of Baltimore City, upon the subjoined list of streets and alleys opened, closed, and widened, and also assessments for the construction of several sewers, as per ordinances of your honorable body.

# STREETS OPENED.

Albemarle street, from Plowman street to Baltimore street. Calhoun street, from Presstman street to Cumberland street. Clagett street, from Lawrence street to Stewart street. John street, from Greenmount avenue to Belvidere road. McElderry street, from Broadway to Register street. Schroeder street, from Franklin street to Adams street. Sixty feet street, from Gilmor street to Fulton street. Thompson street, from Fremont street to Republican street. Wells street, from Jackson street to Clagett street.

### REPORT OF THE

# STREETS CLOSED.

Liberty road, from Gilmor street to Fulton street.

# ALLEYS OPENED.

An alley 12 feet wide, to north side of Orleans street, between Broadway and Register street.

An alley 15 feet wide, north of Baltimore street, between Broadway and Register street.

# ALLEYS CLOSED.

An alley 20 feet wide, from Carey street to Stockton alley, between Adams street and Thompson street.

### SEWERS.

Sewer from Oliver street and Decker street to Jones' Falls.

The first return was made on this sewer in November, 1870 pending its final disposition by the Commissioners, the ordinance was repealed by your honorable body, and an appropriation made, and its construction placed directly in the hands of the City Commissioner.

Sewer from McMechen street and John street to Dickson alley.

The ordinance empowering the Commissioners to assess benefits for the construction of this sewer has also been repealed by your honorable body, and the same disposition made of it as was done in the case of the Decker street sewer.

Appeals have been taken to the Courts of competent jurisdiction from the decision of the Commissioners on the following streets:

Calhoun street, opening from Presstman street to Cumberland street. McElderry street, opening from Broadway to Register street. An alley 20 feet wide, from German street to Lombard street, between Hanover street and Sharp street.

These cases have not yet been reached, but the Commissioners have no doubt they will be disposed of during the January term of the Court.

An injunction has been issued by the Circuit Court, at the instance of several citizens, restraining the City Collector from collecting the assessments in the opening of Albemarle street, but no further legal proceedings have yet been had, and the result, therefore, cannot, at this time, be reported.

The ordinance closing the Liberty road, and opening in lieu thereof a street sixty feet in width, to be called Presstman street, located 256 feet south of Baker street, between Gilmor street and Fulton street, has been repealed by your honorable body, at least so much thereof as relates to the opening of said sixty feet street; and another ordinance has been enacted by which the Commissioners are authorized to open Presstman street, as laid down on Poppleton's plat, between Gilmor street and Monroe street.

The Commissioners also report the following list of streets and alleys in process of opening, and sewers in process of construction, which will be disposed of as rapidly as circumstances will permit:

### STREETS IN PROCESS OF OPENING.

Arlington avenue, from Mulberry street to Franklin street. Charles street, from West street to Hammond street. Dolphin street, from Pennsylvania ave. to Chatsworth street. Eager street, from Gay street to Bond street. Gist street, from Baltimore street to Monument street. Mount street, from Baltimore street to Fayette street. Oliver street, from Belair avenue to Mine Bank lane.

# REPORT OF THE

Orleans street, from Chester street to Patuxent street. Presstman street, from Gilmor street to Monroe street. Register street, from Lancaster street to Thames street. Sterrett street, from Ramsay street to Columbia street. Stricker street, from Mulberry street to Harlem Square. Thompson street, from Friendship street to Forrest street. West street, from Scott street to Ridgely street.

STREETS IN PROCESS OF WIDENING.

Eutaw street, from Laurens street to North avenue. Franklin street, from Green street to Pearl street.

STREETS IN PROCESS OF CLOSING.

Ann street, from Jefferson street to Monument street. Durham street, from Jefferson street to Monument street. McElderry street, from Register street to Wolfe street. Liberty road, from Fremont street to Stricker street.

ALLEYS IN PROCESS OF OPENING.

Hargrove alley, from Chase street to Eager street. Madeira alley, from Pratt street to Lombard street.

SEWERS IN PROCESS OF CONSTRUCTION.

A sewer from Scott street to the Upper Spring Gardens.

# PUBLIC SQUARES.

A public square bounded on the north by Jones' Falls, on the south by John street, on the east by North street, and on the west by Charles street.

A public square bounded on the north by the southern line of Lanvale street, as laid down on Poppleton's plat, on the south by the northern line of the property owned by the Northern Central Railway Company, on the north side of Jones' Falls, on the east by the west side of North street, as laid down on Poppleton's plat, and on the west by the east side of Charles street.

The ordinance empowering the Commissioners to open Sterrett street the width of sixty-six feet, from Ramsay street to Columbia street, has been repealed by your honorable body. Another ordinance, approved July 12th, 1871, directing the said street to be opened fifty feet wide, for the same distance, is now in process of execution, but as the citizens of that locality have again applied to your honorable body for the repeal of the last named ordinance, the Commissioners, through deference to the future action of the Council, and to save additional expense, have delayed its completion.

The opening of Arlington avenue, the widening of Franklin street, the closing of Ann street, Durham street and McElderry street, and the Liberty road, will be completed and final return made of the same on or before December 31st, 1871.

The ordinance for the opening of Madeira alley, from Lombard street to Pratt street, has been repealed, and the bed of the alley declared a public highway by resolution of the Council, in accordance with Art. 4, Sec. 842, Code of Public Local Laws.

Hargrove alley, from Chase to Eager streets, having been, in 1869, declared a public highway, under a resolution of the Mayor and City Council, by virtue of the same Sec. of Art. 4 of Public Local Laws quoted above, the ordinance for its condemnation is inoperative, the Commissioners, therefore, respectfully recommend its repeal.

The Scott street sewer, (which is designed to turn the waters of Chatsworth run from the Lower into the Upper Spring

Gardens,) for the construction of which \$12,000 has been appropriated, and which amount will be entirely consumed in its completion, has been delayed for the purpose of obtaining the consent of the owner of the land, through which the sewer will necessarily pass, to the surrender of the right of way for a nominal sum of damages.

This course has been deemed advisable, as the whole way is owned by one person, and his consent will preclude the necessity of additional appropriations of money, and also prevent litigation, and the various delays attending the trial of sewer cases, and will enable the City Commissioner to complete a very important improvement in a short period.

Respectfully submitted,

JOHN H. WAGGNER, JOHN T. DURDING, JAMES R. BUSEY, Commissioners.

WM. TELL BIXLER, Clerk.

# REPORT.

OFFICE BOARD OF FIRE COMMISSIONERS, Baltimore, November 1st, 1871.

To the Honorable the Mayor and

City Council of Baltimore :

GENTLEMEN :- In presenting for the consideration of your Honorable Body, the Thirteenth Annual Report of the Department under their charge, the members of the Board of Fire Commissioners beg leave to call your attention, and that of our citizens generally, to the remarkable immunity from destructive fires which our city has enjoyed in the past, no less than in the preceding years during which the present Fire Department has been in operation. To whatever sources this immunity is to be traced, there surely exists in the small comparative loss by fire during the past fiscal year, abundant cause for thankfulness to a superintending Providence for this happy exemption. Great, however, as have been the losses in large cities other than our own during the past year, they dwindle into utter insignificance by the side of the recent calamitous disaster in our sister city Chicago, and we will be unfaithful to our trust did we fail to profit to the fullest possible extent by the lesson it teaches. The objective point of a well regulated Fire Department, should be prevention rather than cure, a pail of water promptly used in the in-

### REPORT OF THE

cipient stage of a fire, is of more value than a deluge after it has passed beyond control. Thoroughly recognizing the importance of this principle, the Board has labored to keep the limited Department under its control, up to the highest standard of promptness and efficiency, consistent with the means at its disposal. That these means shall be increased and strengthened, the Board respectfully suggests that the Fire Alarm Telgraph be placed under its control. Although no specific cause for complaint exists as to the general management of that Department, under the supervision of the present Superintendent, yet there is little doubt that as the Fire Alarm Telegraph is one of the most important auxiliaries of an efficient Fire Department, it should be placed in our own, as it is in all other large cities, under the direct control of that Department. Where the responsibility rests, it would appear to be proper the authority should exist. Promptness in answering an alarm the Board can readily enforce, whilst it cannot, under the present arrangement, correspondingly enforce promptnesss in giving an alarm.

The Board also respectfully calls the attention of your Honorable Body to the insufficiency in number, and the improper location of a portion of the Telegraphic Alarm Boxes, the last of which could be remedied had the Board the control of such locations. The remedy for the first is with your Honorable Body, and we think is entitled to serious consideration, when it is known that we have less than one-half of such Telegraphic Signal Stations that other cities possess, of much smaller population.

Since our last report, the following changes have been made in the composition of the Board: On the 29th day of April, 1871, Mr. John S. Hogg was appointed by the Mayor to fill the vacancy caused by the resignation of Mr. William Wilson, Jr., and on the 22d day of August, Mr. James Logan, Jr., was appointed by the Mayor to fill the vacancy caused by

the removal of Mr. Emanuel Corbett. Mr. John S. Hogg was elected President of the Board on the 15th day of June, 1871, vice Mr. Emanuel Corbett. On the same day, Mr. Henry Spilman was elected Chief Engineer, vice General J. W. Watkins, resigned.

The following deaths have occurred among the members of the Department during the year: Daniel H. Cross, Fireman of No. 7 Company, on February 4th. Geo. W. Brady, Engineman No. 4 Company, March 17th, and Charles Geighler, Fireman No. 8 Company, on October 22d.

The total number of actual fires during the ten months, ending October 31st, have been 130, and the losses \$475,394, and the Board is satisfied that this comparatively small amount is to be attributed chiefly to the improved discipline of the Department, the lightness and portability of the Engines, and the good supply of water, in the central portions of the city, where is situated its most valuable property, although in many parts of the city, the mains from which the Fire Plugs are supplied, are entirely too small, and in cases such as the disastrous fire on Thames street, in August, 1870, the inefficiency of the supply in a measure tends to paralyze the best efforts of the Department.

The Department now consists of eight Engine and three Hook and Ladder Companies, and one hundred and thirtynine men, detailed statements of which will found in the accompanying report of the Chief Engineer.

The condition of the Apparatus and Horses is satisfactory, but several of the Houses and Stables, will require alterations to make them complete, estimates of which will be submitted by the Inspector of Public Buildings, under whose supervision such alterations must now be made. On the 8th of March, last, No. 8 Engine Company, was organized and placed in service, and on or about January 1st, 1872, No. 9 Engine Company, the House for which is nearly completed on the corner of Madison and Register streets, will also be established. The House for No. 10, the last of the Three New Companies, authorized at the December session, 1870, of your Honorable Body, is about being placed under contract, and as early in the coming year as possible, that company will be put in service, the lot purchased for this company is located on Columbia street near Poppleton.

Your Honorable Body will find in our estimates for 1872, the amount of sixty-five hundred dollars for the purchase of the portion of No. 6 Engine House, used by that company as a stable, rent for which has been paid at four hundred and sixteen dollars per annum. This property is now offered for sale at the price above named, and must be sold to close an estate. Should it fall into private hands, the Department might be forced to vacate the entire building, as the necescessary stable-room cannot be had sufficiently near for prompt service.

While desiring at this moment to leave to the wisdom of your Honorable Body the propriety of any considerable increase in the present force of this Department, the Board very respectfully begs to urge upon your consideration, the importance of a Floating Steam Fire Engine Company, for harbor use, as suggested by the Chief Engineer; such a vessel would be able to cover promptly several miles of water front, and in locations, such as as the vicinity of Canton and Locust Point, would not only render valuable service before an engine could possibly arrive, but would for some time to come render it unnecessary to locate a company at those points.

# 568 REPORT OF THE BOARD OF FIRE COMMISSIONERS.

The increased sum asked for general expenses, as per foregoing estimates, for the ensuing year, is due to the steady increase of the wear and tear of the Apparatus, Hose and Horses, consequent upon the rapid improvement of the city in new buildings and the additional territory to be traversed, coupled with the fact that as the Rolling Stock, Hose and Horses become older, the ratio of repairs is necessarily augmented, a portion of our Stock, Engines and Horses, having been in service since the first formation of the Department in 1859. The increased amount asked for Hose is also partly due to the scarcity of water in the new portions of the city, thereby requiring the laying of longer lines to bring water to bear on a fire in those localities.

In conclusion the Board respectfully request your attention to the vague character of Ordinance, No. 35, of January Session, 1871, the true meaning of which seems difficult to understand. The intention of the same evidently being to provide for the continuance of the salaries of members who are disabled in actual fire service, and yet it seems liable to the additional construction of providing for those becoming sick or disabled at any time, while in the service of the Department, as appointees thereof.

Thanking your Honorable Body and the Joint Standing Committee on Fire Department for their attention to the wants of the Department for the past year, we are very respectfully,

JOHN S. HOGG, President,
EDWIN L. JONES,
THOS. W. CAMPBELL,
GEO. F. THOMPSON,
JAS. LOGAN, JR.,
Board of Fire Commissioners.

CHIEF ENGINEER'S REPORT.

# REPORT.

OFFICE CHIEF ENGINEER B. C. F. D., Baltimore, November 1st, 1871.

# To JOHN S. HOGG, Esq., President Board of Fire Commissioners:

SIR: In obedience to the rules and regulations for the government of the Baltimore City Fire Department, I have the honor herewith to submit my Report of the operations and condition of the same for the new fiscal year ending October 31st, 1871, a period of ten months.

Having been elected by your Honorable Body to fill the vacancy caused by the resignation of my respected predecessor, Gen'l J. W. Watkins, I took the oath of office, and entered upon the duties of Chief Engineer, on the 19th of June, 1871.

Keenly appreciating their importance, and fully aware of the great responsibilities of the position to which' I had been assigned, I nevertheless assumed the discharge of those duties with a confidence predicated upon my firm reliance upon the discipline and material of the Department turned over to me by my predecessor in office. That reliance, it gives me great pleasure to say, has not been misplaced. To Assistant Engineers Ellender and Hennick, and to the Foremen of the several companies and the men under their command, I am indebted for the successful management of the fires which have occurred during my term of office, and it gives me yet more pleasure to add, that the small amount of loss by fire during that period, abundantly attests that I have paid the Department no empty compliment. To yourself and the members, both in their official and private capacities, I am also under many obligations.

# FIRES.

The oportunities for destructive fires exist in abundance in all our large cities, and are chiefly to be found in the carelessness of construction, the combustible nature of the material used, and the negligence of the occupants of buildings. To these, it is proper to add the eagerness of insurers to obtain premiums without competent surveys, and the consequent facility with which hazardous risks can be covered at moderate rates. This facility begets an indifference to danger from fire, which often leads to deplorable results; one consequence of which is, that in large cities the most inflammable materials are recklessly heaped up, covered by insurance, and are ready at any moment to spread desolation and death on every side, and to render powerless the best efforts of the best Fire Department which can possibly be devised. In this light, I beg to express the conviction founded on careful observation and many years experience, that as efficient as the present force may be for ordinary service, it is, even with our recent additions, too small to safely provide for the emergency which would exist were two large fires to occur, either simultaneously or immediately in succession. With the additional force which I feel it my duty to suggest, our Department will still be smaller than that of any city in the Union of similar size. 1 would therefore respectfully recommend the establishment of four more engine companies, and one more Hook and Ladder Company, to be located in such

positions as the Board may deem proper. One of the Engine companies to be organized as a floating company for harborservice. This company would cover the entire water front of the city, and having steam up day and night, and being provided with a powerful pump, sufficient hose, and an unlimited supply of water, would probably save its additional expense in the first large fire it encountered. The whole force would then comprise fourteen Engine and four Hook and Ladder Companies.

The number of alarms during the year ending October 31st, have been 147. Actual fires, 130. False, chimney and test alarms, 17. The gross loss for the ten months ending October 31st, I am enabled through the polite attention of Mr. Chas. T. Holloway, Fire Inspector, to state, is \$475,394, of which sum, \$241,420 was incurred during the month of May, chiefly by the destructive fire on Sharp street, May 224. For other statistics, I beg to refer to tables A. B. C. D. E. F.

These statistics call attention to the importance of incr. ased carefulness in the erection and occupation of buildings, and in the facility of access, which should be offered in case of fire. As our warehouses and hotels increase in height, and moderate sized lumber yards, misnamed Mausard roofs, continue to be piled thereon, the loss by fire will inevitably increase. The free use of wooden partitions and stairways, carelessness in leaving trap-doors open, blocking up windows and passage ways with packages of goods, the use of coal oil, storing ashes in wooden vessels, defective construction of hot air furnaces, flues and registers, and many other causes combine to increase the liability of fire, and would seem to call loudly for appropriate legislation to provide for the general safety.

The Pay Roll of the Department, shows a total of one hundred and thirty-nine men, divided and classified as per table G.

Since the last report, the Department has lost by death the

following members. George W. Brady, Engineman, No. 4 Co., March 17th, 1871. D. H. Cross, Fireman, No. 7 Co., February 4th, 1871. Charles Geighler, Fireman, No. 8 Co., October 22d, 1871.

# HORSES.

There are at present in the service thirty-eight horses, all of which are in good condition. For the location of which I refer you to table H.

# HOSE.

• The entire length of hose in use is eight thousand seven hundred and seventy-five feet, most of which is in good order, as per table H.

# ENGINES, HOSE CARRIAGES AND HOOK AND LADDER TRUCKS.

There are now in service eight Engines, eight Hose Carriages and three Hook and Ladder Trucks, all in good order, the description of which will be found in tables H and J. Two other Engines have been purchased, one for Engine Co., No. 10, and one for a reserve Engine, authorized by the last Council. Engine No. 9, has been ready for some time past, awaiting the completion of that company. The two Fuel Wagons are also in good order, and have proved of great service.

With your approbation, I have recently put into operation a new system of Fire Alarm Signals, comprising and providing for a first and second alarm, as is in use in other large cities, which has so far worked well. Yet in order that the greatest benefit possible to be acquired from the Fire Alarm Telegraph, should be made available, I beg to urge the trans-

fer of that Department to the control of the Fire Department. The reason for this will be so obvious to your Honorable Body as to require no further amplification at my hands.

In conclusion, I beg to congratulate the Board upon the high position which the Department holds in the estimation of the citizens of Baltimore, and in the opinion of those of our sister cities.

Respectfully submitted,

H. SPILMAN, Chief Engineer.

Upon the occurrence of an alarm of fire, the number of the Station from which the same is received is struck out from the Central Station for the space of five minutes upon all the gongs and bells in Telegraphic communication therewith, which is at once answered by the Companies which attend that Station.

When a larger force is required, a second alarm can be given by the Chief Engineer or his Assistants.

When a still greater force becomes necessary, a General Alarm may be sounded bringing up all the Reserves of the Department, or single Companies may be called as follows:

SIGNALS FOR CALLING COMPANIES SEPARATELY. — One round of which, followed by the number of the Station at which it may be wanted, will be repeated five times at proper intervals, unless the reply 3-5-4 is sooner received at the Central Station.

#### LIST OF TELEGRAPHIC SIGNAL STATIONS-Continued.

#### REPORT OF THE BOARD OF

#### GENERAL ORDERS,

Issued upon Establishing the Revised Code of Fire Alarm Signals.

OFFICE OF CHIEF ENGINEER, B. C. F. D. BALTIMORE, August 1st, 1871.

General Orders:

No. 1. When a First Alarm is given, all members of this Department whose Companies do not respond, will report a^t their respective Engine and Truck Houses prepared for duty, and if not relieved by the Recall Signal, or required for active duty during thirty minutes, will answer roll call and be dismissed by their respective Foremen.

No. 2. After a First Alarm is given, and before the Recall Signal is struck, all the remaining Engine Companies in that district, together with the nearest Hook and Ladder Company, will answer a new alarm from any other Station therein. Should two Hook and Ladder Companies be in service at a First Alarm, the remaining Hook and Ladder Company will answer a new alarm from any other Station in the City until the Recall is struck.

No. 3. When the same Station is struck a second time previous to the Recall, it will be considered as a *Second Alarm* and be answered accordingly. When another Alarm comes from the Station first struck, *after the Recall*, it will be considered as a First Alarm and be answered accordingly.

No. 4. After a Second Alarm is struck and before the Recall is given, all Engine and Hook and Ladder Companies which have not responded, will, in case of a new alarm, answer any other Station in the City—No. 5 Engine Company from No. 3 Engine House, No. 8 Engine Company from No. 1 Engine House, and the unemployed Hook and Ladder Company from No. 1 Truck House.

No. 5. The Recall Signal is 3-4-5, followed by the number of the Station from which the alarm is received, and will be understood as an order for dismissing the men attached to Companies awaiting special orders *connected with that Station*, and for the resumption of such Companies of their attendance upon their First Alarm Station List.

No. 6. The General Alarm and Company Signals are retained until further orders.

H. SPILMAN, Chief Engineer.
